

WAGO PCB Terminal Blocks and WAGO Connectors

Full Line Catalog, Volume 2 – Edition 2019/2020

2

WAGO Full Line Catalogs

Volume 1, WAGO Rail-Mount Terminal Block Systems

- Rail-Mount Terminal Blocks
- Rail-Mount Terminal Blocks with Pluggable Connector (X-COM®-SYSTEM)
- Patchboard Systems
- Terminal Strips
- PUSH WIRE® Connectors for Junction Boxes
- Lighting Connectors
- Shield Connecting System

Volume 2, WAGO PCB Terminal Blocks and WAGO Connectors

- PCB Terminal Blocks
- THR/SMD PCB Terminal Blocks
- *MULTI CONNECTION SYSTEM (MCS)*
- Pluggable PCB Terminal Blocks
- Feedthrough Terminal Blocks
- Specialty Connectors
- Empty Housings

Volume 3, Automation Technology

- Solutions & Software
- Operating & Monitoring
- Controllers
- Modular I/O-SYSTEM, IP20
- Industrial Switches
- Radio Technology
- IP67 Sensor/Actuator Boxes, IP67 Cables and Connectors

Volume 4, WAGO Interface Electronic

- Relay and Optocoupler Modules
- Signal Conditioners and Isolation Amplifiers
- Current and Energy Measurement Technology
- Power Supplies
- Interface Modules and System Wiring
- Overvoltage Protection
- Empty Housings

Volume 5, WAGO Pluggable Connection System WINSTA®

- Pluggable Connectors
- Snap-In Device Connectors
- Pluggable PCB Connectors
- Distribution Connectors
- Cable Assemblies
- Flat Cable Systems
- Distribution Boxes

Volume 6, WAGO Marking

- Printer
- Software
- Terminal Block Marking
- Cable and Conductor Marking
- Device Marking
- Marker Carriers

Volume 2, WAGO PCB Terminal Blocks and WAGO Connectors

		Seite
	WAGO PCB Terminal Blocks	15
	WAGO THR PCB Terminal Blocks	257
	WAGO SMD PCB Terminal Blocks	291
	WAGO MULTI CONNECTION SYSTEM (MCS) MICRO Pin Spacing 2,5 mm / 0,08 ... 0,5 mm ² (28 ... 20 AWG)	325
	WAGO MULTI CONNECTION SYSTEM (MCS) MINI Pin Spacing: 3.5 mm (0.138 inch), 3.81 mm (0.15 inch) / 0.08 ... 1.5 mm ² (28 ... 14 AWG)	345
	WAGO MULTI CONNECTION SYSTEM (MCS) MINI HD Pin Spacing: 3.5 mm (0.138 inch) / 0.08 ... 1.5 mm ² (28 ... 16 AWG)	413
	WAGO MULTI CONNECTION SYSTEM (MCS) MINI SL Pin Spacing: 3.5 mm (0.138 inch) / 0.2 ... 1.5 mm ² (24 ... 16 AWG)	437
	WAGO MULTI CONNECTION SYSTEM (MCS) MIDI Pin Spacing: 5 mm (0.197 inch), 7.5 mm (0.295 inch) / 0.08 ... 2.5 mm ² (28 ... 12 AWG)	447
	WAGO MULTI CONNECTION SYSTEM (MCS) MIDI Classic Pin Spacing: 5 mm (0.197 inch), 5.08 mm (0.2 inch), 7.5 mm (0.295 inch), 7.62 mm (0.3 inch) / 0.08 ... 2.5 mm ² (28 ... 12 AWG)	545
	WAGO MULTI CONNECTION SYSTEM (MCS) MAXI 6 Pin Spacing: 7.62 mm (0.3 inch) / 0.5 ... 10 mm ² (20 ... 8 AWG) WAGO MULTI CONNECTION SYSTEM (MCS) MAXI 16 Pin Spacing: 10.16 mm (0.4 inch) / 0.75 ... 16 mm ² (18 ... 4 AWG)	737
	Pluggable WAGO PCB Terminal Blocks Pin Spacing: 3.5 mm (0.138 inch), 5 mm (0.197 inch), 5.75 mm (0.226 inch)	759
	WAGO Feedthrough Terminal Strips	769
	WAGO Specialty Connectors WAGO Wire-Tap Branch Connectors; WAGO Connectors for KNX/EIB Applications	805
	Modular WAGO Empty Housings	819
	WAGO Accessories and WAGO Tools	829
	Technical Section	857
	Index and Addresses	907

Operating WAGO Connection Technologies

Please follow the applicable product-specific termination instructions.

PUSH-IN CAGE CLAMP®

Push-in CAGE CLAMP® terminates the following copper conductors: solid

stranded

fine-stranded, also with tinned single strands

fine-stranded, tip-bonded

fine-stranded, with ferrule (gastight crimped)

fine-stranded, with pin terminal (gastight crimped)

The universal connection with an additional advantage:

Push-in connection

Terminate solid and stranded (Class B 7 strands or less), as well as ferruled conductors, by simply pushing them in – no tools required.

Termination for all conductor types:

- Open clamping unit.
- Insert the conductor.
- Release clamp – done!

CAGE CLAMP®

CAGE CLAMP® terminates the following copper conductors: solid

stranded

fine-stranded, also with tinned single strands

fine-stranded, tip-bonded

fine-stranded, with ferrule (gastight crimped)

fine-stranded, with pin terminal (gastight crimped)

The universal connection for solid, stranded and fine-stranded conductors

Termination:

- Open clamping unit.
- Insert the conductor.
- Release clamp – done!

Operating WAGO Connection Technologies

Please follow the applicable product-specific termination instructions.

POWER CAGE CLAMP®

POWER CAGE CLAMP terminates the following copper conductors:
solid

stranded

fine-stranded,
also with tinned
single strands

fine-stranded,
with ferrule
(gastight crimped)

The universal connection for conductors larger than 35 mm² (2 AWG)

Termination:

- Open clamp by turning a T-wrench counter-clockwise.
- Press the integrated latch to open clamping unit for hands-free wiring.
- Insert the conductor.
- A small counter-clockwise rotation closes the clamp, securing conductor.

PUSH WIRE®

PUSH WIRE® terminates the following copper conductors:
solid

PUSH WIRE® connection for solid and stranded conductors (depending on the model used)

Termination:

Tool-free, twist-free terminations for solid and rigid stranded conductors – simply push into the unit.

PCB Terminal Blocks

233 and 236 Series Description and Installation

1

Inserting a conductor via 3.5 mm screwdriver.
Screwdriver actuation parallel to conductor entry.

Inserting a conductor via 3.5 mm screwdriver.
Screwdriver actuation perpendicular to conductor entry.

Inserting a conductor via operating tool.

Inserting a conductor via 233-332 Operating Tool. Operation is performed parallel to conductor entry.

PCB Terminal Strips placed behind each other save space – staggering them by half the pin spacing simplifies subsequent wiring of the first row.

Combining PCB terminal blocks with different pin spacing.

Labeling with self-adhesive marking strips.

Labeling via factory direct marking.

PCB Terminal Block ▶ 233 Series

CAGE CLAMP® ▶ Actuation type: Operating tool ▶ 0.5 mm² ▶ Terminal strip

1

- Compact terminal strips with CAGE CLAMP® connection and screwdriver actuation parallel or perpendicular to conductor entry
- Double solder pins for high mechanical stability
- Custom color combinations

Electrical Data			
Pin spacing	2.5 mm (0.098 inch) / 2.54 mm (0.1 inch)		
Ratings per	IEC/EN 60664-1		
Overvoltage category	III	III	II
Pollution degree	3	2	2
Rated voltage	63 V	160 V	320 V
Rated impulse voltage	2.5 kV	2.5 kV	2.5 kV
Rated current	6 A	6 A	6 A
Approvals per	UL 1059		
Use Group	B	C	D
Rated voltage	150 V	-	-
Rated current	4 A	-	-
Approvals per	CSA		
Use Group	B	C	D
Rated voltage	150 V	-	-
Rated current	4 A	-	-

Connection Data	
Connection technology	CAGE CLAMP®
Strip length	5 ... 6 mm / 0.2 ... 0.24 inch
Conductor entry angle to the PCB	30°
Solid conductor	0.08 ... 0.5 mm ² / 28 ... 20 AWG
Fine-stranded conductor	0.08 ... 0.5 mm ² / 28 ... 20 AWG
Fine-stranded conductor with ferrule with plastic collar	0.25 mm ²
Fine-stranded conductor with ferrule without plastic collar	0.25 mm ²
Note (conductor cross-section)	Terminating 0.75 mm ² /18 AWG conductors is possible; however insulation diameter allows only every other clamping unit to be terminated with this conductor size.

Material Data	
Material group	I
Insulating material	Polyamide 66 (PA 66)
Flammability class per UL94	V0
Clamping spring material	Chrome nickel spring steel (CrNi)
Contact material	Electrolytic copper (Ecu)
Contact plating	Tin-plated

Mechanical Data	
Solder pin arrangement	Over the entire terminal strip, in line
Solder pin length	4 mm
Solder pin dimensions	0.5 x 0.75 mm
Drilled hole diameter (tolerance)	1.1 ^(+0.1) mm

Environmental Requirements	
Limit temperature range	-60 ... +105 °C

PCB Terminal Block ▶ 236 Series

CAGE CLAMP® ▶ Actuation type: Operating tool ▶ 2.5 mm² ▶ Modular Terminal Block ▶ Pin spacing: 5/5.08 mm / 0.197/0.2 inch

1

- Modular PCB terminal blocks with CAGE CLAMP® connection, screwdriver actuation parallel or perpendicular to conductor entry
- Versions with Ex approval
- For custom PCB terminal strip assemblies
- 45° conductor entry angle permits a wide range of applications and wiring options
- Set to metric or inch pin spacing by compressing PCB terminal strips or pulling them apart

745 Series

Description and Installation

1

Inserting/removing a conductor via 5.5 mm screwdriver – 745 Series, 16 mm².

To insert a comb-style jumper bar, push it down using a screwdriver until it hits the backstop – 745 Series.

To remove the comb-style jumper bar, lift it up using a screwdriver – 745 Series.

745 Series

Marking via miniature WSB and WMB markers or factory direct marking – 745 Series.

Testing with test plug – 745 Series.

PCB Terminal Block ▶ 745 Series

CAGE CLAMP® ▶ Actuation type: Operating tool ▶ 4 mm² ▶ Modular Terminal Block ▶ Pin spacing: 5 mm (0.197 inch)

1

- Modular PCB terminal blocks with screwdriver-actuated CAGE CLAMP® for custom PCB terminal strip assemblies
- Versions with Ex approval
- Spacers for higher voltage applications
- Double solder pins for high mechanical stability
- Space-efficient configuration of terminal strips placed behind each other
- Integrated testing tap

PU = Packaging Unit; SPU = Subpackaging Unit; Dimensions in mm

Other variants can be requested via the WAGO sales department or, if necessary, configured at <https://configurator.wago.com/>:

- Other pole numbers
- Versions for Ex e II and Ex i
- Other colors
- Mixed-color terminal strips
- Versions with mounting flanges
- Direct marking

PCB Terminal Block ▶ 745 Series

CAGE CLAMP® ▶ Actuation type: Operating tool ▶ 16 mm² ▶ Number of jumper slots: 1 ▶ Modular terminal block

1

- Modular PCB terminal blocks with screwdriver-actuated CAGE CLAMP® for custom PCB terminal strip assemblies
- Versions with Ex approval
- Unrestricted UL approval up to 600 V with 20 mm pin spacing
- Common and distribute potentials via comb-style jumper bars
- Four solder pins for high mechanical stability
- Integrated testing tap
- Marker slot for Mini-WSB markers

736, 737 and 738 Series Description and Installation

1

Inserting a conductor via 3.5 mm screwdriver.
Screwdriver actuation parallel to conductor entry.

Testing via contact area above the conductors.

Low space requirements due to high-density design
– double-Deck PCB terminal strip – 736 Series.

736 Series

Labeling with self-adhesive marking strips.

736, 737 and 738 Series Combination of Multilevel PCB Terminal Strips

1

Possible combination:
Double- (736 Series) and triple-Deck PCB terminal strips (737 Series) upon request
Combination of Multilevel PCB Terminal Strips

Possible combination:
Double- (736 Series) and triple-Deck PCB terminal strips (737 Series) upon request

Possible combination:
Double- (737 Series) and quadruple-Deck PCB terminal strips (738 Series) upon request

Possible combination:
Double- (737 Series) and quadruple-Deck PCB terminal strips (738 Series) upon request

Double-Deck PCB Terminal Block ▶ 736 Series

CAGE CLAMP® ▶ Actuation type: Operating tool ▶ Terminal strip ▶ 2.5 mm² ▶ Color: gray

1

- PCB terminal strips with screwdriver-actuated CAGE CLAMP®
- High-density, double-Deck design for space-efficient wiring of multiple conductors in confined areas
- Custom marking for all termination levels

Material Data	
Material group	I
Insulating material	Polyamide 66 (PA 66)
Flammability class per UL94	V0
Clamping spring material	Chrome nickel spring steel (CrNi)
Contact material	Electrolytic copper (Ecu)
Contact plating	Tin-plated

Mechanical Data	
Solder pin length	4 mm
Solder pin dimensions	0.7 x 0.7 mm
Drilled hole diameter (tolerance)	1.3 ^(+0.1) mm

Environmental Requirements	
Limit temperature range	-60 ... +105 °C

Ferrule	Page 847
Marking	Page 833
Testing and measuring	Page 254
Tools	Page 838
Commoning strips	Page 248

Quadruple-Deck PCB Terminal Block ▶ 738 Series

CAGE CLAMP® ▶ Actuation type: Operating tool ▶ Terminal strip ▶ 2.5 mm² ▶ Pin spacing: 5.08 mm (0.2 inch) ▶ Color: orange

1

- PCB terminal strips with screwdriver-actuated CAGE CLAMP®
- High-density, double-Deck design for space-efficient wiring of multiple conductors in confined areas
- Angled conductor entry and CAGE CLAMP® actuation streamline operation
- Custom marking for all termination levels

Electrical Data			
Pin spacing	5.08 mm (0.2 inch)		
Between the modules			
Ratings per	IEC/EN 60664-1		
Overvoltage category	III	III	II
Pollution degree	3	2	2
Rated voltage	250 V	320 V	630 V

218 Series

Description and Installation

1

Terminating stranded conductors in confined spaces requires a great deal of patience, unless you use the new 218 Series PCB Terminal Strips. The clamping units of these strips can be held open during termination process via integrated locking slide.

Terminating 0.75 mm² (18 AWG) conductors is possible; however, insulation diameter allows only every other clamping unit to be terminated with this conductor size.

Testing directly on the clamping spring.

Incorrect – do not operate the locking slides from the back.

Conductor termination: To momentarily open the clamping unit, use screwdriver and then insert a stripped conductor. To open clamping unit for an extended period, move locking slide toward conductor entry hole. Then fully insert stripped conductor and move locking slide back to original position (also possible to perform with fingernail).

218 Series

Insulating housings are available in different colors.

Labeling with self-adhesive marking strips.

Labeling via factory direct marking.

PCB Terminal Block ▶ 218 Series

CAGE CLAMP® ▶ Actuation type: Locking slide ▶ 0.5 mm² ▶ Terminal strip ▶ Color: gray

1

- Terminal strips are just 8.1mm high and feature an innovative, locking slide-actuated CAGE CLAMP®
- Several clamping units can be held open simultaneously
- Easy termination of stranded conductors in tight spaces (e.g., bus connectors)

Electrical Data			
Pin spacing	2.5 mm (0.098 inch) / 2.54 mm (0.1 inch)		
Ratings per	IEC/EN 60664-1

255, 256 and 257 Series Description and Installation

1

Inserting/removing a conductor – 256 Series.

Inserting/removing a conductor – 255 Series.

Inserting/removing a conductor via finger-operated lever – 255 Series.

Inserting/removing a conductor via finger-operated lever – 256 Series.

Possible conductor arrangement with terminal strips staggered (for 256 Series only).

255, 256 and 257 Series

Formation of groups using housings of different colors.

Testing with test probes.

Testing with test plug modules.

PCB Terminal Block ▶ 255 Series

CAGE CLAMP® ▶ Actuation type: Push-button ▶ 2.5 mm² ▶ Modular terminal block

1

- PCB modular terminal blocks with push-buttons and CAGE CLAMP® connection
- Versions with Ex approval
- Set to metric or inch pin spacing by compressing PCB terminal strips or pulling them apart
- Ideal for in-the-field wiring thanks to simplified push-button actuation
- Convenient, tool-free operation

PCB Terminal Block ▶ 257 Series

CAGE CLAMP® ▶ Actuation type: Push-button ▶ 2.5 mm² ▶ Modular terminal block

1

- PCB modular terminal blocks with push-buttons and CAGE CLAMP® connection
- Versions with Ex approval
- Set to metric or inch pin spacing by compressing PCB terminal strips or pulling them apart
- Ideal for in-the-field wiring thanks to simplified push-button actuation
- Convenient, tool-free operation
- Versions with angled push-buttons for simple top-of-unit actuation

Current-Carrying Capacity Curve

Pin spacing: 5 mm / Conductor cross-section: 2.5 mm² "f-st"
Based on: EN 60512-5-2 / Reduction factor: 1

Electrical Data

Pin spacing	5/5.08 mm / 0.197/0.2 inch			7.5/7.62 mm / 0.295/0.3 inch			10/10.16 mm / 0.394/0.4 inch

PCB Terminal Block ▶ 257 Series

CAGE CLAMP® ▶ Actuation type: Finger-operated lever ▶ 2.5 mm² ▶ Terminal strip ▶ Color: gray

1

- PCB terminal strips with push-buttons and CAGE CLAMP® connection
- Versions with Ex approval
- Set to metric or inch pin spacing by compressing PCB terminal strips or pulling them apart
- Ideal for in-the-field wiring thanks to simplified push-button actuation
- Convenient, tool-free operation
- Versions with angled push-buttons for simple top-of-unit actuation

Current-Carrying Capacity Curve

2706 and 2716 Series Description and Installation

1

To open the clamping unit, pull the operating lever all the way back – 2706 and 2716 Series.

Inserting/removing a conductor – 2706 and 2716 Series.

Testing with test plug – 2706 and 2716 Series.

2706 and 2716 Series

Insert the comb-style jumper bar.

Push jumper bar down firmly using a screwdriver until it hits the backstop – 2706 and 2716 Series.

To remove the comb-style jumper bar, lift it up using a screwdriver – 2706 and 2716 Series.

PCB Terminal Block ▶ 2706 Series

CAGE CLAMP® ▶ Actuation type: Lever ▶ 6 mm² ▶ Terminal strip ▶ Color: gray

1

- High-current terminal strips with lever-actuated CAGE CLAMP®
- Tool-free opening and closing – fingers open/close levers
- Several clamping units can be held open simultaneously – convenient for terminating multi-core cables
- Two solder pins per contact point for high mechanical stability
- 600V UL for 12.5mm pin spacing

2-Conductor PCB Terminal Block ▶ 816 Series

Push-in CAGE CLAMP® ▶ Actuation type: Operating tool ▶ 1.5 mm² ▶ Pin spacing: 5 mm (0.197 inch) ▶ Color: gray

1

- Two-conductor terminal strips with screwdriver actuation and Push-in CAGE CLAMP® connection
- Double entries for supply and power distribution
- Simple, reliable connection via clamping units featuring individual operating slots
- Simple, push-in termination of solid and ferruled conductors

Electrical Data			
Pin spacing	5 mm (0.197 inch)		
Ratings per	IEC/EN 60664-1		
Overvoltage category	III	III	II
Pollution degree	3	2	2
Rated voltage	320 V	320 V	630 V
Rated impulse voltage	4 kV	4 kV	4 kV
Rated current	14 A	14 A	14 A
Approvals per	UL 1059		
Use Group	B	C	D
Rated voltage	300 V	-	300 V
Rated current	10 A	-	10 A
Approvals per	CSA		
Use Group	B	C	D
Rated voltage	300 V	-	300 V
Rated current	8 A	-	-

Connection Data	
Connection technology	Push-in CAGE CLAMP®
Strip length	9 ... 10 mm / 0.35 ... 0.39 inch
Conductor entry angle to the PCB	45°
Solid conductor	0.2 ... 1.5 mm ² / 24 ... 16 AWG
Fine-stranded conductor	0.2 ... 1.5 mm ² / 24 ... 16 AWG
Fine-stranded conductor with ferrule with plastic collar	0.2 ... 1 mm ²
Fine-stranded conductor with ferrule without plastic collar	0.2 ... 1.5 mm ²

Material Data	
Material group	I
Insulating material	Polyamide 66 (PA 66)
Flammability class per UL94	V0
Clamping spring material	Chrome nickel spring steel (CrNi)
Contact material	Copper alloy
Contact plating	Tin-plated

Mechanical Data	
Solder pin arrangement	Over the entire terminal strip, in line
Solder pin length	3.5 mm
Solder pin dimensions	0.8 x 0.5 mm
Drilled hole diameter (tolerance)	1.1 ^(+0.1) mm

Environmental Requirements	
Limit temperature range	-60 ... +105 °C

Rated current	76 A	76 A	76 A
Approvals per	UL 1059		
Use Group	B	C	D
Rated voltage	600 V	600 V	-
Rated current	66 A	66 A	-

Connection Data

Connection technology	Push-in CAGE CLAMP®
Strip length	18 ... 20 mm / 0.71 ... 0.79 inch
Solid conductor	0.75 ... 16 mm ² / 18 ... 4 AWG
Fine-stranded conductor	0.75 ... 25 mm ² / 18 ... 4 AWG
Fine-stranded conductor with ferrule with plastic collar	0.75 ... 16 mm ²
Fine-stranded conductor with ferrule without plastic collar	0.75 ... 16 mm ²
Fine-stranded conductor, with twin ferrule	0.75 ... 6 mm ²

Material Data

Material group	I
Insulating material	Polyamide 66 (PA 66)
Flammability class per UL94	V0
Clamping spring material	Chrome nickel spring steel (CrNi)
Contact material	Electrolytic copper (Ecu)
Contact plating	Tin-plated

Mechanical Data

Solder pin arrangement	within the terminal block, in line
Solder pin length	4 mm
Solder pin dimensions	1.2 x 1 mm
Drilled hole diameter (tolerance)	1.7 ^(+0.1) mm

Environmental Requirements

Limit temperature range	-60 ... +105 °C

Push-in CAGE CLAMP® ▶ Actuation type: Operating tool ▶ 16 mm² ▶ Terminal strip ▶ Pin spacing: 10 mm (0.394 inch) ▶ Color: gray

1

- PCB terminal blocks with Push-in CAGE CLAMP® connection
- Push-in termination of solid and ferruled conductors
- Ideal for panel feedthrough applications via operation parallel to conductor entry
- Testing can be performed both parallel and perpendicular to conductor entry

250 Series Description and Installation

1

Labeling via self-adhesive strips or direct marking. Mixed-color terminal strips (with or without spacer) are available upon request.

Space-saving wiring, 250 Series – 5 mm pin spacing.

Inserting solid conductors via push-in termination.
Inserting fine-stranded conductors via push-buttons,
250 Series – 3.5 mm pin spacing.

250 Series

Space-saving wiring – push-in termination of solid conductors.

Testing with 11 mm Ø test pin, on the conductor,
250 Series – 2.5 ... 3.5 mm pin spacing.

Testing with 2 mm Ø test plug, touch contact,
250 Series – 5 mm pin spacing.

PCB Terminal Block ▶ 250 Series

Push-in CAGE CLAMP® ▶ Actuation type: Push-button ▶ 0.5 mm² ▶ Solder pin arrangement: Over the entire terminal strip, in line ▶ Pin spacing: 2.5 mm (0.098 inch) ▶ Color: gray

1

- Compact PCB terminal strips with push-buttons
- Push-in termination of solid conductors
- Termination/removal of fine-stranded conductors via push-buttons
- 45° conductor entry angle provides easy, space-saving wiring
- Custom color combinations
- Terminal strips also available with spacers upon request

Electrical Data

Pin spacing	2.5 mm (0.098 inch)		
Ratings per	IEC/EN 60664-1		
Overvoltage category	III	III	II
Pollution degree	3	2	2
Rated voltage	100 V	160 V	320 V

Double-Deck PCB Terminal Block ▶ 250 Series

Push-in CAGE CLAMP® ▶ Actuation type: Push-button ▶ 1.5 mm² ▶ Solder pin arrangement: Over the entire terminal strip, in line ▶ Pin spacing: 5 mm (0.197 inch) ▶ Color: gray

1

- Space-saving, double-Deck terminal strips with push-buttons
- Push-in termination of solid and ferruled conductors
- Termination/removal of fine-stranded conductors via push-buttons
- 45° conductor entry angle provides easy, space-saving wiring

Electrical Data

235 Series Description and Installation

1

Combining terminal blocks with different housing colors and pin spacing.

Inserting solid conductors via push-in termination.

Inserting/removing fine-stranded conductors via push-button.

Inserting/removing fine-stranded conductors with ferrules via push-button.

235 Series

Combining 1- and 2-conductor terminal blocks with different pin spacing 2-conductor terminal blocks, see www.wago.com

Application example: field-wiring terminal strip

PCB Terminal Block ▶ 235 Series

Push-in CAGE CLAMP® ▶ Actuation type: Push-button ▶ 1.5 mm² ▶ Modular terminal block

1

- Modular PCB terminal blocks with push-buttons for custom terminal strip assemblies
- Push-in terminations of solid and ferruled conductors
- Convenient termination/removal of fine-stranded conductors via push-buttons
- Set to metric or inch pin spacing by compressing terminal strips or pulling them apart

**Electrical Data**

805 Series

Description and Installation

1

Testing with 2 mm Ø test plug.

Terminating solid conductors by simply pushing them in. Removing conductors and inserting fine-stranded conductors via push-buttons.

Mixed-color terminal strips are available upon request.

Terminal strips with spacers and enlarged conductor entry (5 mm pin spacing) are available upon request.

WAGO's 805 Series Terminal Strips provide "internal commoning" to meet requirements that ban routing the ground conductor over the board. This enables custom terminal strips to be commoned and marked at the factory upon request.

805 Series

804 Series

Description and Installation

1

Terminating solid conductors: Simply push in stripped conductor until it hits backstop.

Inserting/removing fine-stranded conductors: Open the clamping unit via push-button and insert stripped conductor until it hits backstop.

Testing with 1 mm Ø test pin – manual touch contact.

804 Series

WAGO's 804 Series Terminal Strips provide "internal commoning" to meet requirements that ban routing the ground conductor over the board. This enables custom terminal strips to be commoned and marked at the factory upon request.

Mixed-color terminal strips are available upon request.

Terminal strips with spacer are available upon request.

Labeling via self-adhesive marking strips or factory direct marking.

PCB Terminal Block ▶ 805 Series

Push-in CAGE CLAMP® ▶ Actuation type: Push-button ▶ 1.5 mm² ▶ Solder pin arrangement: Over the entire terminal strip, in line ▶ Pin spacing: 3.5 mm (0.138 inch) ▶ Color: gray

1

- PCB terminal strips with push-buttons and Push-in CAGE CLAMP® connection
- Push-in termination of solid and ferruled conductors
- Flush-mount push-buttons that close with minimal force for convenient termination/removal of fine-stranded conductors
- Convenient, tool-free operation
- Versions with/without test slots and spacers
- Versions available with custom internal commoning (factory assembly), e.g., commoning ground conductor

Rated impulse voltage	2.5 kV	2.5 kV	2.5 kV
Rated current	17.5 A	17.5 A	17.5 A

Connection Data

Connection technology	Push-in CAGE CLAMP®
Strip length	9 ... 10 mm / 0.35 ... 0.39 inch
Conductor entry angle to the PCB	0°
Solid conductor	0.2 ... 1.5 mm ² / 24 ... 16 AWG
Fine-stranded conductor	0.2 ... 1.5 mm ² / 24 ... 16 AWG
Fine-stranded conductor with ferrule with plastic collar	0.25 ... 1 mm ²
Fine-stranded conductor with ferrule without plastic collar	0.25 ... 1 mm ²

Material Data

Material group	I
Insulating material	Polyamide 66 (PA 66)
Flammability class per UL94	V0
Clamping spring material	Chrome nickel spring steel (CrNi)
Contact material	Electrolytic copper (Ecu)
Contact plating	Tin-plated

Mechanical Data

Solder pin arrangement	Over the entire terminal strip, in line
Solder pin length	3.2 mm
Solder pin dimensions	0.5 x 0.75 mm
Drilled hole diameter (tolerance)	1.1 ^(+0.1) mm

Environmental Requirements

Limit temperature range	-60 ... +105 °C

PCB Terminal Block ▶ 805 Series

Push-in CAGE CLAMP® ▶ Actuation type: Push-button ▶ 1.5 mm² ▶ Solder pin arrangement: Over the entire terminal strip, staggered ▶ Pin spacing: 3.5 mm (0.138 inch) ▶ Color: gray

1

- PCB terminal strips with push-buttons and Push-in CAGE CLAMP® connection
- Push-in termination of solid and ferruled conductors
- Flush-mount push-buttons that close with minimal force for convenient termination/removal of fine-stranded conductors
- Convenient, tool-free operation
- Versions with/without test slots and spacers
- Versions available with custom internal commoning (factory assembly), e.g., commoning ground conductor

PCB Terminal Block ▶ 2606 Series

Push-in CAGE CLAMP® ▶ Actuation type: Lever ▶ 10 mm² ▶ Modular Terminal Block ▶ Pin spacing: 7.5 mm (0.295 inch) ▶ Color: gray

1

- PCB terminal blocks with lever-actuated Push-in CAGE CLAMP® connection
- Push-in termination of solid and ferruled conductors
- Intuitive and tool-free operation
- Several clamping units can be held open simultaneously – convenient for terminating multi-core cables
- Testing can be performed both parallel and perpendicular to conductor entry

Electrical Data

Pin spacing	7.5 mm (0.295 inch)		
Ratings per	IEC/EN 60664-1		
Overvoltage category	III	III	II
Pollution degree	3	2	2
Rated voltage	800 V	1000 V	1000 V
Rated impulse voltage	8 kV	8 kV	8 kV
Rated current	41 A	41 A	41 A
Approvals per	UL 1059		
Use Group	B	C	D
Rated voltage	600 V	600 V	-
Rated current	31 A	31 A	-

Connection Data

Connection technology	Push-in CAGE CLAMP®
Strip length	11 ... 13 mm / 0.43 ... 0.51 inch
Solid conductor	0.2 ... 10 mm ² / 24 ... 8 AWG
Fine-stranded conductor	0.2 ... 10 mm ² / 24 ... 8 AWG
Fine-stranded conductor with ferrule with plastic collar	0.25 ... 6 mm ²
Fine-stranded conductor with ferrule without plastic collar	0.25 ... 6 mm ²
Fine-stranded conductor, with twin ferrule	0.25 ... 2.5 mm ²

Material Data

Material group	I
Insulating material	Polyamide 66 (PA 66)
Flammability class per UL94	V0
Clamping spring material	Chrome nickel spring steel (CrNi)
Contact material	Electrolytic copper (Ecu)
Contact plating	Tin-plated

Mechanical Data

Solder pin arrangement	within the terminal block, in line
Solder pin length	4 mm
Solder pin dimensions	1.5 x 1.2 mm
Drilled hole diameter (tolerance)	2 ^(+0.1) mm

Environmental Requirements

Limit temperature range	-60 ... +105 °C

PCB Terminal Block ▶ 251 Series

PUSH WIRE® ▶ IDC connection ▶ Actuation type: Operating tool ▶ 1 mm² ▶ Pin spacing: 3.5 mm (0.138 inch) ▶ Color: white

Conductor termination:
 PUSH WIRE®: Simply push in conductor.
 IDC: Push in conductor via 206-831 Operating Tool.

Pole No.	Item No.	PU (SPU)
3	251-303	420 (105)
4	251-304	320 (80)
6	251-306	200 (50)
7	251-307	180 (45)
8	251-308	160 (40)
10	251-310	120 (30)

Conductor removal:
 PUSH WIRE®: Twist conductor and pull out, or fully insert 206-830 Disconnection Tool over the conductor (1) and pull it out (2).

IDC: Pull up vertically on conductor to remove it (10x re-connection cycles possible when used properly – before re-using, cut off old contact point from conductor).

$L = (\text{pole no.} \times \text{pin spacing}) + 0.9 \text{ mm}$
 Starting point is first solder pin, front right (red circle)

PU = Packaging Unit; SPU = Subpackaging Unit; Dimensions in mm

254 Series

Description and Installation

1

Inserting a solid conductor via push-in termination.

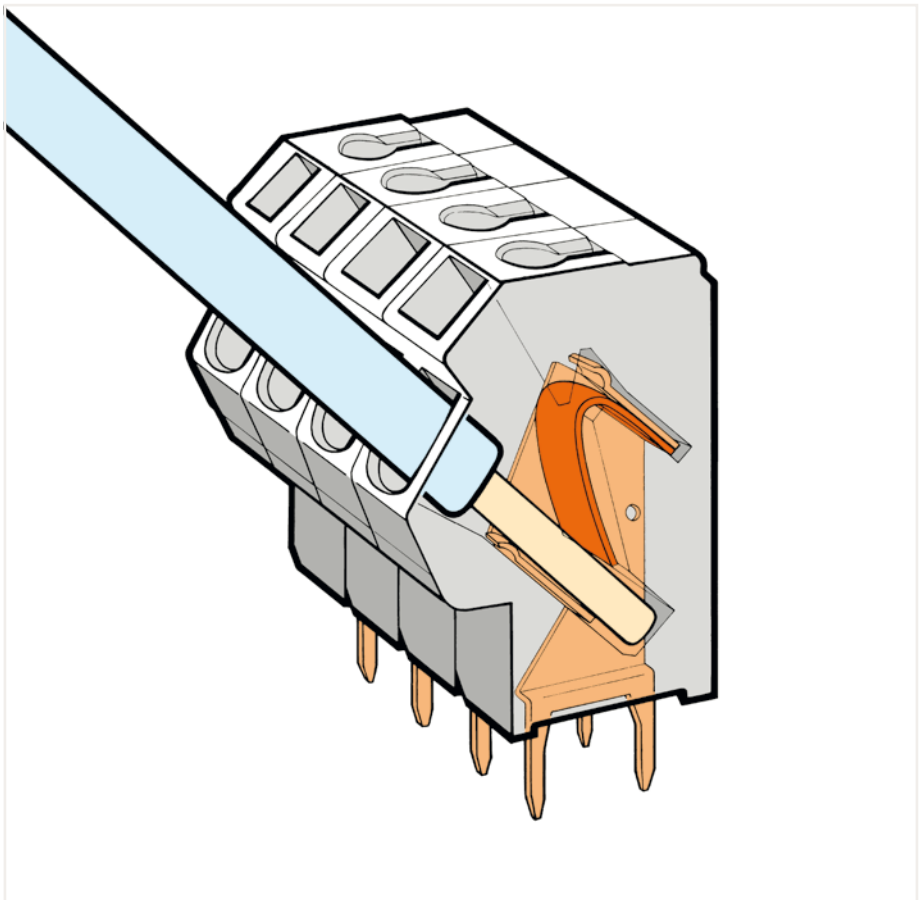

Inserting a tip-bonded conductor via screwdriver.

Labeling via self-adhesive marking strips.

Labeling via factory direct marking.

Application example: field-wiring terminal strip

Mixed terminal strips can be assembled using different housing colors for the formation of groups.

254 Series Description and Installation

Removing a conductor.

Inserting/removing a ferruled conductor.

Testing with 2 mm Ø test plug.

Mixed terminal strips can be assembled using different pin spacing and housing colors for the formation of groups.

PCB Terminal Block ▶ 254 Series

PUSH WIRE® ▶ Actuation type: Operating tool ▶ Modular Terminal Block ▶ 2.5 mm²

1

- Modular PCB terminal blocks with PUSH WIRE® connection and screwdriver actuation for custom terminal strip assemblies
- Push-in termination of solid and ferruled conductors
- Test socket for 2 mm Ø test plug
- Save space on the PCB, just 8.9 mm deep
- Also available with 2-conductor connection

PCB Terminal Block ▶ 744 Series

PUSH WIRE® ▶ Actuation type: Operating tool ▶ Terminal strip ▶ 1.5 mm² ▶ Pin spacing: 3.5 mm (0.138 inch) ▶ Color: white

1

- PCB terminal blocks with PUSH WIRE® connection
- Push-in termination of solid conductors – low insertion forces
- Just 6.6 mm tall
- Conductor removal via disconnection tool or by twist and pull

Electrical Data			
Pin spacing	3.5 mm (0.138 inch)		
Ratings per	IEC/EN 60664-1		
Overvoltage category	III	III	II
Pollution degree	3	2	2
Rated voltage	250 V	320 V	630 V
Rated impulse voltage	4 kV	4 kV	4 kV
Rated current	2 A	2 A	2 A
Approvals per	UL 1059		
Use Group	B	C	D
Rated voltage	300 V	-	300 V
Rated current	6 A	-	6 A
Connection Data			
Connection technology	PUSH WIRE®		
Strip length	8 ... 9 mm / 0.31 ... 0.35 inch		
Conductor entry angle to the PCB	0°		
Solid conductor	0.5 ... 1.5 mm ² / 20 ... 16 AWG		
Material Data			
Material group	I		
Insulating material	Polyamide 66 (PA 66)		
Flammability class per UL94	V0		
Contact material	Copper alloy		
Contact plating	Tin-plated		
Mechanical Data			
Solder pin arrangement	Over the entire terminal strip, staggered		
Solder pin dimensions	0.35 x 0.9 mm		
Drilled hole diameter (tolerance)	1.1 ^(±0.1) mm		
Environmental Requirements			
Limit temperature range	-60 ... +105 °C

742 Series

Description and Installation

1

Testing all PCB disconnect terminal blocks via 2 mm or 2.3 mm Ø test plugs.

Opening a knife disconnect.

Distributing potentials via 3-conductor terminal blocks.

Testing all PCB fuse terminal blocks via 2 mm or 2.3 mm Ø test plugs.

742 Series Description and Installation

Testing all PCB terminal blocks via 2 mm or 2.3 mm Ø test plugs.

Disconnect terminal blocks with removable knife disconnect are available upon request.

Mixed-color terminal strips are available upon request.

Mixed-color knife disconnect/test terminal strips are available upon request.

Commoning with adjacent jumpers – push jumpers down until fully inserted.

Inserting a fuse.

Custom PCB terminal strips are available upon request.

Modular PCB Terminal Block ▶ 742 Series

Disconnect/test block ▶ CAGE CLAMP® ▶ Actuation type: Operating tool ▶ 2.5 mm² ▶ Pin spacing: 5 mm (0.197 inch) ▶ Color: gray

1

- Modular PCB terminal blocks with screwdriver-actuated CAGE CLAMP®
- Power circuit disconnection via knife disconnect, e.g., for regular testing and measuring
- Test sockets on both sides of knife disconnect for 2.0 mm or 2.3 mm Ø test plugs
- 2- and 3-conductor PCB terminal blocks for distributing potentials independently of PCB
- Versions with removable knife disconnects available upon request

Commoning Strips for PCB Terminal Strips 236, 255, 256, 257, 736, 737 and 738 Series

1

Horizontal commoning:

Connect adjacent potentials, e.g., as:

- "-" strip in connection modules for actuators with higher switching power
- Ground commoning strip for applications where the ground conductor shall not be looped over PCB tracks (max. short-time withstand current: 70 A/mm² for one second – observe the normative requirements of the end application!)

Note: Interruption of horizontal commoning reduces spacing to the adjacent solder pins.

Vertical commoning (only for 736 and 737 Series

starting from 7.5 mm/0.295 inch pin spacing):

Connect the (in-line) solder pins of a PCB terminal block to one potential, e.g., as:

- 3-conductor supply and distribution PCB terminal block (up to 10 A)
- Intelligent circuit modifications without changing the track layout are also possible.

WAGO's commoning strips allow PCB terminal strips to be commoned to suit customer requirements. Due to the many combination possibilities, the commoning strips can only be fitted onto the solder pins at the factory. Please refer to the order form on pages 1.70 and 1.71.

Furthermore, these commoning strips allow terminal blocks of a same potential to be created.

Commoning strips are available for the following pin spacing:

- 5 mm, 5.08 mm (up to 20 poles)
- 7.5 mm, 7.62 mm (up to 16 poles)
- 10 mm, 10.16 mm (up to 12 poles)

A spacer provides height compensation for the solder pins that are not commoned.

Technical Information on "Commoned PCB Terminal Strips"

Use of commoning strips must account for both the specific conditions of the planned application, as well as relevant standards for the normal operating conditions in which operational failures (can) occur.

Horizontal commoning (236, 255, 256, 257, 736, 737, 738 Series)

- Pin spacing combination is only possible with 5 mm, 5.08 mm, 10 mm and 10.16 mm.
- In-line or staggered arrangement of solder pins (736, 737, 738 Series).
- 236 Series: Versions with only one solder pin cannot be commoned.
- In case of different potentials within one level, ensure that at least one interim terminal block must remain uncommoned in order to maintain the necessary creepage distances and clearances (see also the ordering example).

Distances to adjacent potentials

Recommendation: $T_{min} = 5 \text{ mm}$

Please note that the distance between the commoning strips and adjacent potentials must comply with requirements for the end application as specified in the relevant standard.

Vertical commoning (only possible with 736/737 Series Multilevel PCB Terminal Blocks)

Pin spacing:	Creepage distance (in mm):	Clearance (in mm):	Voltage:
7.5 mm, 7.62 mm	1.7	1.7	80 V/2.5 kV/3 (III)
	1.7	1.7	160 V/2.5 kV/2 (III)
			320 V/2.5 kV/2 (II)
10 mm, 10.16 mm	4.2	4.2	320 V/4 kV/3 (III)
	4.2	4.2	320 V/4 kV/2 (III)
			630 V/4 kV/2 (II)

- Not possible with 5 mm and 5.08 mm pin spacing
- Solder pins always arranged in line

Assembling a multipole test plug adapter.

Inserting a 6-pole test plug adapter into a terminal strip.

Testing a wired PCB terminal strip.

Adapters with snap-in mounting foot cut off assembled on both ends (7 to 9 poles)

Adapters with snap-in mounting foot cut off in center position (10 to 15 poles)

For lengths longer than 7 poles, the snap-in mounting foot with retaining clip should be cut off (see example below).

Adapters A:
Snap-in mounting foot with retaining clip cut off

Adapters B:
Standard version

9-pole test plug adapter with cut-off snap-in mounting feet and retaining clips on both ends

THR (Through-Hole Reflow) Soldering Process

2

By using high-temperature-resistant plastic and a streamlined pin design, WAGO's THR male headers and PCB terminal blocks meet requirements for SMT process capability while maintaining the necessary stability. Both headers and terminal blocks are simply pushed into the solder paste-filled PCB holes and then soldered along with the SMT components via reflow soldering. The previous wave soldering process is no longer necessary. The result is a perfect connection – both mechanically and electrically.

Terminal strips with an additional suction pad in tape-and-reel packaging per IEC 60286-3 WAGO recommends both a temperature profile that adheres to EN 61760-1 and the use of forced convection ovens for processing THR components.

Metal-plated PCB bore hole

Series	d _i (mm)	d _A (mm)	H (mm)	d _s (mm)	D _s (μm)	d (mm)	L (mm)
218	1.1 ^{+0.1}	1.9	< 2	1.8	150	0.9	2.8

Approvals per	UL 1977		
Rated voltage	600 V		
Rated current	9 A		

Connection Data	
Connection technology	Push-in CAGE CLAMP®
Strip length	6 ... 7 mm / 0.24 ... 0.28 inch
Conductor entry angle to the PCB	0°
Solid conductor	0.2 ... 0.75 mm ² / 24 ... 18 AWG
Fine-stranded conductor	0.2 ... 0.75 mm ² / 24 ... 18 AWG
Fine-stranded conductor with ferrule with plastic collar	0.25 ... 0.34 mm ²
Fine-stranded conductor with ferrule without plastic collar	0.25 ... 0.34 mm ²

Material Data	
Material group	I
Insulating material	Polyphthalamide (PPA GF)
Flammability class per UL94	V0
Contact material	Copper alloy
Contact plating	Tin-plated

Mechanical Data	
Solder pin arrangement	within the terminal block, in line
Solder pin length	2.4 mm
Solder pin dimensions	1.2 x 0.75 mm
Plated through-hole diameter (THR)	1.5 ^(+0.1) mm
Reel diameter of tape-and-reel packaging	330 mm

Environmental Requirements	
Limit temperature range	-60 ... +105 °C

Application note:

Suitable for lead-free, reflow-soldering profiles per DIN EN 61760-1 and IEC 60068-2-58 up to max. 260 °C peak temperature. Due to customer-specific variables (e.g., component configuration and orientation, type of soldering machine, solder paste), trial runs are recommended to ensure product and process compatibility under actual manufacturing conditions.

Recommendation for stencil:

150 µm material thickness The stencil hole diameter is identical to the outer diameter of the metal-plated PCB hole.

Solder pin dimensions	1.2 x 0.35 mm
Plated through-hole diameter (THR)	1.5 ^(+0.1) mm
Reel diameter of tape-and-reel packaging	330 mm

Environmental Requirements	
Limit temperature range	-60 ... +105 °C

Application note:

Suitable for lead-free, reflow-soldering profiles per DIN EN 61760-1 and IEC 60068-2-58 up to max. 260 °C peak temperature. Due to customer-specific variables (e.g., component configuration and orientation, type of soldering machine, solder paste), trial runs are recommended to ensure product and process compatibility under actual manufacturing conditions.

Recommendation for stencil:

150 µm material thickness The stencil hole diameter is identical to the outer diameter of the metal-plated PCB hole.

THR PCB Terminal Block ▶ 2061 Series

Push-in CAGE CLAMP® ▶ Actuation type: Push-button ▶ 1.5 mm² ▶ Pin spacing: 6 mm (0.24 inch) ▶ Solder pin length: 1.5 mm

- THR PCB terminal blocks with push-buttons and Push-in CAGE CLAMP® connection
- Push-in termination of solid and ferruled conductors
- Push-buttons simplify insertion/removal of all conductor types
- Just 5.6 mm tall
- Available in tape-and-reel packaging for automated assembly
- Also suitable for wave soldering
- Assemble terminal blocks without pole loss

218 Series Description and Installation

2

Terminating stranded conductors in confined spaces requires a great deal of patience, unless you use the new 218 Series PCB Terminal Strips. The clamping units of these strips can be held open during termination process via integrated locking slide.

Terminating 0.75 mm² (18 AWG) conductors is possible; however, insulation diameter allows only every other clamping unit to be terminated with this conductor size.

Testing directly on the clamping spring.

Incorrect – do not operate the locking slides from the back.

Conductor termination: To momentarily open the clamping unit, use screwdriver and then insert a stripped conductor. To open clamping unit for an extended period, move locking slide toward conductor entry hole. Then fully insert stripped conductor and move locking slide back to original position (also possible to perform with fingernail).

218 Series

236 and 250 Series Description and Installation

Inserting a conductor via 3.5 mm screwdriver.
Screwdriver actuation parallel to conductor entry.

Inserting a conductor via 3.5 mm screwdriver.
Screwdriver actuation perpendicular to conductor entry.

Inserting a conductor via operating tool.

Inserting solid conductors via push-in termination.
Inserting fine-stranded conductors via push-buttons,
250 Series – 3.5 mm pin spacing.

Testing with 11 mm Ø test pin, on the conductor,
250 Series – 2.5 ... 3.5 mm pin spacing.

THR PCB Terminal Block ▶ 250 Series

Push-in CAGE CLAMP® ▶ Actuation type: Push-button ▶ Terminal strip ▶ 0.5 mm² ▶ Pin spacing: 2.5 mm (0.098 inch) ▶ Color: black

- Cost-effective integration of high-temperature resistant THR terminal strips into SMT reflow soldering processes
- Push-in termination of solid and ferruled conductors
- Termination/removal of fine-stranded conductors via push-buttons
- 45° conductor entry angle provides easy, space-saving wiring

Connection Data	
Connection technology	CAGE CLAMP®
Strip length	5 ... 6 mm / 0.2 ... 0.24 inch
Conductor entry angle to the PCB	45°
Solid conductor	0.08 ... 2.5 mm ² / 28 ... 12 AWG
Fine-stranded conductor	0.08 ... 2.5 mm ² / 28 ... 12 AWG
Fine-stranded conductor with ferrule with plastic collar	0.25 ... 1.5 mm ²
Fine-stranded conductor with ferrule without plastic collar	0.25 ... 1.5 mm ²
Note (conductor cross-section)	12 AWG: THHN, THWN

Material Data	
Material group	III a
Insulating material	Polyamide 46 (PA 46)
Flammability class per UL94	V2
Clamping spring material	Chrome nickel spring steel (CrNi)
Contact material	Electrolytic copper (Ecu)
Contact plating	Tin-plated

Mechanical Data	
Solder pin arrangement	Over the entire terminal strip, in line
Solder pin length	3.6 mm
Solder pin dimensions	0.7 x 0.7 mm
Plated through-hole diameter (THR)	1.1 (+0.1) mm
Reel diameter of tape-and-reel packaging	330 mm

Environmental Requirements	
Limit temperature range	-60 ... +115 °C

- Direct marking

THR PCB Terminal Block ▶ 218 Series

CAGE CLAMP® ▶ Actuation type: Locking slide ▶ 0.5 mm² ▶ Terminal strip ▶ Color: black

- Terminal strips are just 8.1mm high and feature an innovative, locking slide-actuated CAGE CLAMP®
- Several clamping units can be held open simultaneously
- Easy termination of stranded conductors in tight spaces (e.g., bus connectors)

Electrical Data

Pin spacing	2.5 mm (0.098 inch) / 2.54 mm (0.1 inch)		
Ratings per	IEC/EN 60664-1		
Overvoltage category	III	III	II
Pollution degree	3	2	2
Rated voltage	32 V	160 V	320 V
Rated impulse voltage	2.5 kV	2.5 kV	2.5 kV
Rated current	6 A	6 A	6 A

Connection Data

Connection technology	CAGE CLAMP®
Strip length	5 ... 6 mm / 0.2 ... 0.24 inch
Conductor entry angle to the PCB	40°
Solid conductor	0.08 ... 0.5 mm ² / 28 ... 20 AWG
Fine-stranded conductor	0.08 ... 0.5 mm ² / 28 ... 20 AWG
Fine-stranded conductor with ferrule with plastic collar	0.25 mm ²
Fine-stranded conductor with ferrule without plastic collar	0.25 mm ²
Note (conductor cross-section)	Terminating 0.75 mm ² /18 AWG conductors is possible; however insulation diameter allows only every other clamping unit to be terminated with this conductor size.

SMD PCB Terminal Block ▶ 2059 Series

PUSH WIRE® ▶ Pin spacing: 3 mm (0.118 inch) ▶ Actuation type: Operating tool ▶ 0.34 mm²

- SMD PCB terminal blocks with PUSH WIRE® connection technology
- Push-in termination of solid conductors
- Easy conductor removal, e.g., via operating tool
- Just 2.7 mm tall
- Assemble terminal blocks without pole loss
- Available in tape-and-reel packaging for automated assembly

Electrical Data			
Pin spacing	3 mm (0.118 inch)		
Ratings per	IEC/EN 60664-1		
Overvoltage category	III	III	II
Pollution degree	3	2	2
Rated voltage	63 V	160 V	320 V
Rated impulse voltage	2.5 kV	2.5 kV	2.5 kV
Rated current	3 A	3 A	3 A
Approvals per	UL 1977		
Rated voltage	600 V		
Rated current	3 A		

Connection Data	
Connection technology	PUSH WIRE®
Strip length	4 ... 5.5 mm / 0.16 ... 0.22 inch
Conductor entry angle to the PCB	0°
Solid conductor	0.14 ... 0.34 mm ² / 26 ... 22 AWG
Note (conductor cross-section)	For conductors that are not rigid enough, the clamping unit must be opened using an operating tool. No reconnection of smaller conductor cross-sections (0.5 mm ² / 20 AWG)
Strip length (2)	6 ... 7.5 mm / 0.24 ... 0.3 inch
Solid conductor (2)	0.5 mm ² / 20 AWG
Note (conductor cross-section) 2	No reconnection of smaller conductor cross-sections (0.5 mm ² / 20 AWG)

Material Data	
Material group	I
Insulating material	Polyphthalamide (PPA GF)
Flammability class per UL94	V0
Contact material	Copper alloy
Contact plating	Tin-plated

Mechanical Data	
Reel diameter of tape-and-reel packaging	330 mm

Environmental Requirements	
Limit temperature range	-60 ... +105 °C

Application note:

Suitable for lead-free, reflow-soldering profiles per DIN EN 61760-1 and IEC 60068-2-58 up to max. 260 °C peak temperature. Due to customer-specific variables (e.g., component configuration and orientation, type of soldering machine, solder paste), trial runs are recommended to ensure product and process compatibility under actual manufacturing conditions.

Recommendation for SMD stencil:

Material thickness, 150 µm. Pattern layout identical to solder pad layout.

Rated current	9 A	9 A	9 A
Approvals per	UL 1977		
Rated voltage	600 V		
Rated current	9 A		

Connection Data

Connection technology	Push-in CAGE CLAMP®
Strip length	7 ... 9 mm / 0.28 ... 0.35 inch
Conductor entry angle to the PCB	0°
Solid conductor	0.2 ... 0.75 mm ² / 24 ... 18 AWG
Fine-stranded conductor	0.2 ... 0.75 mm ² / 24 ... 18 AWG
Fine-stranded conductor with ferrule with plastic collar	0.25 ... 0.34 mm ²
Fine-stranded conductor with ferrule without plastic collar	0.25 ... 0.34 mm ²

Material Data

Material group	I
Insulating material	Polyphthalamide (PPA GF)
Flammability class per UL94	V0
Contact material	Copper alloy
Contact plating	Tin-plated

Mechanical Data

Reel diameter of tape-and-reel packaging	330 mm
--	--------

Environmental Requirements

Limit temperature range	-60 ... +105 °C
-------------------------	-----------------

Application note:

Suitable for lead-free, reflow-soldering profiles per DIN EN 61760-1 and IEC 60068-2-58 up to max. 260 °C peak temperature. Due to customer-specific variables (e.g., component configuration and orientation, type of soldering machine, solder paste), trial runs are recommended to ensure product and process compatibility under actual manufacturing conditions.

Recommendation for SMD stencil:

Material thickness, 150 µm. Pattern layout identical to solder pad layout.

MCS MICRO

Description and Installation

Male headers and female connectors are 100 % protected against mismatching. Only mating halves with the same pole number can be connected.

Coding a male header – fitting coding key(s).

Coding a female connector – removing coding finger(s).

4

Wire-to-wire connection of single conductors

Wire-to-wire connection of multi-core cables
Plug-in connection using strain relief plates and locking levers

THR male headers for reflow soldering in SMT applications

Tape-and-reel packaging for THR male headers

Locking levers prevent accidental disconnection.

Locking levers prevent accidental disconnection.

MCS MICRO

Description and Installation

Inserting a conductor via (2.5 x 0.4) mm screwdriver. Operation is performed perpendicular to conductor entry.

Inserting a conductor via screwdriver (233-335) – CAGE CLAMP® actuation parallel to conductor entry.

Inserting a conductor via 233-331 Operating Tool. Operation is performed parallel to conductor entry.

Marking via self-adhesive strips or factory direct marking

Inserting a conductor via 210-251 Operating Tool.

Marking via self-adhesive strips or factory direct marking

Strain relief plates for factory or in-the-field assembly.

Testing via 1 mm Ø test pin (735-500) – touch contact.

4

1-Conductor Female Connector ▶ MCS MICRO ▶ 733 Series

Pin spacing: 2.5 mm (0.098 inch) ▶ Actuation type: Operating tool ▶ CAGE CLAMP® ▶ Color: light gray

- Universal connection for all conductor types
- Easy cable pre-assembly and on-unit wiring via vertical and horizontal CAGE CLAMP® actuation
- Strain relief plates for factory and in-the-field assembly
- 100 % protected against mismatching
- Coding via coding fingers

THR (Through-Hole Reflow) Soldering Process

By using high-temperature-resistant plastic and a streamlined pin design, WAGO's THR male headers and PCB terminal blocks meet requirements for SMT process capability while maintaining the necessary stability. Both headers and terminal blocks are simply pushed into the solder paste-filled PCB holes and then soldered along with the SMT components via reflow soldering. The previous wave soldering process is no longer necessary. The result is a perfect connection – both mechanically and electrically.

Terminal strips with an additional suction pad in tape-and-reel packaging per IEC 60286-3 WAGO recommends both a temperature profile that adheres to EN 61760-1 and the use of forced convection ovens for processing THR components.

Direct Marking MCS MICRO

4

The pole numbers of male and female connectors for CAGE CLAMP® termination can be marked via factory direct marking.

Two standard marking orientations are available:

1. Marking perpendicular to conductor entry
2. Marking parallel to conductor entry

Other customized marking options are available upon request.

Direct marking is not suitable for MCS PCB male headers. WAGO recommends pole marking on the PCB for these headers.

Direct marking of female connectors, perpendicular to conductor entry, 1 ... pole no., item no. suffix.: /... - 047

Version	Item No. Example
1-cond. female connector, 5-pole, light gray	733-105/000-047
1-cond. female connector, with locking levers, 5-pole, light gray	733-105/037-047
1-cond. female connector, with strain relief plate, 5-pole, light gray	733-105/033-047
1-cond. female connector, with locking levers and strain relief plate, 5-pole, light gray	733-105/037-047/033-000

Direct marking of male connectors, perpendicular to conductor entry, pole no. ... 1, item no. suffix.: /... - 044

Version	Item No. Example
1-cond. male connector, 5-pole, light gray	733-205/000-044
1-cond. male connector, with strain relief plate, 5-pole, light gray	733-205/033-044

Direct marking of female connectors, parallel to conductor entry, 1 ... pole no., item no. suffix.: /... - 9037

Version	Item No. Example
1-cond. female connector, 5-pole, light gray	733-105/000-9037
1-cond. female connector, with locking levers, 5-pole, light gray	733-105/037-9037
1-cond. female connector, with strain relief plate, 5-pole, light gray	733-105/033-9037
1-cond. female connector, with locking levers and strain relief plate, 5-pole, light gray	733-105/037-9037/033-000

Direct marking of male connectors, parallel to conductor entry, pole no. ... 1, item no. suffix.: /... - 9034

Version	Item No. Example
1-cond. male connector, 5-pole, light gray	733-205/000-9034
1-cond. male connector, with strain relief plate, 5-pole, light gray	733-205/033-9034

Operating Tools and Coding Keys

MCS MICRO

4

Operating lever for male and female connectors with CAGE CLAMP® connection; 2.5 mm pin spacing

Color	Item No.	PU (SPU)
○ natural	733-130	100 (25)
● yellow	733-191	100 (25)

Coding key for male headers

Color	Item No.	PU (SPU)
○ white	733-330	100
● lack*	733-331	100

*suitable for THR soldering

Inserting a conductor via operating lever.

Coding a male header via snap-on coding keys.

Strain Relief Plates MCS MICRO

Strain relief plate for in-the-field assembly

Strain relief plate; for factory assembly; 1-conductor female connector; 2.5 mm pin spacing; light gray; 2-pole, with strain relief plate (733-102/032-000)

Strain relief plate; for factory assembly; 1-conductor female connector; 2.5 mm pin spacing; light gray; 12-pole; with strain relief plate (733-112/034-000)

Strain relief plate, for in-the-field assembly; for male and female connectors with CAGE CLAMP® connection; light gray			
Pole No.	Width	Item No.	PU (SPU)
2 ... 4	6 mm	734-127	100 (25)
5 ... 9	12.5 mm	734-128	100 (25)
10 ... 12	25 mm	734-129	100 (25)

Strain relief plate; pre-assembled; for male and female connectors with CAGE CLAMP® connection; light gray			
Pole No.	Width	Item No. Suffix *	
2 ... 4	6 mm	... /032-000	
5 ... 9	12.5 mm	... /033-000	
10 ... 12	25 mm	... /034-000	

*An "item no. suffix," referring to the width of the strain relief plate, is added to the "basic item no." and determines the type of male or female connector.

The arrangement of the attachments for cable ties allows single conductors or multi-core cables to be secured in different ways. The width of the cable ties must correspond to the hole dimensions of the strain relief plates shown above.

Cable ties and binding tools are not offered by WAGO.

PU = Packaging Unit; SPU = Subpackaging Unit; Dimensions in mm

MCS MINI

Description and Installation

Coding a THT double-deck male header – lower level.

Coding a male header – fitting coding key(s).

Coding a female connector – removing coding finger(s).

5

Inserting a fine stranded conductor into Push-in CAGE CLAMP® unit via push-button.

Solid and ferruled conductors are terminated by simply pushing them into unit.

Pin spacing: 3.5 mm and 3.81 mm, Push-in CAGE CLAMP®

Testing via 1 mm Ø test pin (735-500). Push-in CAGE CLAMP® termination – parallel to conductor entry

Labeling via direct marking or self-adhesive strips.

Strain relief housing for 734 Series Male and Female Connectors with CAGE CLAMP® connection.

MCS MINI

Description and Installation

Inserting a conductor via (2.5 x 0.4) mm screwdriver – CAGE CLAMP® actuation perpendicular to conductor entry.

Inserting a conductor via (2.5 x 0.4) mm screwdriver – CAGE CLAMP® actuation parallel to conductor entry.

Inserting a conductor into CAGE CLAMP® unit via operating tool (210-251 or 210-250).

Pin spacing: 3.5 mm and 3.81 mm, CAGE CLAMP®

Inserting a conductor into CAGE CLAMP® unit via operating lever (734-191).

Testing via 1 mm Ø test pin (735-500) – CAGE CLAMP® connection – touch contact.

Easy-to-identify PCB inputs and outputs

Wire-to-wire connection of single conductors

Board-to-board connection – male header with straight solder pins and female header with angled solder pins

5

1-Conductor Female Connector ▶ MCS MINI ▶ 734 Series

Pin spacing: 3.5 mm (0.138 inch) ▶ Actuation type: Operating tool ▶ CAGE CLAMP® ▶ Color: light gray

- Universal connection for all conductor types
- Easy cable pre-assembly and on-unit wiring via vertical and horizontal CAGE CLAMP® actuation
- Strain relief plates and housings for field assembly
- 100 % protected against mismatching
- Coding via coding fingers

2-Conductor Combi Strip ▶ MCS MINI ▶ 734 Series

Pin spacing: 3.5 mm (0.138 inch) ▶ Actuation type: Operating tool ▶ CAGE CLAMP® ▶ Color: light gray

- Universal connection for all conductor types
- 2-conductor strips combine pin and socket connections
- Multiply potentials
- Strain relief plates for factory and field assembly
- Supply via pin-contact side
- Combi strips may be connected to multiply outputs
- 100 % protected against mismatching
- Coding via coding fingers

Connection Data

Connection technology	CAGE CLAMP®
Strip length	6 ... 7 mm / 0.24 ... 0.28 inch
Solid conductor	0.08 ... 1.5 mm ² / 28 ... 14 AWG
Fine-stranded conductor	0.08 ... 1.5 mm ² / 28 ... 14 AWG
Fine-stranded conductor with ferrule with plastic collar	0.25 ... 1.5 mm ²
Fine-stranded conductor with ferrule without plastic collar	0.25 ... 1.5 mm ²
Note (conductor cross-section)	Terminating 1.5 mm ² conductors is possible; however insulation diameter does not allow clamping units to be terminated in a row.

Material Data

Material group	I
Insulating material	Polyamide 66 (PA 66)
Flammability class per UL94	V0
Clamping spring material	Chrome nickel spring steel (CrNi)
Contact material	Copper alloy
Contact plating	Tin-plated

Environmental Requirements

Limit temperature range	-60 ... +100 °C
-------------------------	-----------------

The *MULTI CONNECTION SYSTEM (MCS)* is designed without breaking capacity for compliance with DIN EN 61984. When used as intended, MCS Connectors shall not be connected/disconnected when live or under load. The circuit design should ensure header pins, which can be touched, are not live when unmated.

- Gold-plated or partially gold-plated contact surfaces

THR (Through-Hole Reflow) Soldering Process

By using high-temperature-resistant plastic and a streamlined pin design, WAGO's THR male headers and PCB terminal blocks meet requirements for SMT process capability while maintaining the necessary stability. Both headers and terminal blocks are simply pushed into the solder paste-filled PCB holes and then soldered along with the SMT components via reflow soldering. The previous wave soldering process is no longer necessary. The result is a perfect connection – both mechanically and electrically.

Terminal strips with an additional suction pad in tape-and-reel packaging per IEC 60286-3 WAGO recommends both a temperature profile that adheres to EN 61760-1 and the use of forced convection ovens for processing THR components.

- Other pole numbers
- Gold-plated or partially gold-plated contact surfaces

1-Conductor Male Connector ▶ MCS MINI ▶ 734 Series

Pin spacing: 3.81 mm (0.15 inch) ▶ Actuation type: Operating tool ▶ CAGE CLAMP® ▶ Color: orange

- Universal connection for all conductor types
- Easy cable pre-assembly and on-unit wiring via vertical and horizontal CAGE CLAMP® actuation
- For wire-to-wire and board-to-wire connections
- Strain relief plates and housings for factory and field assembly
- 100 % protected against mismatching
- Coding via coding fingers

Electrical Data

Ratings per	IEC/EN 60664-1

Rated current	10 A	-	10 A

Connection Data

Connection technology	CAGE CLAMP®
Strip length	6 ... 7 mm / 0.24 ... 0.28 inch
Solid conductor	0.08 ... 1.5 mm ² / 28 ... 14 AWG
Fine-stranded conductor	0.08 ... 1.5 mm ² / 28 ... 14 AWG
Fine-stranded conductor with ferrule with plastic collar	0.25 ... 1.5 mm ²
Fine-stranded conductor with ferrule without plastic collar	0.25 ... 1.5 mm ²
Note (conductor cross-section)	Terminating 1.5 mm ² conductors is possible; however insulation diameter does not allow clamping units to be terminated in a row.

Material Data

Material group	I
Insulating material	Polyamide 66 (PA 66)
Flammability class per UL94	V0
Clamping spring material	Chrome nickel spring steel (CrNi)
Contact material	Electrolytic copper (Ecu)
Contact plating	Tin-plated

Environmental Requirements

Limit temperature range	-60 ... +100 °C
-------------------------	-----------------

The *MULTI CONNECTION SYSTEM (MCS)* is designed without breaking capacity for compliance with DIN EN 61984. When used as intended, MCS Connectors shall not be connected/disconnected when live or under load. The circuit design should ensure header pins, which can be touched, are not live when unmated.

10	56 mm	734-240/105-604/997-407	200
12	72 mm	734-242/105-604/997-408	200

5

$L = (\text{pole no.} - 1) \times \text{pin spacing} + 5.9 \text{ mm}$

$L = (\text{pole no.} - 1) \times \text{pin spacing} + 5.9 \text{ mm}$

W = Tape width
R = Feed direction

PU = Packaging Unit; SPU = Subpackaging Unit; Dimensions in mm

Other variants can be requested via the WAGO sales department or, if necessary, configured at <https://configurator.wago.com/>:

- Other pole numbers
- Other solder pin lengths
- Gold-plated or partially gold-plated contact surfaces

5

Direct Marking MCS MINI

The pole numbers of male and female connectors for CAGE CLAMP® termination can be marked via factory direct marking.

Two standard marking orientations are available:

1. Marking perpendicular to conductor entry
2. Marking parallel to conductor entry

Other custom marking options are available upon request.

Direct marking is not suitable for MCS PCB Male Headers. WAGO recommends pole marking on the PCB for these headers.

Female headers with solder pins are exposed to aggressive flux agents during wave soldering. Select direct marking procedures are available upon request for these items.

The marking type is always defined by the second 4-digit block of the item no. suffix for items with standard colors and materials.

Example: 734-106/... - xxxx

xxxx = Item no. suffix for direct marking

Direct marking of 1-conductor female connectors, perpendicular to conductor entry, 1 ... pole no., item no. suffix.: /... - 047

Version	Item No. Example
1-cond. female connector, 6-pole, light gray	734-106/000-047
1-cond. female connector, with locking levers, 6-pole, light gray	734-106/037-047
1-cond. female connector, with strain relief plate, 6-pole, light gray	734-106/033-047
1-cond. female connector, with locking levers and strain relief plate, 6-pole, light gray	734-106/037-047/033-000

Direct marking of 1-conductor male connectors, perpendicular to conductor entry, pole no. ... 1, item no. suffix.: /... - 044

Version	Item No. Example
1-cond. male connector, 6-pole, light gray	734-306/000-044
1-cond. male connector, with mounting flanges, 6-pole, light gray	734-306/019-044
1-cond. male connector, with mounting flanges and strain relief plate, 6-pole, light gray	734-306/019-044/033-000

Direct marking of 1-conductor female connectors, parallel to conductor entry, 1 ... pole no., item no. suffix.: /... - 9037

Version	Item No. Example
1-cond. female connector, 6-pole, light gray	734-106/000-9037
1-cond. female connector, with locking levers, 6-pole, light gray	734-106/037-9037
1-cond. female connector, with strain relief plate, 6-pole, light gray	734-106/033-9037
1-cond. female connector, with locking levers and strain relief plate, 6-pole, light gray	734-106/037-9037/033-000

Direct marking of 1-conductor male connectors, parallel to conductor entry, pole no. ... 1, item no. suffix.: /... - 9034

Version	Item No. Example
1-cond. male connector, 6-pole, light gray	734-306/000-9034
1-cond. male connector, with mounting flanges, 6-pole, light gray	734-306/019-9034
1-cond. male connector, with mounting flanges and strain relief plate, 6-pole, light gray	734-306/019-9034/033-000

Direct Marking MCS MINI

Direct marking of 1-conductor female connectors with push-buttons, perpendicular to conductor entry, 1 ... pole no., item no. suffix.: /... - 047

Version	Item No. Example
1-conductor female connector, with push-buttons, 6-pole, light gray	2734-106/000-047
1-conductor female connector, with push-buttons and locking levers, 6-pole, light gray	2734-106/037-047
1-conductor female connector, with push-buttons and strain relief plate, 6-pole, light gray	2734-106/033-047
1-conductor female connector, with push-buttons, locking levers and strain relief plate, 6-pole, light gray	2734-106/037-047/ 033-0000

Direct marking of 2-conductor combi strips, perpendicular to conductor entry, 1 ... pole no., item no. suffix.: /... - 047

Version	Item No. Example
2-conductor combi strip, 6-pole, light gray	734-366/000-047
2-conductor combi strip, with locking levers, 6-pole, light gray	734-366/037-047
2-conductor combi strip, with locking levers and strain relief plate, 6-pole, light gray	734-366/037-047/033-000

Direct marking of 1-conductor female connectors with push-buttons, parallel to conductor entry, 1 ... pole no., item no. suffix.: /... - 9037

Version	Item No. Example
1-conductor female connector, with push-buttons, 6-pole, light gray	2734-106/000-9037
1-conductor female connector, with push-buttons and locking levers, 6-pole, light gray	2734-106/037-9037
1-conductor female connector, with push-buttons and strain relief plate, 6-pole, light gray	2734-106/033-9037
1-conductor female connector, with push-buttons, locking levers and strain relief plate, 6-pole, light gray	2734-106/037-9037/ 033-000

Direct marking of 2-conductor combi strips, parallel to conductor entry, 1 ... pole no., item no. suffix.: /... - 9037

Version	Item No. Example
2-conductor combi strip, 6-pole, light gray	734-366/000-9037
2-conductor combi strip, with locking levers, 6-pole, light gray	734-366/037-9037
2-conductor combi strip, with locking levers and strain relief plate, 6-pole, light gray	734-366/037-9037/033-000

Inserting a conductor via operating lever.

Conductor termination parallel to CAGE CLAMP® actuation

Conductor termination perpendicular to CAGE CLAMP® actuation

Insulation Stop and Finger Guard MCS MINI

Insulation stop, for conductor cross-sections from 0.08 ... 0.2 mm² "s" (0.14 mm² "f-st")
8 pcs/strip, 3.5 mm pin spacing

Color	Item No.	PU (SPU)
○ white	734-671	200 (25)

Finger guard, for THT male headers, 4-pole, 3.5/8.81 mm pin spacing

Color	Item No.	PU (SPU)
● black	734-420	100 (25)

Conductors with small cross-sections are highly flexible, and they deform when pushed against the conductor stop in connectors. As a result, the conductor insulation – not the copper conductor – may be clamped, causing intermittent contact or no contact at all.
The solution: an insulation stop for CAGE CLAMP®-equipped 734 Series Male and Female Connectors.

Finger guards provide touch-proof protection (IP20).

Insert the finger guard into the male header to be protected.

Cut finger guard to the required number of poles. Do not use single-pole covers!

PU = Packaging Unit; SPU = Subpackaging Unit; Dimensions in mm

Coding Keys MCS MINI

Coding key; for male headers;
3.5/3.81 mm pin spacing

Color	Item No.	PU
○ white	734-130	100
● black*	734-159	100

Coding key; for double-deck THT male headers;
to be snapped in bottom level; 3.5/3.81 mm pin spacing

MCS MINI HD

Description and Installation

Centered strain relief plate anchors conductors for easy disconnection.

Inserting a conductor via (2.5 x 0.4) mm screwdriver.

Lever as a lock – when closed, female connector is locked.

Pin spacing: 3.5 mm

Lever as a disconnection aid – when opened, female connector is disconnected. Rotating the lever lifts the female connector out of the male header.

Screw interlock can only be disconnected using a tool.

Pole marking via self-adhesive strips or direct marking.

Coding a male header by inserting a coding pin.

Coding a female connector by removing coding finger(s).

6

2-Conductor Female Connector ▶ MCS MINI HD ▶ 713 Series

Pin spacing: 3.5 mm (0.138 inch) ▶ Actuation type: Operating tool ▶ CAGE CLAMP® ▶ Color: black

- Universal connection for all conductor types
- Unique, compact, double-row connector system for conductor cross-sections up to 1.5 mm²
- High-density, wire-to-board connections in very confined spaces
- Centered strain relief plate anchors conductors, while acting as convenient connection and disconnection handle. It also provides easy access to operating slots – even when wired
- Optional dual-purpose lever doubles as a lock and disconnection aid, while preventing accidental disconnection in closed position
- Coding fingers provide 100 % protection against mismatching

Environmental Requirements

Limit temperature range	-60 ... +100 °C
-------------------------	-----------------

The *MULTI CONNECTION SYSTEM (MCS)* is designed without breaking capacity for compliance with DIN EN 61984. When used as intended, MCS Connectors shall not be connected/disconnected when live or under load. The circuit design should ensure header pins, which can be touched, are not live when unmated.

THR (Through-Hole Reflow) Soldering Process

By using high-temperature-resistant plastic and a streamlined pin design, WAGO's THR male headers and PCB terminal blocks meet requirements for SMT process capability while maintaining the necessary stability. Both headers and terminal blocks are simply pushed into the solder paste-filled PCB holes and then soldered along with the SMT components via reflow soldering. The previous wave soldering process is no longer necessary. The result is a perfect connection – both mechanically and electrically.

Terminal strips with an additional suction pad in tape-and-reel packaging per IEC 60286-3 WAGO recommends both a temperature profile that adheres to EN 61760-1 and the use of forced convection ovens for processing THR components.

Direct Marking MCS MINI HD

713 Series Female Connectors can be marked with "1 ... pole no." via factory direct marking.

Two standard marking orientations are available:

1. Marking perpendicular to conductor entry
2. Marking parallel to conductor entry

Other custom marking options are available upon request.

WAGO recommends pole marking on the PCB for male headers with solder pins (713 Series).

The marking type is always defined by the second 4-digit block of the item no. suffix for items with standard colors and materials.

Example: 713-1110/... - xxxx

xxxx = item no. suffix for direct marking

Direct marking of 1-conductor female connectors, perpendicular to conductor entry, 1 ... pole no., item no. suffix: /... - 047

Version	Item No. Example
1-conductor female connector, double-row, 16-pole, black	713-1108/000-047
1-conductor female connector, with screw flanges, double-row, 16-pole, black	713-1108/0107-047
1-conductor female connector, with levers and strain relief plate, double-row, 16-pole, black	713-1108/037-047/033-000

Direct marking of 1-conductor female connectors, parallel to conductor entry, 1 ... pole no., item no. suffix: /... - 9037

Version	Item No. Example
1-conductor female connector, double-row, 16-pole, black	713-1108/000-9037
1-conductor female connector, with levers, double-row, 16-pole, black	13-1108/037-9037
1-conductor female connector, with strain relief plate, double-row, 16-pole, black	713-1108/033-9037

Strain Relief Plates

MCS MINI HD

Strain relief plate; for field assembly; for female connectors with CAGE CLAMP® connection; black

Pole No.	Width	Item No.	PU (SPU)
6 ... 8	11 mm	713-126	100 (25)
10 ... 12	18 mm	713-130	100 (25)
14 ... 20	24 mm	713-127	100 (25)
22 ... 28	39 mm	713-128	100 (25)
30 ... 36	53 mm	713-129	100 (25)

Strain relief plate; pre-assembled; for female connectors with CAGE CLAMP® connection; black

Pole No.	Width	Item no. suffix *
6 ... 8	11 mm	.../032-000
10 ... 12	18 mm	.../036-000
14 ... 20	24 mm	.../033-000
22 ... 28	39 mm	.../034-000
30 ... 36	53 mm	.../035-000

Coding pin carrier, for male headers with six coding pins

Color	Item No.	PU (SPU)
orange	714-101	100 (25)

6

Strain relief plate for field assembly

*An "item no. suffix," referring to the width of the strain relief plate, is added to the "basic item no." and determines the type of female connector.

Coding a male header via coding pins.

Pole No.	B	H	D
6 ... 8	11	38,7	3
10 ... 12	18	43,7	4,2
14 ... 20	25	43,7	4,2
22 ... 28	39	48,7	4,2
30 ... 36	53	54,2	4,9

The arrangement of the attachments for cable ties allows single conductors or multi-core cables to be secured in different ways. The width of the cable ties must correspond to the hole dimensions of the strain relief plates shown above.

Cable ties and binding tools are not offered by WAGO.

Coding a female connector – removing coding finger(s).

PU = Packaging Unit; SPU = Subpackaging Unit; Dimensions in mm

MCS MINI SL

Description and Installation

Terminating solid and ferruled conductors via push-in termination.

Inserting/removing fine-stranded conductors via push-button.

Coded connectors.

Coding a male header by inserting a coding pin.

Coding a female connector by removing coding finger(s).

Pin spacing: 3.5 mm

Pole marking via factory direct marking.

Testing via 1 mm Ø test pin – insertion parallel to conductor entry.

7

1-Conductor Female Connector ▶ MCS MINI SL ▶ 714 Series

Pin spacing: 3.5 mm (0.138 inch) ▶ Actuation type: Push-button ▶ Push-in CAGE CLAMP® ▶ Color: black

- Female connectors terminate both solid and ferruled conductors via push-in termination
- Integrated push-buttons provide convenient, tool-free operation
- Ultra-low profile of just 7.8 mm for conductor cross-section up to 1.5 mm²
- With coding fingers and test points

Coding Pin Carrier and Direct Marking MCS MINI SL

Coding pin carrier; for male headers;
with six coding pins

Color	Item No.	PU (SPU)
orange	714-101	100 (25)

Direct marking of 1-conductor female connectors;
perpendicular to conductor entry; 1 ... pole no.;
item no. suffix.: /... - 047

Version	Item No. Example
1-conductor female connector; with push-buttons; 6-pole; black	714-106/000-047

714 Series Female Connectors can be marked with
"1 ... pole no." via factory direct marking.

WAGO recommends pole marking on the PCB for male
headers with solder pins (714 Series).

Coding a male header via coding pins.

Coding a female connector – removing coding finger(s).

MCS MIDI, 100 % Protected Against Mismatching

Description and Installation

Inserting/removing a conductor via 3.5 mm screwdriver – Push-in CAGE CLAMP® actuation in mated condition.

Coding a male header – fitting coding key(s).

Coding a female connector – removing coding finger(s).

Push-in termination of solid conductors or fine-stranded conductors with ferrule

Testing parallel to conductor entry via integrated test ports – female connector with push-buttons and Push-in CAGE CLAMP® connection – touch contact perpendicular to conductor entry.

Pin spacing: 5 mm and 7.5 mm, Push-in CAGE CLAMP®

Labeling via direct marking or self-adhesive strips.

Inserting a fine-stranded conductor via 3.5 mm screwdriver into a 2-conductor female connector equipped with Push-in CAGE CLAMP®.

Push-in termination of solid conductors or fine-stranded conductors with ferrule

MCS MIDI, 100 % Protected Against Mismatching

Description and Installation

Inserting a conductor via 3.5 mm screwdriver – CAGE CLAMP® actuation parallel to conductor entry.

Inserting a conductor via 3.5 mm screwdriver – CAGE CLAMP® actuation perpendicular to conductor entry.

Inserting a conductor into CAGE CLAMP® unit via operating lever (231-291).

Pin spacing: 5 mm and 7.5 mm, CAGE CLAMP®

Connectors for 280 Series Rail-Mount Terminal Blocks

Angled female connector for panel mounting

Male connector with strain relief plate

Strain relief housing shown with a male connector equipped with CAGE CLAMP®

Testing perpendicular to conductor entry with 2 or 2.3 mm Ø test plug – female connector with CAGE CLAMP® – via integrated test ports

1-Conductor Female Connector ▶ MCS MIDI ▶ 721 Series

Pin spacing: 5 mm (0.197 inch) ▶ Actuation type: Operating tool ▶ CAGE CLAMP® ▶ Conductor entry direction to mating direction: 0° ▶ Color: light gray

- Universal connection for all conductor types
- Easy cable pre-assembly and on-unit wiring via vertical and horizontal CAGE CLAMP® actuation
- Integrated test ports
- 100 % protected against mismatching
- Coding option available

Connection technology	Push-in CAGE CLAMP®
Strip length	9 ... 10 mm / 0.35 ... 0.39 inch
Solid conductor	0.2 ... 2.5 mm ² / 24 ... 12 AWG
Fine-stranded conductor	0.2 ... 2.5 mm ² / 24 ... 12 AWG
Fine-stranded conductor with ferrule with plastic collar	0.25 ... 1.5 mm ²
Fine-stranded conductor with ferrule without plastic collar	0.25 ... 2.5 mm ²

Material Data

Material group	I
Insulating material	Polyamide 66 (PA 66)
Flammability class per UL94	V0
Clamping spring material	Chrome nickel spring steel (CrNi)
Contact material	Copper alloy
Contact plating	Tin-plated

Environmental Requirements

Limit temperature range	-60 ... +85 °C
-------------------------	----------------

The *MULTI CONNECTION SYSTEM (MCS)* is designed without breaking capacity for compliance with DIN EN 61984. When used as intended, MCS Connectors shall not be connected/disconnected when live or under load. The circuit design should ensure header pins, which can be touched, are not live when unmated.

2-Conductor Female Connector ▶ MCS MIDI ▶ 721 Series

Pin spacing: 5 mm (0.197 inch) ▶ Actuation type: Operating tool ▶ Push-in CAGE CLAMP® ▶ Conductor entry direction to mating direction: 0° ▶ Color: light gray

Locking of plug-in connection: locking lever

Operating Push-in CAGE CLAMP® is easy, fast and identical to that of CAGE CLAMP®. The screwdriver is fully inserted into the operating slot, holding Push-in CAGE CLAMP® open. After the conductor has been inserted into the clamping unit and the screwdriver been withdrawn, the conductor is clamped safely. Solid and fine-stranded conductors <math>< 0.5 \text{ mm}^2</math> (20 AWG) are terminated and removed using a screwdriver.

Solid conductors $\geq 0.5 \text{ mm}^2$ (20 AWG), as well as ferruled, fine-stranded conductors can be terminated by simply pushing them into unit. Integrated test ports allow touch contact with current bar via test probes in both horizontal and vertical directions.

$L = (\text{pole no.} - 2) \times \text{pin spacing} + 10 \text{ mm}$
2-pole female connectors – one latch only

$L = (\text{pole no.} - 2) \times \text{pin spacing} + 10 \text{ mm}$
2-pole female connectors – one latch only

PU = Packaging Unit; SPU = Subpackaging Unit; Dimensions in mm

Other variants can be requested via the WAGO sales department or, if necessary, configured at <https://configurator.wago.com/>:

- Other pole numbers
- Gold-plated or partially gold-plated contact surfaces

1-Conductor Female Connector ▶ MCS MIDI ▶ 2721 Series

Pin spacing: 5 mm (0.197 inch) ▶ Actuation type: Push-button ▶ Push-in CAGE CLAMP® ▶ Conductor entry direction to mating direction: 0° ▶ Color: light gray

- Universal connection for all conductor types
- Easy-to-use design does not require specialty tools
- Ability to wire while mated
- Push-in termination of solid and ferruled conductors
- Integrated test ports for testing parallel to the conductor entry
- 100 % protected against mismatching
- With coding fingers

L = (pole no. - 1) x pin spacing + 5 mm
 L₁ = L + 3 mm
 L₂ = L + 8.8 mm
 L₃ = L + 14.8 mm

L = (pole no. - 1) x pin spacing + 5 mm + 1.5 mm

PU = Packaging Unit; SPU = Subpackaging Unit; Dimensions in mm

Other variants can be requested via the WAGO sales department or, if necessary, configured at <https://configurator.wago.com/>:

- Other pole numbers
- Gold-plated or partially gold-plated contact surfaces

1-Conductor Female Connector ▶ MCS MIDI ▶ 721 Series

Pin spacing: 7.5 mm (0.295 inch) ▶ Actuation type: Operating tool ▶ CAGE CLAMP® ▶ Conductor entry direction to mating direction: 90° ▶ Color: light gray

- Universal connection for all conductor types
- Versions available with snap-in mounting feet or flanges for panel or through-panel mounting
- Mounting adapter allows versions with snap-in mounting feet to be DIN-rail mounted
- Easy conductor termination, even when halves are mated
- 100 % protected against mismatching

- Gold-plated or partially gold-plated contact surfaces

2-Conductor Female Connector ▶ MCS MIDI ▶ 721 Series

Pin spacing: 7.5 mm (0.295 inch) ▶ Actuation type: Operating tool ▶ Push-in CAGE CLAMP® ▶ Conductor entry direction to mating direction: 0° ▶ Color: light gray

- Universal connection for all conductor types
- Two conductor entries per pole
- For looping through power or Data buses
- Bus connection is retained, even when unmated
- Push-in terminations of solid and ferruled conductors
- 100 % protected against mismatching
- With coding fingers

2-Conductor Female Connector ▶ MCS MIDI ▶ 721 Series

Pin spacing: 7.5 mm (0.295 inch) ▶ Actuation type: Operating tool ▶ Push-in CAGE CLAMP® ▶ Conductor entry direction to mating direction: 0° ▶ Color: light gray

Locking of plug-in connection: locking lever

Operating Push-in CAGE CLAMP® is easy, fast and identical to that of CAGE CLAMP®. The screwdriver is fully inserted into the operating slot, holding Push-in CAGE CLAMP® open. After the conductor has been inserted into the clamping unit and the screwdriver been withdrawn, the conductor is clamped safely. Solid and fine-stranded conductors < 0.5 mm² (20 AWG) are terminated and removed using a screwdriver.

Pin spacing: 7.5 mm (0.295 inch) ▶ Actuation type: Operating tool ▶ CAGE CLAMP® ▶ with preceding GND contact ▶ Conductor entry direction to mating direction: 0° ▶ Color: light gray

- Universal connection for all conductor types
- Easy cable pre-assembly and on-unit wiring via vertical and horizontal CAGE CLAMP® actuation
- For wire-to-wire and board-to-wire connections
- Versions available with snap-in mounting feet or flanges for panel or through-panel mounting
- 3- to 5-pole male connectors are also available with preceding ground contact
- 100 % protected against mismatching
- With coding fingers

Material group	I
Insulating material	Polyamide 66 (PA 66)
Flammability class per UL94	V0
Contact material	Electrolytic copper (Ecu)
Contact plating	Tin-plated

Mechanical Data

Solder pin arrangement	Over the entire male connector, in line
Solder pin dimensions	1.2 x 1.2 mm
Drilled hole diameter (tolerance)	1.7 ^(+0.1) mm

Environmental Requirements

Limit temperature range	-60 ... +100 °C
-------------------------	-----------------

The *MULTI CONNECTION SYSTEM (MCS)* is designed without breaking capacity for compliance with DIN EN 61984. When used as intended, MCS Connectors shall not be connected/disconnected when live or under load. The circuit design should ensure header pins, which can be touched, are not live when unmated.

Direct Marking

MCS MIDI and MCS MIDI Classic

The pole numbers of male and female connectors for CAGE CLAMP® termination can be marked via factory direct marking.

Two standard marking orientations are available:
 1. Marking perpendicular to conductor entry
 2. Marking parallel to conductor entry

Other custom marking options are available upon request.

Direct marking is not suitable for MCS PCB Male Headers. WAGO recommends pole marking on the PCB for these headers.

Female headers with solder pins are exposed to aggressive flux agents during wave soldering. Custom direct marking procedures are available upon request for these items.

The marking type is always defined by the second 4-digit block of the item no. suffix for items with standard colors and materials.

Example: 721-106/... - xxxx
 xxxx = Item no. suffix for direct marking

Direct marking of 1-conductor female connectors; perpendicular to conductor entry; 1 ... pole no.; item no. suffix: /... - 047

Version	Item No. Example
1-conductor female connector; 5 mm pin spacing; 6-pole; light gray	721-106/026-047
1-conductor female connector; with locking levers; 5 mm pin spacing; 6-pole; light gray	721-106/037-047
1-conductor female connector; with strain relief plate; 5 mm pin spacing; 6-pole; light gray	721-106/026-047/034-000
1-conductor female connector; with locking levers and strain relief plate; 5 mm pin spacing; 6-pole; light gray	721-106/026-047/034-000

Direct marking of 1-conductor male connectors; perpendicular to conductor entry; pole no. ... 1; item no. suffix: /... - 044

Version	Item No. Example
1-conductor male connector; 6-pole; light gray	721-606/000-044
1-conductor male connector; with mounting flanges; 6-pole; light gray	721-606/019-044
1-conductor male connector; with mounting flanges and strain relief plate; 6-pole; light gray	721-606/019-044/034-000

8

Direct marking of 1-conductor female connectors; parallel to conductor entry; 1 ... pole no.; item no. suffix: /... - 9037

Version	Item No. Example
1-conductor female connector; 5 mm pin spacing; 6-pole; light gray	721-106/026-9037
1-conductor female connector; with locking levers; 5 mm pin spacing; 6-pole; light gray	721-106/037-9037
1-conductor female connector; with strain relief plate; 5 mm pin spacing; 6-pole; light gray	721-106/026-9037/034-000
1-conductor female connector; with locking levers and strain relief plate; 5 mm pin spacing; 6-pole; light gray	721-106/037-9037/034-000

Direct marking of 1-conductor male connectors; parallel to conductor entry; pole no. ... 1; item no. suffix: /... - 9034

Version	Item No. Example
1-conductor male connector; 5 mm pin spacing; 6-pole; light gray	721-606/000-9034
1-conductor male connector; with mounting flanges; 5 mm pin spacing; 6-pole; light gray	721-606/019-9034
1-conductor male connector; with mounting flanges and strain relief plate; 5 mm pin spacing; 6-pole; light gray	721-606/019-9034/034-000

Direct Marking

MCS MIDI and MCS MIDI Classic

Direct marking of 1-conductor female connectors with push-buttons; perpendicular to conductor entry; 1 ... pole no.; item no. suffix.: /... - 047

Version	Item No. Example
1-conductor female connector; with push-buttons; 5 mm pin spacing; 6-pole; light gray	2721-106/026-047
1-conductor female connector; with locking levers; 5 mm pin spacing; 6-pole; light gray	2721-106/037-047
1-conductor female connector; with push-buttons and strain relief plate; 5 mm pin spacing; 6-pole; light gray	2721-106/026-047/ 134-000
1-conductor female connector; with push-buttons; locking levers and strain relief plate; 5 mm pin spacing; 6-pole; light gray	2721-106/037-047/ 134-000

Direct marking of 2-conductor female connectors; perpendicular to conductor entry; 1 ... pole no.; item no. suffix.: /... - 047

Version	Item No. Example
2-conductor female connector; 6-pole; light gray	721-2106/026-047
2-conductor female connector; with locking levers; 6-pole; light gray	721-2106/037-047
2-conductor female connector; with locking levers and strain relief plate; 6-pole; light gray	721-2106/026-047/ 134-000

Direct marking of 1-conductor angled female connectors; perpendicular to conductor entry; 1 ... pole no.; item no. suffix.: /... - 047

Version	Item No. Example
1-conductor angled female connector; 6-pole; light gray	722-206/026-047
1-conductor angled female connector; with strain relief plate; 6-pole; light gray	722-206/026-047/ 034-000

Direct marking of 1-conductor female connectors with push-buttons; parallel to conductor entry; 1 ... pole no.; item no. suffix.: /... - 9037

Version	Item No. Example
1-conductor female connector; with push-buttons; 5 mm pin spacing; 6-pole; light gray	2721-106/026-9037
1-conductor female connector; with push-buttons and locking levers; 5 mm pin spacing; 6-pole; light gray	2721-106/037-9037
1-conductor female connector; with push-buttons and strain relief plate; 5 mm pin spacing; 6-pole; light gray	2721-106/026-9037/ 134-000
1-conductor female connector; with push-buttons; locking levers and strain relief plate; 5 mm pin spacing; 6-pole; light gray	2721-106/037-9037/ 134-000

Direct marking of 2-conductor female connectors; parallel to conductor entry; 1 ... pole no.; item no. suffix.: /... - 9037

Version	Item No. Example
2-conductor female connector; 5 mm pin spacing; 6-pole; light gray	721-2106/026-9037
2-conductor female connector; with locking levers; 5 mm pin spacing; 6-pole; light gray	721-2106/037-9037
2-conductor female connector; with locking levers and strain relief plate; 6-pole; light gray	721-2106/026-9037/ 134-000

Direct marking of 1-conductor angled female connectors; parallel to conductor entry; 1 ... pole no.; item no. suffix.: /... - 047

Version	Item No. Example
1-conductor angled female connector; 5 mm pin spacing; 6-pole; light gray	722-206/026-9037
1-conductor angled female connector; with strain relief plate; 5 mm pin spacing; 6-pole; light gray	722-206/026-9037/ 034-000

Direct Marking MCS MIDI and MCS MIDI Classic

Direct marking of 2-conductor angled female connectors with flanges for panel mounting; perpendicular to conductor entry; 1 ... pole no.; item no. suffix.: /... - 047

Version	Item No. Example
1-conductor angled female connector; with flanges for panel mounting; 5 mm pin spacing; 6-pole; light gray	721-306/031-047
1-conductor angled female connector; with flanges for panel mounting; with snap-in mounting feet; 5 mm pin spacing; 6-pole; light gray	721-306/008-047

Direct marking of 3- to 5-pole; 1-conductor male connectors with preceding ground contact; perpendicular to conductor entry; pole assignment; item no. suffix.: /... - 042

Version	Item No. Example
1-conductor male connector; with preceding ground contact; 5 mm pin spacing 5-pole; light gray	721-605/000-042
1-conductor male connectors in 3- to 5-pole versions (721 and 723 Series) are available with the following markings: 3-pole: 3 - 3 - 1 4-pole: 4 - 3 - 2 - 1 5-pole: 5 - 3 - ⊕ - 2 - 1	

Direct marking of 3- to 5-pole; 1-conductor female connectors for 1-conductor male connectors with preceding ground contact; perpendicular to conductor entry; pole assignment; item no. suffix.: /... - 045

Version	Item No. Example
1-conductor female connector; with preceding ground contact; 5 mm pin spacing 5-pole; light gray	721-105/026-045
1-conductor female connectors in 3- to 5-pole versions (721, 2721, 722 and 723 Series) for 1-conductor male connectors with preceding ground contact are available with the following markings: 3-pole: 1 - 3 - 3 4-pole: 1 - 2 - 3 - 4 5-pole: 1 - 2 - ⊕ - 4 - 5	

8

Direct marking of 1-conductor angled female connectors with flanges for panel mounting; parallel to conductor entry; 1 ... pole no.; item no. suffix.: /... - 9037

Version	Item No. Example
1-conductor female connector; with push-buttons; 5 mm pin spacing; 6-pole; light gray	2721-106/026-9037
1-conductor female connector; with push-buttons and locking levers; 5 mm pin spacing; 6-pole; light gray	2721-106/037-9037
1-conductor female connector; with push-buttons and strain relief plate; 5 mm pin spacing; 6-pole; light gray	2721-106/026-9037/134-000
1-conductor female connector; with push-buttons; locking levers and strain relief plate; 5 mm pin spacing; 6-pole; light gray	2721-106/037-9037/134-000

Direct marking of 3- to 5-pole; 1-conductor male connectors with preceding ground contact; perpendicular to conductor entry; pole assignment; item no. suffix.: /... - 041

Version	Item No. Example
1-conductor male connector; with preceding ground contact; 5 mm pin spacing 5-pole; light gray	721-605/000-041
1-conductor male connectors in 3- to 5-pole versions (721 and 723 Series) are available with the following markings: 3-pole: N - 3 - L 1 4-pole: L 2 - 3 - N - L 1 5-pole: L 3 - N - 3 - L 2 - L 1 Pole no. ... 1; item no. suffix.: /... - 043	

Direct marking of 3- to 5-pole; 1-conductor female connectors for 1-conductor male connectors with preceding ground contact; perpendicular to conductor entry; pole assignment; item no. suffix.: /... - 046

Version	Item No. Example
1-conductor female connector; with preceding ground contact; 5 mm pin spacing 5-pole; light gray	721-105/026-046
1-conductor female connectors in 3- to 5-pole versions (721, 2721, 722 and 723 Series) for 1-conductor male connectors with preceding ground contact are available with the following markings: 3-pole: L 1 - 3 - N 4-pole: L 1 - N - 3 - L 2 5-pole: L 1 - L 2 - 3 - N - L 3 1 ... pole no.; item no. suffix.: /... - 047

8-pole	280-438	30 (1)
9-pole	280-439	30 (1)
10-pole	280-440	30 (1)

Operating tool; insulated; operation perpendicular to conductor entry; suitable for male and female connectors; with CAGE CLAMP®, 5/5.08 mm pin spacing

	Item No.	PU (SPU)
2-pole	209-132	40 (1)

Test plug adapter; for female connectors; light gray

Pin Spacing	Item No.	PU
5/5.08 mm	231-661	100
7.5/7.62 mm	231-662	100

Inserting male or female connectors with long contact pins into 280 Series Rail-Mount Terminal Blocks via multipole operating tool (max. 10-pole for field assembly). Using CAGE CLAMP®-equipped male and female connectors (5/5.08 mm pin spacing), this operating tool allows up to ten CAGE CLAMP® units to be opened simultaneously, e.g., when inserting 231-90x Comb-Style Jumper Bars. Wiring male or female connectors should be performed in a suitable mount.

Operating tool for 231-902 Comb-Style Jumper Bars

Test plug adapter with CAGE CLAMP® connection

Coding Keys MCS MIDI

Coding key; for male headers		
Color	Item No.	PU (SPU)
○ light gray	231-500	200 (100)

Coding key; for male headers; 5/5.08 mm pin spacing		
Color	Item No.	PU
○ light gray	231-129	100

Coding pin; for male headers for double-deck assembly; snaps into lower level		
Color	Item No.	PU
○ light gray	231-160	100

Coding key; for male headers; 7.5/7.62 mm pin spacing		
Color	Item No.	PU
○ light gray	231-130	100

Inserting separators for group formation directly into MCS MIDI Classic Male Headers. Group formation using separators means that pole count is reduced by at least one pole. Female connectors with integrated end plates and 5/5.08 mm pin spacing are available for group formation without loss of poles. Group formation without loss of poles is possible using standard female connectors (7.5/7.62 mm pin spacing) without separators.

Snap-on coding key for male headers with solder pins and CAGE CLAMP®-equipped male connectors. The last pole of male and female connectors with 7.5 mm pin spacing has a width of 5 mm; for 7.62 mm pin spacing, the pole width is 5.08 mm. Always use a 231-129 Coding Key for coding this pole.

Coding a THT double-deck male header – lower level.

Screw with nut		
M2 x 12 mm	231-195	100
Self-tapping screw; 1.8 mm Ø mounting hole		
B 2.2 x 13 mm	231-194	100

Sealing unnecessary clamping points in CAGE CLAMP®-equipped male and female connectors (e.g., when doubling the pin spacing to meet clearance and creepage distance requirements, or when higher rated voltage is required). Lockout pins are not suitable for panel-mount, angled female connectors.

The wiring of programmable logic controllers and micro-processor-operated control circuits often relies on very small, fine-stranded conductors. These conductors are highly flexible and deform when pushed against the conductor stop in terminal blocks. As a result, the conductor insulation – not the copper conductor – may be clamped, causing intermittent contact or no contact at all. Common to all terminal block types currently offered, this problem creates unnecessary downtime for troubleshooting.

Insulation stops for connectors reliably ensure proper termination. Insulation stops automatically bundle the cores of fine-stranded conductors when inserted into the clamping unit, preventing splaying. This also limits the conductor entry to a defined cross sectional area – ensuring the actual conductor, not the insulation, will enter the clamping unit

Insulation stops are available as dividable 5-pole strips for MCS MIDI Male and Female Connectors. Insulation stop usage will not affect the conductor strip lengths for the aforementioned connectors.

Insulation stops are not suitable for panel-mount female connectors.

Locking devices enhance connection reliability between male headers with angled solder pins and the PCB. This substantially reduces mechanical stress on both solder pins and joints, particularly when dealing with small lengths and frequent mating cycles.

Strain relief plate, pre-assembled, for male and female connectors with CAGE CLAMP® connection, MCS MIDI

5/5.08 mm pin spacing; orange

Pole No.	Width	Item No. Suffix *
2 ... 3	11.5 mm	.../032-000
4 ... 5	20 mm	.../033-000
6 ... 9	30 mm	.../034-000
10 ... 24	50 mm	.../035-000

7.5/7.62 mm pin spacing; gray

Pole No.	Width	Item No. Suffix *
2 ... 3	11.5 mm	.../032-000
4 ... 5	20 mm	.../033-000
6 ... 9	30 mm	.../034-000
10 ... 24	50 mm	.../035-000

Both CAGE CLAMP®-equipped male and female connectors can be fitted with a strain relief plate. The strain relief plates must be pre-assembled (glued) prior to delivery for connector models equipped with CAGE CLAMP® connection. These strain relief plates are available in four different widths and are allocated to the specific pin spacing and pole number (as shown above). Angled female connectors for panel mounting cannot be fitted with strain relief plates.

*An "item no. suffix," referring to the width of the strain relief plate, is added to the "basic item no.," and determines the type of male or female connector.

Cable ties and binding tools are not offered by WAGO.
The width of the cable ties must correspond to the hole dimensions of the strain relief plates shown above.

Ordering example:
1-conductor female connector;
with strain relief plate;
5.08 mm pin spacing; 12-pole; orange:
231-312/026-000/035-000

Ordering example:
1-conductor female connector;
with strain relief plate;
5 mm pin spacing; 3-pole; gray:
231-103/026-000/032-000

Gray strain relief plates are used for light gray 721, 722 and 723 Series Male and Female Connectors equipped with CAGE CLAMP® connection.

Strain relief plate; for field assembly; for male and female connectors with CAGE CLAMP® and Push-in CAGE CLAMP®; for female connectors 2721, 2231 Series and 2-conductor 231, 721 Series MCS MIDI

for inserting; 5/5.08 mm pin spacing

Female connectors with Push-in CAGE CLAMP® can be retrofitted with a strain relief plate or pre-assembled with one at the factory. These strain relief plates are available in six different widths and are allocated to the specific pin spacing and pole number (as shown left). The arrangement of the attachments for cable ties allows single conductors or multi-core cables to be secured in different ways.

*An "item no. suffix," referring to the width of the strain relief plate, is added to the "basic item no." and determines the type of male or female connector.

Cable ties and binding tools are not offered by WAGO. The width of the cable ties must correspond to the hole dimensions of the strain relief plates shown above.

Snapping a cover into the unused cable outlet.

Snapping on a strain relief housing, demonstrated with a female connector with locking levers. Cable exits laterally – strain relief by cable tie (up to a width of 4 mm).

Disassembling a strain relief housing is only possible using an operating tool (e.g., 210-719).

3-pole female connector with strain relief housing

4-pole male connector with strain relief housing

Gray strain relief plates are used for light gray 721, 722 and 723 Series Male and Female Connectors equipped with CAGE CLAMP® connection.

PU = Packaging Unit; SPU = Subpackaging Unit; Dimensions in mm

Mounting Adapters MCS MIDI

Mounting adapter for DIN-35 rail, for male and female connectors with snap-in mounting feet

Color	Item No.	PU
○ gray	209-137	25

Mounting adapter, for DIN-35 rail, for angled female connectors with snap-in feet for panel mounting

Color	Item No.	PU (SPU)
○ gray	209-120	500(25)

Multi mounting adapter, for DIN-35 rail, for male and female connectors with snap-in mounting feet

Color	Item No.	PU
○ gray	209-148	25

Dimensions (in mm):

Female connector with snap-in mounting feet and 209-189 Mounting Adapter on DIN-35 rail

8

Multi mounting adapter (209-120) on DIN-35 rail and angled female connector with snap-in feet for panel mounting

The pluggable male or female connector can also be fitted with a strain relief plate.

The adapter can be marked either with WSB, Mini-WSB or WMB markers.

Both male and female connectors remain pluggable when they are mounted on the multi mounting adapter via its oblong holes or open grooves (A/B).

If a connector is pushed from the side into the open grooves (A/B) of the multi mounting adapter, the plug connection will be reliably protected from unintentional disconnection when mounted.

Comb-Style Jumper Bars

MCS MIDI

Comb-style jumper bar, for male and female connectors with CAGE CLAMP®, with CAGE CLAMP®, 5/5.08 mm pin spacing

	Item No.	PU (SPU)
2-pole	231-902	200 (25)
3-pole	231-903	200 (25)
5-pole	231-905	100 (25)
7-pole	231-907	100 (25)
10-pole	231-910	100 (25)

Notice:
Not suitable for female connectors equipped with Push-in CAGE CLAMP® connection and angled, panel-mount female connectors.

Comb-style jumper bar reduces maximum conductor cross-section to 1.5 mm².

Notice:
Insert jumper bar according to direction of symbols.
□ symbol correlates to the direction of the operating slot.

Notice:
Insert jumper bar according to direction of symbols.
○ symbol correlates to the direction of the conductor entry.

Custom comb-style jumper bars are created by breaking off jumper contacts (3 contacts and more).

Inserting a comb-style jumper bar via multipole operating tool – with the female or male connector being supported in a suitable holding device.

Commoning a female connector with 231-902 Comb-Style Jumper Bar via 2-pole operating tool.

Both male and female connectors can be pre-assembled with comb-style jumper bars upon request.

Notice: Comb-style jumper bars reduce the conductor cross-section to 1.5 mm² "s" + "f-st."

MCS MIDI Classic

Description and Installation

Coding a male header – fitting coding key(s).

Coding a lower male header – inserting coding key(s).

Coding a female connector – removing coding finger(s).

Push-in termination of solid conductors or fine-stranded conductors with ferrule

Pin spacing: 5/5.08 mm and 7.5/7.62 mm, Push-in CAGE CLAMP®

Testing parallel to conductor entry via integrated test ports – female connector with push-buttons and Push-in CAGE CLAMP® connection – touch contact perpendicular to conductor entry.

Inserting fine-stranded conductors into Push-in CAGE CLAMP® unit via push-buttons.

THR male headers in tape-and-reel packaging for SMT applications

Labeling via direct marking or self-adhesive strips.

9

MCS MIDI Classic

Description and Installation

Inserting a conductor via 3.5 mm screwdriver – CAGE CLAMP® actuation parallel to conductor entry.

Inserting a conductor via 3.5 mm screwdriver – CAGE CLAMP® actuation perpendicular to conductor entry.

Inserting a conductor into CAGE CLAMP® unit via operating lever (231-291).

Pin spacing: 5/5.08 mm and 7.5/7.62 mm, CAGE CLAMP®

Inserting a conductor into CAGE CLAMP® unit via operating tool (210-250).

Testing perpendicular to conductor entry via 2 or 2.3 mm Ø test plug – female connector with CAGE CLAMP®.

Male connector with strain relief plate

Strain relief housing shown with a male connector equipped with CAGE CLAMP®

Insulation stop – prevents conductor insulation from being inserted into CAGE CLAMP® and Push-in CAGE CLAMP® units.

1-Conductor Female Connector ▶ MCS MIDI Classic ▶ 231 Series

Pin spacing: 5 mm (0.197 inch) ▶ Actuation type: Operating tool ▶ CAGE CLAMP® ▶ Conductor entry direction to mating direction: 0° ▶ Color: gray

- Universal connection for all conductor types
- Easy cable pre-assembly and on-unit wiring via vertical and horizontal CAGE CLAMP® actuation
- Integrated test ports
- With coding fingers

-------------------------	----------------

The *MULTI CONNECTION SYSTEM (MCS)* is designed without breaking capacity for compliance with DIN EN 61984. When used as intended, MCS Connectors shall not be connected/disconnected when live or under load. The circuit design should ensure header pins, which can be touched, are not live when unmated.

2-Conductor Female Connector ▶ MCS MIDI Classic ▶ 231 Series

Pin spacing: 5 mm (0.197 inch) ▶ Actuation type: Operating tool ▶ Push-in CAGE CLAMP® ▶ Conductor entry direction to mating direction: 0° ▶ Color: gray

Locking of plug-in connection: locking lever

Operating Push-in CAGE CLAMP® is easy, fast and identical to that of CAGE CLAMP®. The screwdriver is fully inserted into the operating slot, holding Push-in CAGE CLAMP® open. After the conductor has been inserted into the clamping unit and the screwdriver been withdrawn, the conductor is clamped safely. Solid and fine-stranded conductors < 0.5 mm² (20 AWG) are terminated and removed using a screwdriver.

Female connectors with a built-in end plate require no extra space, while maintaining the nominal cross-section. This means: Total length of female connectors is reduced to „pole no. x pin spacing“!

9

L = (pole no. x pin spacing) + 1.5 mm
 L₁ = 5 mm
 2- to 3-pole female connectors – one latch only

L = pole no. x pin spacing
 2- to 3-pole female connectors – one latch only

PU = Packaging Unit; SPU = Subpackaging Unit; Dimensions in mm

Other variants can be requested via the WAGO sales department or, if necessary, configured at <https://configurator.wago.com/>:

- Gold-plated or partially gold-plated contact surfaces

1-Conductor Female Connector ▶ MCS MIDI Classic ▶ 2231 Series

Pin spacing: 5 mm (0.197 inch) ▶ Actuation type: Push-button ▶ Push-in CAGE CLAMP® ▶ Conductor entry direction to mating direction: 0° ▶ Color: gray

Locking of plug-in connection: locking lever

Type of mounting: Feed-through mounting, Panel mounting ▶ Mounting type: Mounting flange

Type of mounting: Panel mounting ▶ Mounting type: Snap-in mounting foot

THR (Through-Hole Reflow) Soldering Process

By using high-temperature-resistant plastic and a streamlined pin design, WAGO's THR male headers and PCB terminal blocks meet requirements for SMT process capability while maintaining the necessary stability. Both headers and terminal blocks are simply pushed into the solder paste-filled PCB holes and then soldered along with the SMT components via reflow soldering. The previous wave soldering process is no longer necessary. The result is a perfect connection – both mechanically and electrically.

Terminal strips with an additional suction pad in tape-and-reel packaging per IEC 60286-3 WAGO recommends both a temperature profile that adheres to EN 61760-1 and the use of forced convection ovens for processing THR components.

Metal-plated PCB bore hole

Series	d _i (mm)	d _A (mm)	H (mm)	d _s (mm)	D _s (µm)	d (mm)	L (mm)
218	1,1 ^{+0,1}	1,9	< 2	1,8	150	0,9	2,8
231 (1 x 1 mm)	1,4 ^{+0,1}	2,5	< 2	2,4	150	1,2	2,4
231 (1,2 x 1,2 mm)	1,7 ^{+0,1}	2,8	< 2	2,7	150	1,5	2,4
236	1,1 ^{+0,1}	2,2	< 2	2,1	150	0,9	3,6
250	1,1 ^{+0,1}	2,0	< 2	1,9	150	0,9	3,6
713	1,2 ^{+0,1}	1,9	< 2	1,8	150	1,0	2,4
733	1,2 ^{+0,1}	1,9	< 2	1,8	150	1,0	2,4
734	1,4 ^{+0,1}	2,5	< 2	2,4	150	1,2	2,4
2060 THR	1,5 ^{+0,1}	2,4	< 2	2,3	150	1,25	2,4
2061 THR	1,5 ^{+0,1}	2,4	< 2	2,3	150	1,25	1,5/2,4

SMD positioning pattern

- d_i: Plated through-hole diameter
- d_A: Outer diameter of metal-plated PCB hole*
- H: PCB thickness
- d_s: Pattern hole diameter
- D_s: Pattern thickness
- d: Pin diagonal
- L: Pin length

* When laying out the metal-plated bore holes, the clearance and creepage distance requirements – as specified in the equipment standards – must be considered.

The *MULTI CONNECTION SYSTEM (MCS)* is designed without breaking capacity for compliance with DIN EN 61984. When used as intended, MCS Connectors shall not be connected/disconnected when live or under load. The circuit design should ensure header pins, which can be touched, are not live when unmated.

Environmental Requirements

Limit temperature range	-60 ... +100 °C
-------------------------	-----------------

The *MULTI CONNECTION SYSTEM (MCS)* is designed without breaking capacity for compliance with DIN EN 61984. When used as intended, MCS Connectors shall not be connected/disconnected when live or under load. The circuit design should ensure header pins, which can be touched, are not live when unmated.

$L_1 = (\text{pole no.} \times \text{pin spacing}) + 3 \text{ mm}$
 $L_2 = (\text{pole no.} \times \text{pin spacing}) + 8.8 \text{ mm}$
 $L_3 = (\text{pole no.} \times \text{pin spacing}) + 14.8 \text{ mm}$
 2- to 3-pole female connectors – one latch only

PU = Packaging Unit; SPU = Subpackaging Unit; Dimensions in mm

Other variants can be requested via the WAGO sales department or, if necessary, configured at <https://configurator.wago.com/>:

- Gold-plated or partially gold-plated contact surfaces

1-Conductor Female Connector ▶ MCS MIDI Classic ▶ 231 Series

Pin spacing: 5.08 mm (0.2 inch) ▶ Actuation type: Operating tool ▶ CAGE CLAMP® ▶ Conductor entry direction to mating direction: 0° ▶ Color: orange

Type of mounting: Feed-through mounting, Panel mounting ▶ Mounting type: Mounting flange ▶ with reinforcing strip

Female connectors with mounting flanges can be used as PCB through-panel connectors – conductor termination parallel to CAGE CLAMP® actuation.

2- to 3-pole female connectors – one latch only

PU = Packaging Unit; SPU = Subpackaging Unit; Dimensions in mm

Other variants can be requested via the WAGO sales department or, if necessary, configured at <https://configurator.wago.com/>:

- Gold-plated or partially gold-plated contact surfaces

2-Conductor Female Connector ▶ MCS MIDI Classic ▶ 231 Series

Pin spacing: 5.08 mm (0.2 inch) ▶ Actuation type: Operating tool ▶ Push-in CAGE CLAMP® ▶ Conductor entry direction to mating direction: 0° ▶ Color: orange

Operating Push-in CAGE CLAMP® is easy, fast and identical to that of CAGE CLAMP®. The screwdriver is fully inserted into the operating slot, holding Push-in CAGE CLAMP® open. After the conductor has been inserted into the clamping unit and the screwdriver been withdrawn, the conductor is clamped safely. Solid and fine-stranded conductors <math>< 0.5 \text{ mm}^2</math> (20 AWG) are terminated and removed using a screwdriver.

Solid conductors $\geq 0.5 \text{ mm}^2$ (20 AWG), as well as feruled, fine-stranded conductors can be terminated by simply pushing them into unit. Integrated test ports allow touch contact with current bar via test probes in both horizontal and vertical directions.

1-Conductor Female Connector ▶ MCS MIDI Classic ▶ 2231 Series

Pin spacing: 5.08 mm (0.2 inch) ▶ Actuation type: Push-button ▶ Push-in CAGE CLAMP® ▶ Conductor entry direction to mating direction: 0° ▶ Color: orange

- Universal connection for all conductor types
- Easy-to-use design does not require specialty tools
- Ability to wire while mated
- Push-in termination of solid and ferruled conductors
- Integrated test ports for testing parallel to the conductor entry
- With coding fingers

-------------------------	-----------------

The *MULTI CONNECTION SYSTEM (MCS)* is designed without breaking capacity for compliance with DIN EN 61984. When used as intended, MCS Connectors shall not be connected/disconnected when live or under load. The circuit design should ensure header pins, which can be touched, are not live when unmated.

-------------------------	-----------------

The *MULTI CONNECTION SYSTEM (MCS)* is designed without breaking capacity for compliance with DIN EN 61984. When used as intended, MCS Connectors shall not be connected/disconnected when live or under load. The circuit design should ensure header pins, which can be touched, are not live when unmated.

THT Male Header for Double-Deck Assembly ▶ MCS MIDI Classic ▶ 232 Series

Pin spacing: 5.08 mm (0.2 inch) ▶ Solder pin dimensions: 1 x 1 mm ▶ Mating direction to the PCB: 0° ▶ Color: orange

Pole No.	Item No.	PU
2	232-362	100
3	232-363	100
4	232-364	100
6	232-366	50
8	232-368	50
10	232-370	50
12	232-372	50
16	232-376	25

Length = (pole no. - 1) x pin spacing + 8.2 mm
 The solder pins of the basic male headers (lower deck) are in a line.
 The solder pins of the basic female connectors (lower deck) are staggered by half a pin spacing.

PU = Packaging Unit; SPU = Subpackaging Unit; Dimensions in mm

Other variants can be requested via the WAGO sales department or, if necessary, configured at <https://configurator.wago.com/>:

- Other pole numbers
- Gold-plated or partially gold-plated contact surfaces

THT Male Header ▶ MCS MIDI Classic ▶ 231 Series

Pin spacing: 5.08 mm (0.2 inch) ▶ Solder pin dimensions: 1.2 x 1.2 mm ▶ Color: orange

- Horizontal or vertical PCB mounting via straight or angled solder pins
- 1.2 x 1.2 mm solder pins allow nominal current up to 16 A, enhancing stability of shorter headers
- With coding fingers

1-Conductor Female Connector ▶ MCS MIDI Classic ▶ 732 Series

Pin spacing: 7.5 mm (0.295 inch) ▶ Actuation type: Operating tool ▶ CAGE CLAMP® ▶ Conductor entry direction to mating direction: 270° ▶ Color: gray

Pole No.	Item No.	PU
2	732-102/026-000	100
3	732-103/026-000	100
4	732-104/026-000	50
5	732-105/026-000	25
6	732-106/026-000	50
7	732-107/026-000	50
8	732-108/026-000	25
9	732-109/026-000	25
10	732-110/026-000	25
11	732-111/026-000	25
12	732-112/026-000	25
16	732-116/026-000	10

Total length = (pole no. - 1) x pin spacing + 5 mm + 1.5 mm + 0.9 mm

PU = Packaging Unit; SPU = Subpackaging Unit; Dimensions in mm

Other variants can be requested via the WAGO sales department or, if necessary, configured at <https://configurator.wago.com/>:

- Gold-plated or partially gold-plated contact surfaces

1-Conductor Female Connector ▶ MCS MIDI Classic ▶ 731 Series

Pin spacing: 7.5 mm (0.295 inch) ▶ Actuation type: Operating tool ▶ CAGE CLAMP® ▶ Conductor entry direction to mating direction: 90° ▶ Color: gray

- Universal connection for all conductor types
- Versions available with snap-in mounting feet or flanges for panel or through-panel mounting
- Mounting adapter allows versions with snap-in mounting feet to be DIN-rail mounted
- Easy conductor termination, even when halves are mated

1-Conductor Female Connector ▶ MCS MIDI Classic ▶ 731 Series

Pin spacing: 7.5 mm (0.295 inch) ▶ Actuation type: Operating tool ▶ CAGE CLAMP® ▶ Conductor entry direction to mating direction: 90° ▶ Color: gray

Type of mounting: Feed-through mounting, Panel mounting ▶ Mounting type: Mounting flange

Angled female connector used as through-panel connector.

Termination ports and operating slots are located outside the housing – panel thickness up to 2 mm.

2-Conductor Female Connector ▶ MCS MIDI Classic ▶ 231 Series

Pin spacing: 7.5 mm (0.295 inch) ▶ Actuation type: Operating tool ▶ Push-in CAGE CLAMP® ▶ Conductor entry direction to mating direction: 0° ▶ Color: gray

- Universal connection for all conductor types
- Two conductor entries per pole
- For looping through power or Data buses
- Bus connection is retained, even when unmated
- Push-in termination of solid and ferruled conductors
- With coding fingers

2-Conductor Female Connector ▶ MCS MIDI Classic ▶ 231 Series

Pin spacing: 7.5 mm (0.295 inch) ▶ Actuation type: Operating tool ▶ Push-in CAGE CLAMP® ▶ Conductor entry direction to mating direction: 0° ▶ Color: gray

Locking of plug-in connection: locking lever

Operating Push-in CAGE CLAMP® is easy, fast and identical to that of CAGE CLAMP®. The screwdriver is fully inserted into the operating slot, holding Push-in CAGE CLAMP® open. After the conductor has been inserted into the clamping unit and the screwdriver been withdrawn, the conductor is clamped safely. Solid and fine-stranded conductors <math>< 0.5 \text{ mm}^2</math> (20 AWG) are terminated and removed using a screwdriver.

THR Male Header ▶ MCS MIDI Classic ▶ 231 Series

Pin spacing: 7.5 mm (0.295 inch) ▶ Solder pin dimensions: 1 x 1 mm ▶ Color: black

- THR male headers for reflow soldering in SMT applications
- Available in tape-and-reel packaging for automated pick-and-place PCB assembly
- Also available in bulk packaging for manual placement
- Male headers may be mounted horizontally or vertically
- With coding fingers

Material Data

Material group	I
Insulating material	Polyphtalamide (PPA GF)
Flammability class per UL94	V0
Contact material	Electrolytic copper (Ecu)
Contact plating	Tin-plated

Mechanical Data

Solder pin arrangement	Over the entire male connector, in line
Solder pin length	2.4 mm
Solder pin dimensions	1 x 1 mm
Plated through-hole diameter (THR)	1.4 (+0.1) mm
Reel diameter of tape-and-reel packaging	330 mm

Environmental Requirements

Limit temperature range	-60 ... +100 °C
-------------------------	-----------------

The *MULTI CONNECTION SYSTEM (MCS)* is designed without breaking capacity for compliance with DIN EN 61984. When used as intended, MCS Connectors shall not be connected/disconnected when live or under load. The circuit design should ensure header pins, which can be touched, are not live when unmated.

2-Conductor Female Connector ▶ MCS MIDI Classic ▶ 231 Series

Pin spacing: 7.62 mm (0.3 inch) ▶ Actuation type: Operating tool ▶ Push-in CAGE CLAMP® ▶ Conductor entry direction to mating direction: 0° ▶ Color: orange

Locking of plug-in connection: locking lever

Operating Push-in CAGE CLAMP® is easy, fast and identical to that of CAGE CLAMP®. The screwdriver is fully inserted into the operating slot, holding Push-in CAGE CLAMP® open. After the conductor has been inserted into the clamping unit and the screwdriver been withdrawn, the conductor is clamped safely. Solid and fine-stranded conductors <math>< 0.5 \text{ mm}^2</math> (20 AWG) are terminated and removed using a screwdriver.

Rated voltage	600 V		
Rated current	-		

Approvals per	CSA		
Use Group	B	C	D
Rated voltage	300 V	-	300 V
Rated current	15 A	-	10 A

Material Data

Material group	I
Insulating material	Polyamide 66 (PA 66)
Flammability class per UL94	V0
Contact material	Electrolytic copper (Ecu)
Contact plating	Tin-plated

Environmental Requirements

Limit temperature range	-60 ... +100 °C
-------------------------	-----------------

The *MULTI CONNECTION SYSTEM (MCS)* is designed without breaking capacity for compliance with DIN EN 61984. When used as intended, MCS Connectors shall not be connected/disconnected when live or under load. The circuit design should ensure header pins, which can be touched, are not live when unmated.

Carrier rail Page 836

Coding Page 722

Additional information, see "Technical Section"

Approvals and corresponding ratings, visit www.wago.com

Double-Pin Male Connector ▶ MCS MIDI Classic ▶ 232 Series

Pin spacing: 7.62 mm (0.3 inch) ▶ Type of mounting: DIN-35 rail ▶ Color: orange

Female connectors with locking levers

Pole No.	Item No.	PU
2	232-582/007-000	50
3	232-583/007-000	50
4	232-584/007-000	25
5	232-585/007-000	25
6	232-586/007-000	25
7	232-587/007-000	10
8	232-588/007-000	10
9	232-589/007-000	10
10	232-590/007-000	10
11	232-591/007-000	10
12	232-592/007-000	10

Total length = (pole no. - 1) x pin spacing + 8.2 mm

PU = Packaging Unit; SPU = Subpackaging Unit; Dimensions in mm

Other variants can be requested via the WAGO sales department or, if necessary, configured at <https://configurator.wago.com/>:

- Other pole numbers

Direct Marking

MCS MIDI and MCS MIDI Classic

The pole numbers of male and female connectors for CAGE CLAMP® termination can be marked via factory direct marking.

- Two standard marking orientations are available:
1. Marking perpendicular to conductor entry
 2. Marking parallel to conductor entry

Other custom marking options are available upon request.

Direct marking is not suitable for MCS PCB Male Headers. WAGO recommends pole marking on the PCB for these headers.

Female headers with solder pins are exposed to aggressive flux agents during wave soldering. Custom direct marking procedures are available upon request for these items.

The marking type is always defined by the second 4-digit block of the item no. suffix for items with standard colors and materials.

Example: 721-106/... - xxxx

xxxx = Item no. suffix for direct marking

Direct marking of 1-conductor female connectors; perpendicular to conductor entry; 1 ... pole no.; item no. suffix: /... - 047

Version	Item No. Example
1-conductor female connector; 5 mm pin spacing; 6-pole; light gray	721-106/026-047
1-conductor female connector; with locking levers; 5 mm pin spacing; 6-pole; light gray	721-106/037-047
1-conductor female connector; with strain relief plate; 5 mm pin spacing; 6-pole; light gray	721-106/026-047/034-000
1-conductor female connector; with locking levers and strain relief plate; 5 mm pin spacing; 6-pole; light gray	721-106/026-047/034-000

Direct marking of 1-conductor male connectors; perpendicular to conductor entry; pole no. ... 1; item no. suffix: /... - 044

Version	Item No. Example
1-conductor male connector; 6-pole; light gray	721-606/000-044
1-conductor male connector; with mounting flanges; 6-pole; light gray	721-606/019-044
1-conductor male connector; with mounting flanges and strain relief plate; 6-pole; light gray	721-606/019-044/034-000

9

Direct marking of 1-conductor female connectors; parallel to conductor entry; 1 ... pole no.; item no. suffix: /... - 9037

Version	Item No. Example
1-conductor female connector; 5 mm pin spacing; 6-pole; light gray	721-106/026-9037
1-conductor female connector; with locking levers; 5 mm pin spacing; 6-pole; light gray	721-106/037-9037
1-conductor female connector; with strain relief plate; 5 mm pin spacing; 6-pole; light gray	721-106/026-9037/034-000
1-conductor female connector; with locking levers and strain relief plate; 5 mm pin spacing; 6-pole; light gray	721-106/037-9037/034-000

Direct marking of 1-conductor male connectors; parallel to conductor entry; pole no. ... 1; item no. suffix: /... - 9034

Version	Item No. Example
1-conductor male connector; 5 mm pin spacing; 6-pole; light gray	721-606/000-9034
1-conductor male connector; with mounting flanges; 5 mm pin spacing; 6-pole; light gray	721-606/019-9034
1-conductor male connector; with mounting flanges and strain relief plate; 5 mm pin spacing; 6-pole; light gray	721-606/019-9034/034-000

Direct Marking

MCS MIDI and MCS MIDI Classic

Direct marking of 1-conductor female connectors with push-buttons; perpendicular to conductor entry; 1 ... pole no.; item no. suffix.: /... - 047

Version	Item No. Example
1-conductor female connector; with push-buttons; 5 mm pin spacing; 6-pole; light gray	2721-106/026-047
1-conductor female connector; with locking levers; 5 mm pin spacing; 6-pole; light gray	2721-106/037-047
1-conductor female connector; with push-buttons and strain relief plate; 5 mm pin spacing; 6-pole; light gray	2721-106/026-047/ 134-000
1-conductor female connector; with push-buttons; locking levers and strain relief plate; 5 mm pin spacing; 6-pole; light gray	2721-106/037-047/ 134-000

Direct marking of 2-conductor female connectors; perpendicular to conductor entry; 1 ... pole no.; item no. suffix.: /... - 047

Version	Item No. Example
2-conductor female connector; 6-pole; light gray	721-2106/026-047
2-conductor female connector; with locking levers; 6-pole; light gray	721-2106/037-047
2-conductor female connector; with locking levers and strain relief plate; 6-pole; light gray	721-2106/026-047/ 134-000

Direct marking of 1-conductor angled female connectors; perpendicular to conductor entry; 1 ... pole no.; item no. suffix.: /... - 047

Version	Item No. Example
1-conductor angled female connector; 6-pole; light gray	722-206/026-047
1-conductor angled female connector; with strain relief plate; 6-pole; light gray	722-206/026-047/ 034-000

Direct marking of 1-conductor female connectors with push-buttons; parallel to conductor entry; 1 ... pole no.; item no. suffix.: /... - 9037

Version	Item No. Example
1-conductor female connector; with push-buttons; 5 mm pin spacing; 6-pole; light gray	2721-106/026-9037
1-conductor female connector; with push-buttons and locking levers; 5 mm pin spacing; 6-pole; light gray	2721-106/037-9037
1-conductor female connector; with push-buttons and strain relief plate; 5 mm pin spacing; 6-pole; light gray	2721-106/026-9037/ 134-000
1-conductor female connector; with push-buttons; locking levers and strain relief plate; 5 mm pin spacing; 6-pole; light gray	2721-106/037-9037/ 134-000

Direct marking of 2-conductor female connectors; parallel to conductor entry; 1 ... pole no.; item no. suffix.: /... - 9037

Version	Item No. Example
2-conductor female connector; 5 mm pin spacing; 6-pole; light gray	721-2106/026-9037
2-conductor female connector; with locking levers; 5 mm pin spacing; 6-pole; light gray	721-2106/037-9037
2-conductor female connector; with locking levers and strain relief plate; 6-pole; light gray	721-2106/026-9037/ 134-000

Direct marking of 1-conductor angled female connectors; parallel to conductor entry; 1 ... pole no.; item no. suffix.: /... - 047

Version	Item No. Example
1-conductor angled female connector; 5 mm pin spacing; 6-pole; light gray	722-206/026-9037
1-conductor angled female connector; with strain relief plate; 5 mm pin spacing; 6-pole; light gray	722-206/026-9037/ 034-000

Direct Marking

MCS MIDI and MCS MIDI Classic

Direct marking of 2-conductor angled female connectors with flanges for panel mounting; perpendicular to conductor entry; 1 ... pole no.; item no. suffix.: /... - 047

Version	Item No. Example
1-conductor angled female connector; with flanges for panel mounting; 5 mm pin spacing; 6-pole; light gray	721-306/031-047
1-conductor angled female connector; with flanges for panel mounting; with snap-in mounting feet; 5 mm pin spacing; 6-pole; light gray	721-306/008-047

Direct marking of 3- to 5-pole; 1-conductor male connectors with preceding ground contact; perpendicular to conductor entry; pole assignment; item no. suffix.: /... - 042

Version	Item No. Example
1-conductor male connector; with preceding ground contact; 5 mm pin spacing 5-pole; light gray	721-605/000-042
1-conductor male connectors in 3- to 5-pole versions (721 and 723 Series) are available with the following markings:	
3-pole: 3 - 3 - 1	
4-pole: 4 - 3 - 2 - 1	
5-pole: 5 - 3 - ⊕ - 2 - 1	

Direct marking of 3- to 5-pole; 1-conductor female connectors for 1-conductor male connectors with preceding ground contact; perpendicular to conductor entry; pole assignment; item no. suffix.: /... - 045

Version	Item No. Example
1-conductor female connector; with preceding ground contact; 5 mm pin spacing 5-pole; light gray	721-105/026-045
1-conductor female connectors in 3- to 5-pole versions (721, 2721, 722 and 723 Series) for 1-conductor male connectors with preceding ground contact are available with the following markings:	
3-pole: 1 - 3 - 3	
4-pole: 1 - 2 - 3 - 4	
5-pole: 1 - 2 - ⊕ - 4 - 5	

9

Direct marking of 1-conductor angled female connectors with flanges for panel mounting; parallel to conductor entry; 1 ... pole no.; item no. suffix.: /... - 9037

Version	Item No. Example
1-conductor female connector; with push-buttons; 5 mm pin spacing; 6-pole; light gray	2721-106/026-9037
1-conductor female connector; with push-buttons and locking levers; 5 mm pin spacing; 6-pole; light gray	2721-106/037-9037
1-conductor female connector; with push-buttons and strain relief plate; 5 mm pin spacing; 6-pole; light gray	2721-106/026-9037/134-000
1-conductor female connector; with push-buttons; locking levers and strain relief plate; 5 mm pin spacing; 6-pole; light gray	2721-106/037-9037/134-000

Direct marking of 3- to 5-pole; 1-conductor male connectors with preceding ground contact; perpendicular to conductor entry; pole assignment; item no. suffix.: /... - 041

Version	Item No. Example
1-conductor male connector; with preceding ground contact; 5 mm pin spacing 5-pole; light gray	721-605/000-041
1-conductor male connectors in 3- to 5-pole versions (721 and 723 Series) are available with the following markings:	
3-pole: N - 3 - L 1	
4-pole: L 2 - 3 - N - L 1	
5-pole: L 3 - N - 3 - L 2 - L 1	
Pole no. ... 1; item no. suffix.: /... - 043	

Direct marking of 3- to 5-pole; 1-conductor female connectors for 1-conductor male connectors with preceding ground contact; perpendicular to conductor entry; pole assignment; item no. suffix.: /... - 046

Version	Item No. Example
1-conductor female connector; with preceding ground contact; 5 mm pin spacing 5-pole; light gray	721-105/026-046
1-conductor female connectors in 3- to 5-pole versions (721, 2721, 722 and 723 Series) for 1-conductor male connectors with preceding ground contact are available with the following markings:	
3-pole: L 1 - 3 - N	
4-pole: L 1 - N - 3 - L 2	
5-pole: L 1 - L 2 - 3 - N - L 3	
1 ... pole no.; item no. suffix.: /... - 047

9-pole	280-439	30 (1)
10-pole	280-440	30 (1)

Operating tool; insulated; operation perpendicular to conductor entry; suitable for male and female connectors with CAGE CLAMP®; 5/5.08 mm pin spacing

	Item No.	PU (SPU)
2-pole	209-132	40 (1)

Test plug adapter; for female connectors; light gray

Pin Spacing	Item No.	PU
5/5.08 mm	231-661	100
7.5/7.62 mm	231-662	100

Inserting male or female connectors with long contact pins into 280 Series Rail-Mount Terminal Blocks via multipole operating tool (max. 10-pole for field assembly). Using CAGE CLAMP®-equipped male and female connectors (5/5.08 mm pin spacing), this operating tool allows up to ten CAGE CLAMP® units to be opened simultaneously, e.g., when inserting 231-90x Comb-Style Jumper Bars. Wiring male or female connectors should be performed in a suitable mount.

Operating tool for 231-90x Comb-Style Jumper Bars

Test plug adapter with CAGE CLAMP® connection

Coding key; for male headers; 7.5/7.62 mm pin spacing		
Color	Item No.	PU
○ light gray	231-130	100

9

Inserting separators for group formation directly into MCS MIDI Classic Male Headers. Group formation using separators means that pole count is reduced by at least one pole. Female connectors with integrated end plates and 5/5.08 mm pin spacing are available for group formation without loss of poles. Group formation without loss of poles is possible using standard female connectors (7.5/7.62 mm pin spacing) without separators.

Snap-on coding key for male headers with solder pins and CAGE CLAMP®-equipped male connectors. The last pole of male and female connectors with 7.5 mm pin spacing has a width of 5 mm; for 7.62 mm pin spacing, the pole width is 5.08 mm. Always use a 231-129 Coding Key for coding this pole.

Coding a THT double-deck male header – lower level.

Lockout Caps; Insulation Stops and Locking Devices MCS MIDI

Screw with nut		
M2 x 12 mm	231-195	100
Self-tapping screw; 1.8 mm Ø mounting hole		
B 2.2 x 13 mm	231-194	100

Sealing unnecessary clamping points in CAGE CLAMP®-equipped male and female connectors (e.g., when doubling the pin spacing to meet clearance and creepage distance requirements, or when higher rated voltage is required). Lockout pins are not suitable for panel-mount, angled female connectors.

The wiring of programmable logic controllers and micro-processor-operated control circuits often relies on very small, fine-stranded conductors. These conductors are highly flexible and deform when pushed against the conductor stop in terminal blocks. As a result, the conductor insulation – not the copper conductor – may be clamped, causing intermittent contact or no contact at all. Common to all terminal block types currently offered, this problem creates unnecessary downtime for troubleshooting.

Insulation stops for connectors reliably ensure proper termination. Insulation stops automatically bundle the cores of fine-stranded conductors when inserted into the clamping unit, preventing splaying. This also limits the conductor entry to a defined cross sectional area – ensuring the actual conductor, not the insulation, will enter the clamping unit

Insulation stops are available as dividable 5-pole strips for MCS MIDI Male and Female Connectors. Insulation stop usage will not affect the conductor strip lengths for the aforementioned connectors.

Insulation stops are not suitable for panel-mount female connectors.

Locking devices enhance connection reliability between male headers with angled solder pins and the PCB. This substantially reduces mechanical stress on both solder pins and joints, particularly when dealing with small lengths and frequent mating cycles.

Strain Relief Plate; Factory assembled; for Male and Female Connectors with CAGE CLAMP® Connection MCS MIDI

9

Both CAGE CLAMP®-equipped male and female connectors can be fitted with a strain relief plate. The strain relief plates must be pre-assembled (glued) prior to delivery for connector models equipped with CAGE CLAMP® connection. These strain relief plates are available in four different widths and are allocated to the specific pin spacing and pole number (as shown above). Angled female connectors for panel mounting cannot be fitted with strain relief plates.

*An "item no. suffix," referring to the width of the strain relief plate, is added to the "basic item no.," and determines the type of male or female connector.

Cable ties and binding tools are not offered by WAGO.
The width of the cable ties must correspond to the hole dimensions of the strain relief plates shown above.

Ordering example:
1-conductor female connector,
with strain relief plate,
5.08 mm pin spacing, 12-pole, orange:
231-312/026-000/035-000

Ordering example:
1-conductor female connector,
with strain relief plate,
5 mm pin spacing, 3-pole, gray:
231-103/026-000/032-000

Gray strain relief plates are used for light gray 721, 722 and 723 Series Male and Female Connectors equipped with CAGE CLAMP® connection.

Strain Relief Plate; for Male and Female Connectors with Push-in CAGE CLAMP® Connection; 2721, 2231 Series and 2-conductor 231, 721 Series MCS MIDI

For inserting; 5/5.08 mm pin spacing

For inserting; 7.5/7.62 mm pin spacing

Female connectors with Push-in CAGE CLAMP® can be retrofitted with a strain relief plate or pre-assembled with one at the factory. These strain relief plates are available in six different widths and are allocated to the specific pin spacing and pole number (as shown left). The arrangement of the attachments for cable ties allows single conductors or multi-core cables to be secured in different ways.

*An "item no. suffix," referring to the width of the strain relief plate, is added to the "basic item no." and determines the type of male or female connector.

Cable ties and binding tools are not offered by WAGO. The width of the cable ties must correspond to the hole dimensions of the strain relief plates shown above.

○ gray	209-148	25

Mounting adapter; for DIN-35 rail; for angled female connectors with snap-in feet for panel mounting

Color	Item No.	PU (SPU)
○ gray	209-120	500(25)

Female connector with snap-in mounting feet and 209-189 Mounting Adapter on DIN-35 rail

Multi mounting adapter (209-120) on DIN-35 rail and angled female connector with snap-in feet for panel mounting

The pluggable male or female connector can also be fitted with a strain relief plate.

The adapter can be marked either with WSB, Mini-WSB or WMB markers.

Both male and female connectors remain pluggable when they are mounted on the multi mounting adapter via its oblong holes or open grooves (A/B).

If a connector is pushed from the side into the open grooves (A/B) of the multi mounting adapter, the plug connection will be reliably protected from unintentional disconnection when mounted.

Rated voltage	320 V
Rated surge voltage	4 kV
Rated current	12 A (2-pole) 16 A (3... 7-pole)

Notice:
Not suitable for female connectors equipped with Push-in CAGE CLAMP® connection and angled, panel-mount female connectors.

Comb-style jumper bar reduces maximum conductor cross-section to 1.5 mm².

Notice:
Insert jumper bar according to direction of symbols.
□ symbol correlates to the direction of the operating slot.

Notice:
Insert jumper bar according to direction of symbols.
○ symbol correlates to the direction of the conductor entry.

Custom comb-style jumper bars are created by breaking off jumper contacts (3 contacts and more).

Inserting a comb-style jumper bar via multipole operating tool – with the female or male connector being supported in a suitable holding device.

Commoning a female connector with 231-902 Comb-Style Jumper Bar via 2-pole operating tool.

Both male and female connectors can be pre-assembled with comb-style jumper bars upon request.

Notice: Comb-style jumper bars reduce the conductor cross-section to 1.5 mm² "s" + "f-st."

Application Examples

PCB Connectors and Headers

MCS MIDI Classic

①*Male header with straight solder pins
②*Female connector with CAGE CLAMP®

①*Male header with straight solder pins
②*Angled female connector, conductor entry same direction as latches

① Male header with straight solder pins
② Angled female connector, conductor entry opposite of latches

①*Male headers with straight solder pins**
②*Female connectors with CAGE CLAMP®

**Rear male header must be coded prior to soldering!

①*Male headers with straight solder pins**
②*Angled female connector, conductor entry same direction as latches
③*Female connector with CAGE CLAMP®

**Rear male header must be coded prior to soldering!

① Male header with angled solder pins
② Male header with straight solder pins
③ Female connector with CAGE CLAMP®
④ Angled female connector, conductor entry opposite of latches

9

①*Male header with angled solder pins
②*Female connector with CAGE CLAMP®

① Male header with angled solder pins
② Angled female connector, conductor entry opposite of latches

①*Male header with angled solder pins
②*Angled female connector, conductor entry same direction as latches

① Male header with angled solder pins
② Male header for double-deck assembly
③ Female connectors with CAGE CLAMP®

① Male header with angled solder pins
② Male header for double-deck assembly
③ Angled female connector, conductor entry opposite of latches
④ Female connector with CAGE CLAMP®

① Male header with angled solder pins
② Male header for double-deck assembly
③ Female connector with CAGE CLAMP®
④ Angled female connector, conductor entry same direction as latches

*also available in version "100 % protected against mismatching" (see Section 5)

Application Examples

PCB Connectors and Headers

MCS MIDI Classic

- ① Male header with angled solder pins
- ② Male header for double-deck assembly
- ③ Angled female connector, conductor entry opposite of latches
- ④ Angled female connector, conductor entry same direction as latches

Angled female connectors are available with conductor entries in the same direction as latches, or opposite of latches. This allows different conductor entry directions with the same mounting direction of the male headers. Angled female connectors with conductor entry opposite of latches are not available in versions that are 100 % protected against mismatching. Male headers and female connectors allow touch-proof supply to the PCB. Female headers and male connectors equipped with CAGE CLAMP® allow touch-proof supply from the PCB. These combinations can also be used for coding different circuits.

Female connectors with strain relief plate

- ①*Female connector with straight solder pins
- ②*Male connector with CAGE CLAMP®

- ①*Female connector with straight solder pins
- ②*Male header with straight solder pins**
- ③*Male connector with CAGE CLAMP®
- ④*Female connector with CAGE CLAMP®

**Male header must be coded prior to soldering!

- ①*Male header with straight solder pins
- ②*Female header with straight solder pins
- ③*Angled female connector, conductor entry same direction as latches
- ④*Male connector with CAGE CLAMP®

- ①*Male header with angled solder pins
- ②*Female header with straight solder pins
- ③*Female connector with CAGE CLAMP®

MCS MAXI 6

Description and Installation

Inserting fine-stranded conductors via (5.5 x 0.8) mm screwdriver.

Inserting solid and ferruled conductors via push-in termination.

Male connector mounted on a DIN-35 rail via integrated mounting adapter.

Testing with 2 mm Ø test plug.

Break or cut off coding pin from female connector.

Insert coding pin into male header (break first) until it engages.

Marking via WMB or Mini-WSB marking strips.

Labeling via direct marking.

Fine-stranded conductor with ferrule with plastic collar	0.75 ... 16 mm ²
Fine-stranded conductor with ferrule without plastic collar	0.75 ... 16 mm ²

Material Data

Material group	I
Insulating material	Polybutylene terephthalate (PBT)
Flammability class per UL94	V0
Clamping spring material	Chrome nickel spring steel (CrNi)
Contact material	Electrolytic copper (Ecu)
Contact plating	Silver-plated

Environmental Requirements

Limit temperature range	-60 ... +120 °C
-------------------------	-----------------

10

The *MULTI CONNECTION SYSTEM (MCS)* is designed without breaking capacity for compliance with DIN EN 61984. When used as intended, MCS Connectors shall not be connected/disconnected when live or under load. The circuit design should ensure header pins, which can be touched, are not live when unmated.

THT Male Header ▶ MCS MAXI 16 ▶ 832 Series

Pin spacing: 10.16 mm (0.4 inch) ▶ Solder pin dimensions: 1.2 x 1.2 mm ▶ Color: light gray

- Male header may be mounted horizontally or vertically via straight or angled solder pins
- Three solder pins per pole provide high electrical and mechanical stability
- Mating face (IP2XB) with higher protection against accidental contact
- 100 % protected against mismatching
- Coding via coding fingers

Direct Marking MCS MAXI 6

Direct marking of female connectors; parallel to conductor entry; 1 ... pole no.; item no. suffix.: /... - 9037

Version	Item No. Example
1-conductor female connector; 6-pole; light gray	831-3106/000-9037
1-conductor female connector; with locking levers; 6-pole; light gray	831-3106/037-9037

Direct marking of male connectors; parallel to conductor entry; pole no. ... 1; item no. suffix.: /... - 9034

Version	Item No. Example
1-conductor male connector; 6-pole; light gray	831-3206/000-9034
1-conductor male connector; for DIN-35 rail mounting; 6-pole, light gray	831-3206/007-9034

Strain Relief Plates and Coding Pins

MCS MAXI 6

Strain relief plate; for inserting; light gray			
Pole No.	Width	Item No.	PU
2 ... 3	15 mm	831-503	96 (24)
4 ... 6	30 mm	831-505	48 (24)
7 ... 9	51 mm	831-506	48 (24)

Strain relief plate; factory assembled; light gray		
Pole No.	Width	Item No. Suffix *
2 ... 3	15 mm	.../133-000
4 ... 6	30 mm	.../135-000
7 ... 9	51 mm	.../136-000

*An "item no. suffix," referring to the width of the strain relief plate, is added to the "basic item no." and determines the type of male or female connector.

10

The arrangement of the attachments for cable ties allows single conductors or multi-core cables to be secured in different ways. The width of the cable ties must correspond to the hole dimensions of the strain relief plates shown above.

Cable ties and binding tools are not offered by WAGO.

Strain relief plate for field assembly

Strain relief plate; pre-assembled; 1-conductor female connector; 4-pole; 7.62 mm pin spacing; light gray (831-3104/135-000)

Coding Pins MCS MAXI 6; MCS MAXI 16

Pluggable PCB Connectors

252 and 243 Series

Description and Installation

PUSH WIRE®

Inserting a conductor using pliers until it hits backstop – directly on the PCB or wiring prior to mounting on PCB.

Removing a PCB connector strip to replace the board.

Removing a conductor via push-button – 252 Series

Testing – 243 Series

252 Series

Removing a conductor using pliers – twisting alternately left and right – 243 Series

Conductor termination directly on the PCB or wiring prior to mounting on PCB – 252 Series

Solder pin strip with strain relief, 4-pole

Plugging a compact PCB connector – 252 Series.

11

Pluggable PCB Connectors 806 Series Description and Installation

Inserting solid conductors via push-in termination.
Inserting/removing fine-stranded conductors: Open the clamping unit using a screwdriver and insert a stripped conductor until it hits backstop.

Conductor termination directly on the PCB or wiring prior to mounting on PCB

Mixed-color PCB connector strips (with or without spacer) are available upon request.

806 Series

2-Conductor PCB Connector ▶ 252 Series

PUSH WIRE® ▶ Actuation type: Push-button ▶ 0.8 mm² ▶ Pin spacing: 3.5 mm (0.138 inch) ▶ Terminal strip ▶ Color: gray

- Compact, 2-conductor PCB connectors with push-buttons and PUSH WIRE® connection
- Push-in termination of solid conductors – conductor removal via push-buttons
- Double entries for power supply and distribution
- Quick and easy PCB replacement
- Loop connection is retained, even when unmated
- Group arrangement is possible without losing any poles

Feedthrough Terminal Blocks

826 Series

Description and Installation

CAGE CLAMP®

Insert the terminal strip into the cutout until the stop hits the enclosure wall.

Secure the terminal strip to the inner side of the cutout via retaining clips.

Push retaining clips until stop and press together in the direction of the terminal strip center.

Automatic, double contact of the ground contact to the enclosure wall

Inserting a conductor via screwdriver.

826 Series

12

Testing with 2 mm or 2.3 mm Ø test plug.

Labeling via Mini-WSB makers – directly on the terminal blocks.

Self-adhesive marking strips adhere directly on the retaining clips.

Feedthrough Terminal Blocks 231, 731 and 226 Series Description and Installation

Feedthrough PCB terminal strips – front-entry conductor termination

Feedthrough PCB terminal strips can be used as front-panel feedthrough for external conductor termination.

With flanges for PCB or front-panel mounting – either flush with enclosure or protruding

231, 731 and 226 Series

12

Snapping a 226 Series Feedthrough Terminal Block into the cutout.

Testing with 2 mm Ø test plug – touch contact.

Feedthrough terminal strips with mounting flanges

Feedthrough Terminal Block ▶ 826 Series

CAGE CLAMP® ▶ Actuation type: Operating tool ▶ Mounting type: Locking claw ▶ 4 mm² ▶ Pin spacing: 7 mm (0.276 inch) ▶ Color: gray

- Feedthrough terminal blocks with screwdriver-actuated CAGE CLAMP® on both sides
- Easy, tool-free installation
- Direct ground contact with enclosure/panel
- Test ports available on both sides

Electrical Data			
Pin spacing	7 mm (0.276 inch)		
Ratings per	IEC/EN 60664-1		
Overvoltage category	III	III	II
Pollution degree	3	2	2
Rated voltage	320 V	320 V	630 V
Rated impulse voltage	4 kV	4 kV	4 kV
Rated current	32 A	32 A	32 A
Approvals per	UL 1059		
Use Group	B	C	D

CAGE CLAMP® ▶ Actuation type: Lever ▶ Mounting type: Locking claw ▶ 16 mm² ▶ Pin spacing: 11.5 mm (0.453 inch) ▶ Terminal strip ▶ Housing sheet thickness (max.): 3 mm ▶ Color: gray

- Panel feedthrough terminal blocks with screwdriver-actuated CAGE CLAMP® on both sides
- Easy, tool-free installation
- Tool-free termination – fingers open/close levers
- Several clamping units can be held open simultaneously – convenient for terminating multi-core cables
- 600 V UL

Wire-Tap Branch Connectors, 3-Pole 730 Series Description and Installation

Press conductor into strain relief fingers.

Place upper and lower part of the socket into pre-locking position.

Press into final position using pliers.

Insert conductors via screwdriver – 3-pole plug equipped with CAGE CLAMP®.

Three-pole socket includes:

- 1 IDC
- 2 CAGE CLAMP®
- 3 Isolation blade
- 4 IDC contacted ground conductor
- 5 Cut and IDC contacted "live" conductor

730 Series, 3-pole

13

Snapping socket halves together will automatically cut and terminate a "live" conductor without stripping – enables switching applications (e.g., door switches).

Insert plug into socket.

Wire-Tap Branch Connectors, 6-Pole

730 Series

Description and Installation

Insert conductors via screwdriver – 6-pole plug equipped with CAGE CLAMP®.

Press conductors into strain relief fingers.

Place upper and lower part of the socket into pre-locking position.

730 Series

Press into final position using pliers.

Insert plug into socket.

Marking via side marker carrier.

Testing via 2.3 mm Ø test plug.

Female Connector ▶ 730 Series

Pole No.: 3 ▶ IDC ▶ Color: orange

- Sockets with IDC connection for tapping individual conductors without stripping
- Three-pole sockets automatically cut "live" conductors (e.g., door switches in elevator shafts)
- Sockets available with additional fixing flanges

4-Conductor Modular PCB Connector ▶ 243 Series for KNX/EIB Bus Coupler Units ▶ PUSH WIRE®

Color	Item No.	PU (SPU)
○ light gray/yellow	243-212	500 (50)
○ dark gray/red	243-211	500 (50)

The KNX bus system is the intelligent solution to simplify existing building installation control. Instead of many different conventional wiring styles, the KNX bus system offers a flexible general solution for every application in the field of switching, controlling, measuring, monitoring and signaling. The decentralized KNX system consists of active and intelligent modules. The system can be customized using the different KNX components. For example, pairs of sensors/actuators control: – lighting – window blinds – heating/ventilation – energy management systems – information display/transmission Command Data is transmitted via twisted-pair bus cable, which is connected to the sensors and actuators by WAGO PUSH WIRE® connectors. The sensors transmit the commands as „telegrams“ to the actuators via the bus. Once the information is gathered, the commands are performed by the actuators. An address is assigned to each „telegram“ so that only a defined transmitter is allowed to activate a specified receiver. The address assignment is done using a programming tool. The bus system is divided into „lines“ (segments). The bus lines can be laid out either in a line, star or tree topology. WAGO's PUSH WIRE® connectors connect the different branches to one another in the junction boxes. New components can be easily added to the existing bus, permitting future expansion of the installation. When future reallocation of rooms, floors or buildings is required, the installation remains unchanged, so that only the sensors must be reassigned to the actuators.

12.5 mm wide housing		
Description	Item No.	PU
2-2 connection levels; 2-2 jumper slots	2857-101	10
3-2 connection levels; 0-2 jumper slots	2857-102	10
3-3 connection levels; 0-0 jumper slots	2857-103	10

Technical Data: Empty Housing	
Dimensions (mm) W x H x D	12.5 x 107 x 108 (2857-101) 12.5 x 107 x 110 (2857-102) 12.5 x 107 x 112 (2857-103) Height from upper-edge of DIN-35 rail
Power loss	2 W

Accessories		
Description	Item No.	PU
Coding pin carrier	2092-1610	1
Jumpers	859-402	1

22.5 mm wide housing		
Description	Item No.	PU
2-2 connection levels; 2-2 jumper slots	2857-121	5
3-2 connection levels; 0-2 jumper slots	2857-122	5
3-3 connection levels; 0-0 jumper slots	2857-123	5
1-1 connection levels; 2-2 jumper slots	2857-124	5

Technical Data: Empty Housing	
Dimensions (mm) W x H x D	22.5 x 107 x 108 (2857-121) 22.5 x 107 x 110 (2857-122) 22.5 x 107 x 112 (2857-123) 22.5 x 107 x 105 (2857-124) Height from upper-edge of DIN-35 rail
Power loss	3 W

DIN-Rail Mount PCB Carriers 288 Series

Mounting carrier (size 1)

Length calculation for a complete mounting carrier:

- PCB length: L1
- Base length: L2 = L1 - 11 mm
- Mounting carrier length: L3 = L1 + 2 mm
- Lateral cover (size 1): 6.35 mm thick
- Free space between base and PCB (when using upper PCB groove): 5 mm
- PCB tolerances: 1.5 mm ± 0.2 mm (thickness); ± 0.2 mm (length/width); -0.1/+0.3 for milling contours

Mounting carrier; size 1		
Description	Item No.	PU
Lateral cover; size 1; small; 6.35 mm thick	288-601	1
Mounting foot for DIN-35 rail	288-602	1
Carrier base; size 1; 1 m long	288-600	1

Mounting carrier (size 2)

Length calculation for a complete mounting carrier:

- PCB length: L1
- Base length: L2 = L1 - 15.8 mm
- Mounting carrier length: L3 = L1 + 2 mm
- Cover length: L4 = L1
- Lateral cover (size 2): 8.75 mm thick
- Free space between base and PCB (when using upper PCB groove): 5 mm
- PCB tolerances: 1.5 mm ± 0.2 mm (thickness); ± 0.2 mm (length/width); -0.1/+0.3 for milling contours

Mounting carrier; size 2		
Description	Item No.	PU
Lateral cover; size 2; small; 8.75 mm thick	288-621	1
Mounting foot for DIN-35 rail	288-622	1
Carrier base; size 2; 1 m long	288-620	1

DIN-Rail Mount PCB Carriers 288 Series

Mounting carrier (size 2)

Length calculation for a complete mounting carrier:

- PCB length: L1
- Base length: L2 = L1 - 15.8 mm
- Mounting carrier length: L3 = L1 + 2 mm
- Cover length: L4 = L1
- Lateral cover (size 2): 8.75 mm thick
- Free space between base and PCB (when using upper PCB groove): 5 mm
- PCB tolerances: 1.5 mm ± 0.2 mm (thickness); ± 0.2 mm (length/width); -0.1/+0.3 for milling contours

Mounting carrier; size 2; with cover		
Description	Item No.	PU
Lateral cover; size 2; large; 8.75 mm thick	288-626	1
Cover; size 2; 1 m long	288-627	1

Accessories; for all products on this page

Marking strips

Description	Item No.	PU
Phillips screw 2.9 x 13*	210-533	25
Marking strip 7.5 x 0.5 mm; 1 m long; translucent	709-196	1

* Two pieces per lateral cover; for a module length of 35 mm or higher; lateral covers must be riveted for smaller modules. Rivet length depends on module length (rivets are not offered by WAGO).

DIN-Rail-Mount PCB Carriers and Feet Series 288

Mounting carrier			
Description		Item No.	PU
Mounting carrier	For screw mounting or DIN-rail mounting via universal snap-on type mounting feet (to be ordered separately)	288-001	1
Universal mounting foot	Snap-on type; for DIN-15, DIN-32 and DIN-35 rails	288-002	10
Mounting carrier for PCBs	Suitable for a "Eurocard" PCB (100 x 160 mm)	288-003	1

Marking Card; Self-Adhesive Marking Strips

Marking MCS Connectors – parallel to conductor entry.

Marking MCS Connectors – perpendicular to conductor entry.

Marking PCB terminal blocks (256 Series).

Marking card for 2.5 mm pin spacing; for 218, 233, 234, 250 Series and MCS MICRO male and female connectors; Marking perpendicular to conductor entry

Marking	Strip height	Item No.	Pack. Unit
1 ... 16 (400 x)	2.3 mm	210-331/250-202	1 card/100 strips
17 ... 32 (400 x)	2.3 mm	210-331/250-204	1 card/100 strips
33 ... 48 (400 x)	2.3 mm	210-331/250-206	1 card/100 strips
1 ... 48 (400 x)	2.3 mm	210-331/250-207	1 card/100 strips

Marking card for 2.54 mm pin spacing; for 218, 233, 234, 250 Series

Marking	Strip height	Item No.	Pack. Unit
1 ... 16 (400 x)	2.3 mm	210-331/254-202	1 card/100 strips
17 ... 32 (400 x)	2.3 mm	210-331/254-204	1 card/100 strips
33 ... 48 (400 x)	2.3 mm	210-331/254-206	1 card/100 strips
1 ... 48 (100 x)	2.3 mm	210-331/254-207	1 card/100 strips

Marking card for 3.5 mm pin spacing; for 250, 252, 739, 805 Series and MCS MINI male and female connectors; Marking perpendicular to conductor entry

Marking	Strip height	Item No.	Pack. Unit
1 ... 16 (240 x)	3 mm	210-332/350-202	1 card/80 strips
17 ... 32 (240 x)	3 mm	210-332/350-204	1 card/80 strips
33 ... 48 (240 x)	3 mm	210-332/350-206	1 card/80 strips

Marking card for 3.81 mm pin spacing; for 235, 734, 735, 739 Series

Marking	Strip height	Item No.	Pack. Unit
1 ... 16 (160 x)	3 mm	210-332/381-202	1 card/80 strips
17 ... 32 (160 x)	3 mm	210-332/381-204	1 card/80 strips
33 ... 48 (160 x)	3 mm	210-332/381-206	1 card/80 strips
1 ... 32 (80 x)	3 mm	210-332/381-205	1 card/80 strips

Marking card for 3.96 mm pin spacing; for 235 Series

Marking	Strip height	Item No.	Pack. Unit
1 ... 16 (160 x)	3 mm	210-332/396-202	1 card/80 strips
17 ... 32 (160 x)	3 mm	210-332/396-204	1 card/80 strips
33 ... 48 (160 x)	3 mm	210-332/396-206	1 card/80 strips
1 ... 32 (80 x)	3 mm	210-332/396-205	1 card/80 strips

Marking card for 4 mm pin spacing; for 235 Series

Marking	Strip height	Item No.	Pack. Unit
1 ... 16 (160 x)	3 mm	210-332/400-202	1 card/80 strips
17 ... 32 (160 x)	3 mm	210-332/400-204	1 card/80 strips
33 ... 48 (160 x)	3 mm	210-332/400-206	1 card/80 strips
1 ... 32 (80 x)	3 mm	210-332/400-205	1 card/80 strips

Marking Card; Self-Adhesive Marking Strips

Marking card for 5 mm pin spacing; for 235, 236, 250, 253, 254, 255, 256, 257, 736, 737, 738, 739, 740, 741, 745, 806, 816 Series and MCS MIDI male and female connectors; Marking perpendicular to conductor entry

Marking	Strip height	Item No.	Pack. Unit
1 ... 16 (160 x)	3 mm	210-332/500-202	1 card/80 strips
17 ... 32 (160 x)	3 mm	210-332/500-204	1 card/80 strips
33 ... 48 (160 x)	3 mm	210-332/500-206	1 card/80 strips
1 ... 32 (80 x)	3 mm	210-332/500-205	1 card/80 strips

Marking card for 5 mm pin spacing; for 804 Series and MCS MIDI male and female connectors with CAGE CLAMP® connection; Marking parallel to conductor entry

Marking	Strip height	Item No.	Pack. Unit
1 ... 12 (300 x)	2.3 mm	210-331/500-103	1 card/100 strips
13 ... 24 (300 x)	2.3 mm	210-331/500-104	1 card/100 strips

Marking card for 5.08 mm pin spacing; for 235, 236, 254, 255, 256, 257, 736, 737, 738, 739, 741 Series and MCS MIDI male and female connectors; Marking perpendicular to conductor entry

Marking	Strip height	Item No.	Pack. Unit
1 ... 16 (160 x)	3 mm	210-332/508-202	1 card/80 strips
17 ... 32 (160 x)	3 mm	210-332/508-204	1 card/80 strips
33 ... 48 (160 x)	3 mm	210-332/508-206	1 card/80 strips
1 ... 32 (80 x)	3 mm	210-332/508-205	1 card/80 strips

Marking card for 5.08 mm pin spacing; for MCS MIDI male and female connectors with CAGE CLAMP® connection; Marking parallel to conductor entry

Marking	Strip height	Item No.	Pack. Unit
1 ... 12 (200 x)	2.3 mm	210-331/508-103	1 card/100 strips
13 ... 24 (200 x)	2.3 mm	210-331/508-104	1 card/100 strips

Marking card for 5.75 mm pin spacing; for 243 Series

Marking	Strip height	Item No.	Pack. Unit
1 ... 12 (160 x)	3 mm	210-332/575-103	1 card/80 strips

Marking card for 7 mm pin spacing; for 826 Series

Marking	Strip height	Item No.	Pack. Unit
1 ... 12 (160 x)	3 mm	210-332/700-103	1 card/80 strips
12 ... 1 (160 x)	3 mm	210-332/700-102	1 card/80 strips

Marking card for 7.5 mm pin spacing; for 235, 236, 239, 250, 254, 255, 256, 257, 736, 737, 739, 741, 746, 745 Series and MCS MIDI male and female connectors; Marking perpendicular to conductor entry

Marking	Strip height	Item No.	Pack. Unit
1 ... 20 (80 x)	3 mm	210-332/750-020	1 card/80 strips

Marking card for 7.5 mm pin spacing; for 804 Series and MCS MIDI male and female connectors with CAGE CLAMP® connection; Marking parallel to conductor entry

Marking	Strip height	Item No.	Pack. Unit
1 ... 16 (100 x)	2.3 mm	210-331/750-202	1 card/100 strips

Marking card for 7.62 mm pin spacing; for 235, 236, 254, 255, 256, 257, 736, 737, 739, 741 Series and MCS MIDI male and female connectors; Marking perpendicular to conductor entry

Marking	Strip height	Item No.	Pack. Unit
1 ... 20 (80 x)	3 mm	210-332/762-020	1 card/80 strips

Marking card for 7.62 mm pin spacing; for MCS MIDI male and female connectors with CAGE CLAMP® connection; Marking parallel to conductor entry

Marking	Strip height	Item No.	Pack. Unit
1 ... 16 (100 x)	2.3 mm	210-331/762-202	1 card/100 strips

Marking Card; Self-Adhesive Marking Strips

Marking card for 7.62 mm pin spacing; for MCS MAXI male and female connectors			
Marking	Strip height	Item No.	Pack. Unit
1 ... 16 (100 x)	5 mm	210-334/762-202	1 card/48 strips

Marking card for 10 mm pin spacing; for 235, 236, 254, 255, 256, 257, 736, 737, 741, 745 Series			
Marking	Strip height	Item No.	Pack. Unit
1 ... 16 (80 x)	3 mm	210-332/1000-202	1 card/80 strips
17 ... 32 (80 x)	3 mm	210-332/1000-204	1 card/80 strips
33 ... 48 (80 x)	3 mm	210-332/1000-206	1 card/80 strips

Marking card for 10.16 mm pin spacing; for 235, 236, 254, 255, 256, 257, 736, 737, 741 Series			
Marking	Strip height	Item No.	Pack. Unit
1 ... 16 (80 x)	3 mm	210-332/1016-202	1 card/80 strips
17 ... 32 (80 x)	3 mm	210-332/1016-204	1 card/80 strips
33 ... 48 (80 x)	3 mm	210-332/1016-206	1 card/80 strips

Marking card available for all pin spacings:			
Marking	Strip height	Item No.	Pack. Unit
plain*	2.3 mm	210-331	1 card/100 strips
plain*	3 mm	210-332	1 card/80 strips
plain*	5 mm	210-334	1 card/48 strips
Only separators printed	2.3 mm	210-331/xxxx-001	1 card/100 strips
Only separators printed	3 mm	210-332/xxxx-001	1 card/80 strips
Only separators printed	5 mm	210-334/xxxx-001	1 card/48 strips
Ordering example: 5.08 mm pin spacing; 3 mm strip height: 210-332/508-001		(xxxx = pin spacing)	

* Plain marker cards can be printed via WAGO Smart Script.

WAGO Smart Script is part of the WAGO ProServe® Software. You can download this free software at www.wago.com.

Sticker with Operating Instructions

Sticker with operating instructions; for PCB terminal blocks with CAGE CLAMP® connection; Size: (60 x 63) mm

DIN-Rail

For the entire range of WAGO DIN-rail types, refer to Full Line Catalog, Volume 1, Rail-Mount Terminal Block Systems, or visit www.wago.com.

Dimensions in mm

Steel DIN-rail; I_N 76 A (based on 1 m length); 35 x 7.5 mm; 1 mm thick; 2 m long; per EN 60715

	Item No.	Pack. Unit
unslotted	210-113	10 (1)

Hole width: 25 mm; Hole spacing: 36 mm

slotted	210-112	10 (1)
---------	---------	--------

Hole width: 18 mm; Hole spacing: 25 mm

slotted	210-115	1
---------	---------	---

Dimensions in mm

Steel DIN-rail; I_N 125 A (based on 1 m length); 35 x 15 mm; 1.5 mm thick; 2 m long; similar to EN 60715

	Item No.	Pack. Unit
unslotted	210-114	10 (1)
slotted	210-197	10 (1)

Screw

Self-tapping screw; for 1.8 mm Ø mounting hole

Dimensions	Item No.	Pack. Unit
B 2.2 x 9.5 mm	209-147	200 (100)
B 2.2 x 13 mm	231-194	200 (100)

Screw with nut; e.g., for locking device or mounting flange

Dimensions	Item No.	Pack. Unit
M 2 x 12 mm	231-195	200 (100)
M 2.5 x 10 mm	231-295	200 (100)

The innovative flange design provides standard panel mounting options or various through-panel mounting configurations. Depending on the type of application and flange, female headers can be used either for through-panel or flush mounted applications.

Locking devices enhance connection reliability between male headers with angled solder pins and the PCB. This substantially reduces mechanical stress on both solder pins and joints, particularly when dealing with small lengths and frequent mating cycles.

Operating Tool

Operating tool with a partially insulated shaft; Type 1; (2.5 x 0.4) mm blade

Item No.	Pack. Unit
210-719	50 (1)

Set of operating tools with a partially insulated shaft; Type 1; (2.5 x 0.4) mm blade; Type 2; (3.5 x 0.5) mm blade; Type 3; (5.5 x 0.8) mm blade

Item No.	Pack. Unit
210-722	1

Operating tool with a partially insulated shaft; Type 1; (2.5 x 0.4) mm blade; short

Item No.	Pack. Unit
210-647	50 (1)

Operating tool with a partially insulated shaft; Type 2; (3.5 x 0.5) mm blade

210-720	50 (1)
---------	--------

Operating tool with a partially insulated shaft; (3.5 x 0.5) mm blade; short; angled

210-658	50 (1)
---------	--------

Thanks to their blade dimensions, the offered operating tools are ideal for operating both PCB terminal blocks and MCS Connectors.

Set of operating tools in a box (210-722)

The offered operating tools with blade dimensions per DIN 5264 are ideal for operating PCB terminal blocks.

Operating Tool

Operating tool; for 233 and 733 Series		
	Item No.	Pack. Unit
metal; partially insulated; green	233-335	50 (1)
insulated; natural	233-332	500 (50)
insulated; yellow	233-331	500 (25)

Operating tool; for 236 Series		
	Item No.	Pack. Unit
insulated	236-332	400 (50)
metal	236-335	500 (1)

Connection tool; for IDC termination; for 251 Series		
	Item No.	Pack. Unit
	206-831	25 (1)

Compared to standard screwdrivers, these operating tools are far more convenient for wiring PCB terminal strips at factory.

Inserting a conductor via operating tool.

Operating Tool; Disconnection Tool

Disconnection tool; with two replacement blades in the handle; removes conductors from 251 Series PUSH WIRE® Connectors; "mini" version

Item No.	Pack. Unit
206-830	1

Disconnection tool; for 744 Series

Item No.	Pack. Unit
206-841	1

Operating tool, for male and female connectors equipped with CAGE CLAMP® connection, 5/5.08 mm and 7.5/7.62 mm pin spacings

Color	Item No.	Pack. Unit
● yellow	210-251	20
● red	210-250	20

Disconnection tool includes two replacement blades in the handle.

When operating the handles beyond the locked position, the ratchet allows the tool to open and be removed from the terminal block.

The operating pliers are placed into the upper operating slot of the rail-mount terminal block and the clamp is hooked into the lateral operating slot. The contact is fully opened by pressing the handles together until they engage. This will allow both hands to be used for wiring the terminal blocks.

Disconnection tool includes two replacement blades in the handle.

Cable Knife

Never use this tool on or near live electrical circuits!

Cable knife; for \varnothing 8 ... 28 mm / 0.31 ... 1.10 inch; with a unique, changeable cable bracket system; including cable bracket

	Item No.	Pack. Unit
	206-1403	1

Cable knife set; for \varnothing 4 ... 70 mm / 0.16 ... 2.75 inch; including all cable brackets in a Sortimo® Box

	Item No.	Pack. Unit

Cable Stripper

In-socket cable stripper; for Ø 8 ... 13 mm / 5/16 ... 1/2 inch

Item No.	Pack. Unit
206-1441	1

Universal cable stripper; for Ø 8 ... 13 mm / 5/16 ... 1/2 inch

Item No.	Pack. Unit
206-1442	1

Data cable stripper; for Ø 4.5 ... 10 mm / 3/16 ... 3/8 inch

Item No.	Pack. Unit
206-1451	1

Product features:

- Extra long design and improved force transmission simplifies stripping in deep device connection sockets
- Special four-blade design for an even more precise round cut
- No cutting depth adjustment required
- TiN-coated blades, TÜV/GS tested
- Ø 8 ... 13 mm / 5/16 ... 1/2 inch
- Strips all standard round cables, including NYM 3 x 1.5 mm² ... 5 x 2.5 mm²

Product features:

- Secure grip achieved with soft padding for non-slip grips
- Technically improved functionality
- New locking mechanism prevents the unwanted opening of the tool
- Absolutely straightforward, quick and easy longitudinal cuts – with innovative internal cable duct
- Redesigned blade layout and intake to stop cable waste from jamming the tool
- Durable and ergonomically designed pocket clip
- Ø 8 ... 13 mm / 5/16 ... 1/2 inch

Product features:

- Strip outer insulation and foil sheathing with one tool
- Ideal for stripping PVC-insulated data cables with thin insulation (e.g., Cat 5, Cat 6, Cat 7, twisted-pair cables)
- TiN-coated blades
- Ø 4.5 ... 10 mm / 3/16 ... 3/8 inch

Cable Stripper

Never use this tool on or near live electrical circuits!

The stripping pliers for sensor cables have a blade geometry specially designed for sensor cables with a smaller cross section and a working range from Ø 3.2 mm (for stranded cables and round cables with Ø 3.2 mm ... 4.4 mm / 0.13 ... 0.17 inch).

The stripping pliers for control cables are designed for stronger cables from Ø 4.4 mm (for stranded cables and round cables with Ø 4.4 mm ... 7 mm / 0.17 ... 0.27 inch).

These stripping pliers quickly and safely strip cables for connecting, e.g., sensor/actuator distribution boxes, bus couplers and pluggable connectors.

Suitable for:

- Halogen-free PUR sensor/actuator cables
- Highly flexible TPE-U cables
- Control cables
- PUR cables
- PUR/PVC cables
- PVC cables
- Multi-core cables
- Shielded and unshielded cables

Stripping pliers; for sensor cables

Wire Stripper

Wire stripper "Quickstrip Vario"; 0.03 ... 16 mm² / 34 ... 6 AWG

	Item No.	Pack. Unit
	206-1125	1

Accessories

Blade set; Standard; 0.03 ... 16 mm² / 34 ... 6 AWG

206-1126 1

Blade set; V-blade; 0.14 ... 4 mm² / 24 ... 12 AWG

206-1127 1

Blade set; Oval blade; 10 ... 16 mm² / 8 ... 6 AWG

206-1128 1

Spare stripping stop

206-1129 1

Spare cut protector

206-1131 1

Spare clamping jaws

206-1132 1

Cutting a conductor.

Partially stripping a conductor.

Wire Stripper:

- Automatically adjust to conductor size
- Stripping blades cause no damage to conductor strands
- Gripping pressure of jaws adjusts automatically to conductor insulation diameter
- Clamping jaws and stripping blades automatically open once the stripping process is completed – no splaying of the conductor strands
- Exact strip length may be set by sliding black setting stop
- Stripping blades can be replaced
- Self-sharpening, fully protected cutter (replaceable)
- Entire body made of glass-fiber-reinforced polyamide
- Cutting capacity of the wire cutter of fine-stranded conductors up to 16 mm² (6 AWG)

Crimping Tool

Crimping Tool "Variocrimp 4"; for insulated and uninsulated ferrules; Crimping range: 0.25 ... 4 mm² (24 ... 12 AWG)

Item No.	Pack. Unit
206-1204	1

Crimping Tool "Variocrimp 16"; for insulated and uninsulated ferrules; Crimping range: 6 mm² (10 AWG), 10 mm² (8 AWG) and 16 mm² (6 AWG)

Item No.	Pack. Unit
206-1216	1

Spring clamp; large

Crimping Tool

Crimping Tool 25; for insulated and uninsulated ferrules; crimping range: 10 mm² (8 AWG), 16 mm² (6 AWG) and 25 mm² (4 AWG)

Item No.	Pack. Unit
206-1225	1

Crimping Tool 50; for insulated and uninsulated ferrules; crimping range: 35 mm² (2 AWG) and 50 mm² (1/0 AWG)

Item No.	Pack. Unit
206-1250	1

Application notes:

- Improved crimping for higher conductor retention
- Crimping can be performed from either side (for left- or right-handed users).
- Built-in ratchet mechanism ensures gas-tight crimp connection.
- Crimping tools open automatically after crimping operation is complete.
- Ergonomically designed handles.

Insert the ferruled conductor into the crimping station.

Squeeze handles until ratchet mechanism is released.

What is a "gas-tight" connection?

In a gas-tight connection, the conductor and the ferrule are compressed, eliminating all spaces. Under normal atmospheric conditions, neither a liquid nor gaseous medium can penetrate the crimped connection. Oxidation between crimped single conductors is prevented, virtually eliminating the possibility of any increase in the crimped connection's resistance. In some exceptional cases, minute, isolated spaces may be present. However, these instances can be considered as closed off due to the twisted conductor.

Inadequate crimping can allow the conductor to be pulled out of the connection. Hollow spaces also remain, permitting oxidation formation and leading to an increase in contact resistance.

Elevated resistance is detrimental for both signal transmission (signal flow is damped) and power transmission, resulting in power loss and contact heating (risk of fire). Crimping tools with built-in ratchets are recommended (e.g., WAGO Crimping Tools). These tools open automatically after the crimping operation is complete. Space-saving crimping from all four sides is ideal for spring clamp termination.

Ferruled conductor cross sections specified for WAGO products are based on this crimping method.

Uninsulated Ferrule

Ferrule; uninsulated; electro-tin-plated; electrolytic copper; gastight crimped; per DIN 46288 (Part 4/09.09)

Conductor Cross Section	Strip Length	L	D	D 2	Item No.	Pack. Unit
25 mm ² / 4 AWG	25 mm / 0.98 inch	25	9,5	7,3	216-413	50

35 mm ² / 2 AWG	30 mm / 1.18 inch	30	11	8,3	216-424	50
50 mm ² / 1 AWG	30 mm / 1.18 inch	30	13	10,3	216-425	50
50 mm ² / 1 AWG	35 mm / 1.38 inch	35	13	10,3	216-435	50

Cable Cutter

Cable cutter; for copper and aluminum cables up to 35 mm² (2 AWG)

Item No.	Pack. Unit
206-118	1

Cutting a cable.

"Alu-Plus" Contact Paste

Terminating Aluminum Conductors

Syringe; contains 20 ml "Alu-Plus" Contact Paste

Item No.	Pack. Unit
249-130	20 (5)

Terminating Aluminum Conductors

WAGO spring clamp terminal blocks are suitable for solid aluminum conductors ① up to 4 mm²/12 AWG if WAGO "Alu-Plus" Contact Paste is used for termination.

Advantages of the "Alu-Plus" Contact Paste:

- Automatically destroys the oxide film during clamping.
- Prevents fresh oxidation at the clamping point.
- Prevents electrolytic corrosion between aluminum and copper conductors (in the same terminal block).
- Provides long-term protection against corrosion.

Using terminal blocks with CAGE CLAMP® Spring Pressure Connection Technology, **aluminum conductors must first be cleaned with a blade** and then immediately be inserted into the clamping units filled with "Alu-Plus" Contact Paste.

It is also possible to apply WAGO "Alu-Plus" **additionally** on the whole surface of the aluminum conductor before termination.

Please note that the nominal currents must be adapted to the reduced conductivity of the aluminum conductors:

$$2.5 \text{ mm}^2 (14 \text{ AWG}) = 16 \text{ A}$$

$$4 \text{ mm}^2 (12 \text{ AWG}) = 22 \text{ A}$$

WAGO "Alu-Plus" in the syringe offers a higher degree of reliability and cleanliness when terminating solid aluminum conductors.

Filling is, for example, quickly performed on WAGO PCB Terminal Trips:

① Aluminum conductors per IEC 61545 standard, Class B, "Alloy 1370" with 90 ... 180 N/mm² tensile strength and 1 ... 4 % elongation

Standard values: 90 ... 180 MPa tensile strength, 1 ... 4 % elongation (per EN 615.4.1)

WAGO Lighting Connectors

Push nozzle of the "Alu-Plus" syringe first into the circular entry and then into the square conductor entry hole of the WAGO Lighting Connector.

Press plunger down until the "Alu-Plus" has filled both entry holes.

Note: Not suitable for higher temperature applications!

Test and Measurement Devices

206 Series

Multi-Tester; digital multimeter with non-contact voltage tester

Item No.	Pack. Unit
206-810	1

Clamp-Multi-Tester

Item No.	Pack. Unit
206-816	1

Testboy; with integrated flashlight, non-contact voltage tester

Item No.	Pack. Unit
206-804	1

Multi-Tester features:

- Contact-less voltage test AC >100 V (optical and acoustical)
- Resistance measurement up to 20 MΩ
- Acoustical continuity test
- Diode test
- Data hold function
- Auto power-off function
- LED torch lamp function
- CAT IV 600 V
- TÜV/GS tested and approved
- IEC/EN 61010-1 (DIN VDE 0411)

Voltage testing in control cabinet

Clamp-Multi-Tester features:

- DC and AC current up to 600 A
- True RMS and min./max. value measurement
- DC and AC voltage up to 600 V
- Manual or automatic measurement range selection
- Resistance up to 60 MΩ
- Capacitance measurement, acoustical continuity test
- Diode test, data hold function
- Large LCD with backlight
- LED measuring point lighting
- CAT III 600 V overvoltage protection
- IEC/EN 61010-1 (DIN VDE 0411)
- Includes batteries, measurement leads and carrying bag

A device that will reliably detect AC voltage in cables, sockets, fuses, switches, outlets and other installations. Testboy can detect the following:

- Live conductors
- Cable breaks
- Blown fuses (in cartridges or holders)
- Defective switches
- Defective lamps in strings of lights

Current measurement in a control cabinet

Test and Measurement Devices

206 Series

Profi-LCD+; 2-pole voltage tester with LCD display; removable 4 mm Ø test probes

	Item No.	Pack. Unit
	206-707	1

Profi-LED+; 2-pole voltage tester with LED display; removable 4 mm Ø test probes

Spare test probes; 4 mm Ø (2 pieces)

	Item No.	Pack. Unit
	206-808	25

Additional Profi-LCD+ features:

- Automatic measurement range selection
- Single-pole phase testing AC >100 V
- Two-pole sequence testing (R and L)
- Continuity testing
- RDC/RCD testing (30 mA) via buttons
- One-hand operation for SCHUKO® and CEE sockets
- LED torch lamp function
- Automatic backlight
- Auto power-off function
- CAT IV 1000 V
- TÜV/GS tested and approved
- IEC/EN 61243-3 (DIN VDE 0682-401)

Additional Profi-LED+ features:

- Automatic measurement range selection
- Single-pole phase testing AC >100 V
- Two-pole sequence testing (R and L)
- Continuity testing
- RDC/RCD testing (30 mA) via buttons
- One-hand operation for SCHUKO® and CEE sockets
- LED torch lamp function
- CAT IV 1000 V
- TÜV/GS tested and approved
- IEC/EN 61243-3 (DIN VDE 0682-401)

Profi-LED+:

- Improved socket contact via 4 mm Ø test probes
- Removable test probes for small test ports (suitable for all WAGO Terminal Blocks)

Test Plug and Test Pin

Test plug; with 500 mm cable; 2 mm Ø; max. 42 V		
Color	Item No.	Pack. Unit

CE Marking and EC Directives

CE Conformity Marking

The CE conformity marking consists of the characters "CE" with the following script:

Communauté Européenne
(European Community)

WAGO Kontakttechnik GmbH & Co. KG products are developed, tested and marked in accordance with legally valid international standards and laws.

The CE mark is applied to products intended for the European domestic market; with it, manufacturers declare that the marked electrical equipment conforms with the applicable requirements set out in the Community harmonization legislation (EU Directives), which allows such equipment to carry this mark.

The original intention of this mark was to support the authorities in the EU member states in their market supervision, with the mark acting as a symbol of free movement of products within the EU. According to EC Directive 765/2008, a product can only be given the CE mark if the product requirements are defined in at least one appropriate EU directive. Examples of such directives are the Low Voltage Directive, the EMC Directive, the ATEX Directive, the Building Products Directive and the Machinery Directive. If more than one directive applies to a product, the product must comply with **all applicable directives**.

Only the basic requirements for achieving the defined aim of the directive are laid out in each respective directive. The individual technical details are specified according to the New Approach using lists with cross references to applicable standards (so-called harmonized standards).

1. Low Voltage Directive (LVD)

The safety of electrical equipment is guaranteed by the Low Voltage Directive (LVD). The LVD covers all electrical equipment operating with a voltage between 50 VAC and 1000 VAC and between 75 VDC and 1500 VDC.

Products falling within the scope of the Low Voltage Directive that are designed in such a way that they can be used in other electrical devices, and whose safety, for the most part, is dependant on how these components were built into the end product and what features the end product has, are defined as basic components in accordance with the Low Voltage Directive.

The LVD doesn't apply to basic components.

The RoHS Directive also applies to electrical equipment covered by the Low Voltage Directive. This directive regulates the use of hazardous substances in electrical devices and components, with the aim of reducing the quantity of problematic components in electrical waste. Details about the materials used by WAGO are available in our catalogs, on our product packaging and on our Web page.

2. EMC Directive

The EMC Directive stipulates that a product must meet the limits on radiated electromagnetic disturbance and also requires that a product must be immune to electromagnetic interference.

Electromagnetic passive components or components with no direct function, such as terminal blocks, resistors, diodes, capacitors, switching relays or cables (in the form of passive printed circuit boards) are not considered as apparatus within the meaning of the EMC Directive.

3. ATEX Directive on Explosion Protection

The ATEX Directive defines the rules for products (devices and protective systems) intended for use in hazardous locations. A number of products from WAGO are designed for use in hazardous areas.

Based on potential hazards, the ATEX Directive makes a distinction between three different equipment groups, of which Group II and III are subdivided into further zones. Suitability of WAGO products for the different groups and zones is outlined in the specific product documents (catalogs, Internet site, data sheets and product inserts).

These may be either devices that can be used as equipment in these types of areas, or components that are required for safe operation, but which do not fulfill a dedicated function. Such components include rail-mount terminal blocks for use in hazardous areas.

Products in both groups must comply with the ATEX Directive.

4. Radio Communications Directive

The Radio Communications Directive applies to all devices that properly transmit or receive radio waves for wireless communications and/or radio orientation. The basic safety requirements apply to the protection of health for humans and animals and to electrical safety in line with the Low Voltage Directive, but without the application of the voltage limit. In addition, the EMC protection goals of the EMC Directive must also be fulfilled and efficient use of radio frequencies ensured. WAGO products covered by the Radio Communications Directive indicate, in compliance with applicable laws, only the Radio Communication Directive in their EU Declaration of Conformity, as fulfillment of the Low Voltage Directive and of the EMC Directive is implicit in this declaration.

5. Construction Products Regulation

The Construction Products Regulation demands that structures be designed and constructed such that the safety of humans, property and animals is not endangered and that all applicable environmental protection requirements be considered. Here, building products are defined as products or construction sets which are produced to be built permanently into structures and which make a significant contribution to fulfilling the basic requirements for the structure.

In the unanimous opinion expressed by the German electrical industry, including WAGO Kontakttechnik GmbH & Co. KG, products used in general installation technology are not included among these types of building products and are therefore not covered by this directive.

6. Machinery Directive

The Machinery Directive applies to machines (complete or incomplete) which perform their functions by means other than direct human or animal work, or safety components for these types of machines.

Therefore, this directive usually does not apply to WAGO products.

The manufacturers of machines or systems are required by this directive to use safe products and components in their machines and systems. Directive-compliant production and safe operation is facilitated by the use of WAGO products, with their standard-compliant, up-to-date design.

Significance of CE Mark for WAGO Products

One, several or none of the EU Directives may apply to the various WAGO products. If none of the directives apply, the CE marking will not be affixed to the product, in line with applicable laws. Furthermore, a declaration of conformity must not be issued. All other products are provided with the CE mark – either directly on the product, on its packaging or in the documents included with the product – and a declaration of conformity is issued, or made accessible to the customer.

The data sheets of the technically sound products that, according to the regulations, are not CE marked will refer to the standards used in the development and type and manufacturing testing wherever possible.

IEC/EN Specifications

The following standards apply to the design and application of the terminal blocks and connectors contained in this catalog:

IEC 60364-1 HD 60364-1 VDE 0100-100 / Erection of power installations with nominal voltages up to 1000 V – Part 1: Fundamental principles, assessment of general characteristics, definitions	IEC 60079-7 EN 60079-7 VDE 0170-6 / Explosive atmospheres – Part 7: Equipment protection by increased safety "e"	IEC 61439-3 EN 61439-3 VDE 0660-600-3 /– Low-voltage switchgear assemblies – Part 3: Distribution boards intended to be operated by ordinary persons (DBO)
IEC 61140 EN 61140 VDE 0140-1 / Protection against electric shock – Common aspects for installation and equipment	IEC 60079-11 EN 60079-11 VDE 0170-7 / Harzardous areas – Part 11: Equipment protection by intrinsic safety "i"	IEC 61643-11 EN 61643-11 VDE 0675-6-11 / Low-voltage surge protective devices – Part 11: Surge protective devices connect- ed to low-voltage power systems – Requirements and test methods
IEC 60364-7-710 HD 60364-7-710 VDE 0100-710 – Part 7-710: Requirements for special instal- lations or locations – Medically used areas	IEC 60079-14 EN 60079-14 VDE 0165-1 / Harzardous areas – Part 14: Electrical installations design, se- lection and erection	IEC 60335-1 EN 60335-1 VDE 0700-1 / Safety of household and similar electrical appliances – Part 1: General requirements
IEC 60364-7-718 HD 60364-7-718 VDE 0100-718 – Part 7-718: Requirements for special instal- lations or locations – Communal facilities and workplaces	IEC 60079-15 EN 60079-15 VDE 0170-16 / Explosive atmospheres – Part 15: Equipment protection by type of protection "n"	IEC 60598-1 EN 60598-1 VDE 0711-1 / Lighting fixtures – Part 1: General requirements and tests
EN 50110-1 VDE 0105-1 / Operation of electrical installations – Part 1: General requirements	IEC 60038 EN 60038 VDE 0175-1 / IEC CENELEC standard voltages	IEC 60715 EN 60715 /– Standardized mounting on rails for me- chanical support of electrical devices in switchgear and control-gear installations
IEC 60664-1 EN 60664-1 VDE 0110-1 / Insulation coordination for equipment within low-voltage systems – Part 1: Principles, requirements and tests	VDE 0298-4 / Use of cables and insulated conductors in power installations – Part 4: Recommended values for current carrying capacities of cables for fixed instal- lation and for flexible cables	IEC 60999-1 EN 60999-1 VDE 0609-1 / Connecting devices – Electrical copper conductors – Safety requirements for screw- type and screwless-type clamping units – Part 1: General requirements and particular requirements for clamping units for conduc- tors from 0.2 mm ² up to 35 mm ²
IEC 60204-1 EN 60204-1 VDE 0113-1 / Safety of machinery – Electrical equipment of machines – Part 1: General requirements	IEC 60112 EN 60112 VDE 0303-1 / Method for determining the comparative and the proof tracking indices of solid insula- tion materials	IEC 60999-2 EN 60999-2 VDE 0609-101 – Part 2: General requirements and particular requirements for clamping units for conduc- tors from 35 mm ² up to 300 mm ²
IEC 60079-0 EN 60079-0 VDE 0170-1 / Harzardous areas Part 0: Equipment – General requirements	IEC 60529 EN 60529 VDE 0470-1 / Degrees of protection provided by enclo- sures (IP Code) – Testing equipment and testing method	
	IEC 61439-1 EN 61439-1 VDE 0660-600-1 / Low-voltage switchgear and control-gear assemblies – Part 1: General rules	

IEC 60998-1 EN 60998-1 VDE 0613-1 / Connecting devices for low-voltage circuits for household and similar purposes – Part 1: General requirements	IEC 60947-7-4 EN 60947-7-4 VDE 0611-4 – Part 7-4: Ancillary equipment – PCB terminal blocks for copper conductors	IEC 60352-5 EN 60352-5 – Part 5: Press-in connections – General requirements Test methods and practical guidance
IEC 60998-2-1 EN 60998-2-1 VDE 0613-2-1 – Part 2-1: Particular requirements for connecting devices as separate entities with screw-type clamping units	IEC 61984 EN 61984 VDE 0627 / Connectors – Safety requirements and tests	IEC 60352-6 EN 60352-6 – Part 6: Insulation piercing connections – General requirements Test methods and practical guidance
IEC 60998-2-2 EN 60998-2-2 VDE 0613-2-2 – Part 2-2: Particular requirements for connecting devices as separate entities with screwless-type clamping units	IEC 60512-1 EN 60512-1 / Connectors for electronic equipment Equipment – Measurement and test procedures – Part 1: General	IEC 60352-7 EN 60352-7 – Part 7: Spring clamp connections – General requirements Test methods and practical guidance
IEC 60998-2-3 EN 60998-2-3 VDE 0613-2-3 – Part 2-3: Particular requirements for connecting devices as separate entities with insulation-piercing clamping units	IEC 60320-1 EN 60320-1 VDE 0625-1 / Appliance couplers for household and similar general purposes – Part 1: General requirements	
IEC 60947-1 EN 60947-1 VDE 0660-100 / Low-voltage switchgear and controlgear – Part 1: General rules	IEC 60352-1 EN 60352-1 / Solderless connections; – Part 1: Wrapped connections – General requirements Test methods and practical guidance	
IEC 60947-7-1 EN 60947-7-1 VDE 0611-1 – Part 7-1: Ancillary equipment Terminal blocks for copper conductors	IEC 60352-2 EN 60352-2 / Solderless connections; – Part 2: Crimped connections – General requirements Test methods and practical guidance	
IEC 60947-7-2 EN 60947-7-2 VDE 0611-3 – Part 7-2: Ancillary equipment Ground conductor terminal blocks for copper conductors	IEC 60352-3 EN 60352-3 – Part 3: Solderless accessible insulation displacement connections – General requirements Test methods and practical guidance	
IEC 60947-7-3 EN 60947-7-3 VDE 0611-6 – Part 7-3: Ancillary equipment Safety requirements for fuse terminal blocks	IEC 60352-4 EN 60352-4 – Part 4: Solderless non-accessible insulation displacement connections – General requirements Test methods and practical guidance	

Tests and Testing Procedures per IEC/EN Standards

Products such as connecting devices, rail-mount terminal blocks and connectors, etc., have their own product-specific test specifications. The following sections describe the most important tests and are limited to a description of the test procedures and an explanation of the test purpose. The data shown (e.g., voltages, temperatures, forces) only serve as illustration and may differ depending on the test.

Mechanical Tests

All WAGO products meet requirements for the following mechanical tests:

• Termination Requirements

Conductor Termination

Two WAGO connection systems are proven in the field of Spring Pressure Connection Technology:

The **PUSH WIRE® connection** for applications requiring solid conductors (e.g., for lighting and building wiring, telecommunications, house communication or alarm systems).

Conductor range:

0.2 ... 4 mm² / 24 ... 12 AWG

The **universal CAGE CLAMP® spring pressure connection system** for solid, stranded and fine-stranded conductors, designed for a variety of industrial, electrical and electronic applications (e.g., fine-stranded conductors in the elevator industry, in power stations, in the chemical and automotive industry, and aboard ships).

Conductor range:

0.08 ... 35 mm² (28 ... 2 AWG)

The **Push-in CAGE CLAMP® connection** takes universal CAGE CLAMP® connections further by allowing the termination of 0.2 ... 16 mm² (24 ... 6 AWG) solid, stranded and fine-stranded conductors (25 mm²/4 AWG only "f-st") and offering all the benefits and safety of the original CAGE CLAMP®. Furthermore, the Push-in CAGE CLAMP® connection technology allows solid, stranded and fine-stranded conductors with ferrules from 0.5 to 16 mm² (20 ... 6 AWG) to be terminated by simply pushing them in.

The conductor entry hole is perfectly suited for the insulation diameter of the rated conductor cross section, thus providing good conductor guidance.

This is particularly important for vibration-prone applications.

Fine-stranded conductors of small or very small size are highly flexible, and deform when pushed against the conductor stop in terminal blocks. As a result, the conductor insulation – not the copper conductor – may be clamped, causing intermittent contact or no contact at all.

In order to prevent conductor insulation from being inserted into the clamp, insulation stops are available for WAGO rail-mount terminal blocks up to 4 mm² (12 AWG), even providing protection for 0.08 mm² (28 AWG) conductors (see Section 5).

Rated Cross Sections and Connectable Conductors

I. Per IEC 60999-1 / EN 60999-1 / VDE 0609-1, Table 1:

Rated Cross Section	Theoretical Largest Conductor Diameter							Connectable Conductor	
	Metric			AWG				Rigid	Flexible
	Rigid		Flexible	Rigid		Flexible			
	Solid	Stranded		Conductor Size	^{b)} Solid		^{b)} Class B Stranded	^{c)} Class I, K, M Stranded	
mm ²	mm	mm	mm	Conductor Size	mm	mm	mm	To be defined in the corresponding product standard	
0.2	0.51	0.53	0.61	24	0.54	0.61	0.64		
0.34	0.63	0.66	0.8	22	0.68	0.71	0.8		
0.5	0.9	1.1	1.1	20	0.85	0.97	1.02		
0.75	1	1.2	1.3	18	1.07	1.23	1.28		
1	1.2	1.4	1.5	–	–	–	–		
1.5	1.5	1.7	1.8	16	1.35	1.55	1.6		
2.5	1.9	2.2	2.3 ^{a)}	14	1.71	1.95	2.08		
4	2.4	2.7	2.9 ^{a)}	12	2.15	2.45	2.7		
6	2.9	3.3	3.9 ^{a)}	10	2.72	3.09	3.36		
10	3.7	4.2	5.1	8	3.34	3.89	4.32		
16	4.6	5.3	6.3	6	4.32	4.91	5.73		
25	–	6.6	7.8	4	5.45	6.18	7.26		
35	–	7.9	9.2	2	6.87	7.78	9.02		

NOTE: The diameters of the largest rigid and flexible conductors are based on Table 1 of IEC 60228 A/IEC 60344 and on ASTM B172-71 [4], IECA Publication S-19-81 [5], IECA Publication S-66-524 [6], as well as IECA Publication S-66-516 [7] for AWG conductors.

^{a)} Dimensions for Class 5 flexible conductors only (IEC 60228 A)

^{b)} Nominal diameter +5%

^{c)} Largest diameter for conductors of classes I, K, M + 5%

In practical use, the conductor cross sections are approximately 5% below the values stated in the table!

The IEC 60999-1/EN 60999-1/VDE 0609-1 Specification (Section 7.1) requires that:

Clamping units must be able to connect unprepared conductors.

Under normal operating conditions, direct clamping (i.e., directly connecting a conductor to the terminal block's current bar) provides optimal contact quality, because all risk factors arising from anti-splaying methods are prevented.

Occasionally, conductor anti-splaying protection may be required, including various methods (see illustrations below).

Special requirements apply only in special application areas exposed to extremely corrosive atmospheres.

In this case, we recommend using either solid copper conductors or fine-stranded copper conductors with properly crimped, tin-coated copper ferrules or copper pin terminals.

As with solid copper conductors, the fine strands are crimped to a dense inner core. This prevents ingress of aggressive atmospheres (depending on the ppm concentration), which can diffuse into the conductor bundle along the individual strands and deposit between individual strands and the clamping point.

One Conductor per Clamping Unit

A number of DIN VDE, EN, IEC directives mandate or recommend that only one conductor must be connected per clamping unit.

In accordance with DIN VDE 0611, Part 4, 02.91, Section 3.1.9, multi-level distribution rail-mount terminal blocks must be dimensioned so that a single (solid, stranded or fine-stranded) conductor of the nominal cross section can be connected at each terminal point.

Other VDE, EN and IEC specifications also recommend the connection of only one conductor per clamping unit, unless the clamping unit is specifically tested and approved for the connection of several conductors, for example:

VDE 0609, Part 1, 12.00 / EN 60999-1:2000 / IEC 60999-1:1999, Section 7.1
VDE 0660, Part 600, 06.12 / EN 61439-1:2011 / IEC 61439-1, Section 8.6.3
VDE 0113, Part 1, 06.07 / EN 60204-1:2006 / IEC 60204-1:2016, Section 13.1.1.

One conductor per clamping unit is therefore recommended to meet the safety requirements of these relevant specifications. This WAGO principle is the basis for a number of other technical and economic advantages:

- Each conductor may be terminated or removed without affecting previously connected conductors.
- Where re-wiring is required, only the conductor to be changed is removed from the clamping point, all other conductors remain safely clamped.
- Each conductor is clamped independently.
- Any conductor size combination can be connected.

WAGO provides 2-conductor terminal blocks and connectors to increase the number of clamping units.

II. Per IEC 60999-2, Table 1:

Rated Cross-Section	Theoretical Largest Conductor Diameter					Connectable Conductor	
	Metric		AWG/kcmil			Rigid	Flexible
	Rigid Stranded	Fine-Stranded ^{a)}	Gauge	Rigid Stranded	Fine-Stranded		
mm ²	mm	mm		mm	mm		
50	9.1	11	1/0	9.64	12.08	To be defined in the corresponding product standard	
70	11	13.1	2/0	11.17	13.54		
95	12.9	15.1	3/0	12.54	15.33		
–	–	–	4/0	14.08	17.22		
120	14.5	17	250	15.34	19.01		
150	16.2	19	300	16.8	20.48		
185	18	21	350	18.16	22.05		
–	–	–	400	19.42	24.05		
240	20.6	24	500	21.68	26.57		
300	23.1	27	600	23.82	30.03		

Dimensions for Class 5 flexible conductors only (IEC 60228 A)

NOTE: The diameters of the largest rigid and flexible conductors are based on Table 1 and Table 3 of IEC 3 A/IEC 60228 and on ASTM B172-71 [1], IECA Publication S-19-81 [2], IECA Publication S-66-524 [3], as well as IECA Publication S-66-516 [7] for AWG conductors.

Tip-bonded conductor

Tin-plated copper ferrule (gas-tight crimped)

Ultrasonically bonded conductor

Crimped pin terminal (gas-tight), preferably made of copper with a tin-plated surface

Anti-splaying methods require a terminal block one size larger than the nominal cross section of the conductor to be terminated. Ferruled conductor cross sections specified for individual products are based on WAGO's Variocrimp square crimping technology. Gas-tight, crimped twin ferrules may be used, provided the ferrule is inserted all the way into the clamping unit and that there is a sufficient clearance and creepage distance between adjacent potentials.

Tests and Testing Procedures per IEC/EN Standards (continued)

Mechanical Tests (continued)

• Pull-Out Test per IEC/EN 60947-7-1, IEC/EN 60998-2-2, IEC/EN 60999-1

The pull-out test simulates the mechanical stress on the clamping unit when, for example, the installer pushes the conductor aside to better access/operate the adjacent clamping unit, or verifies if the conductor is connected properly by briefly pulling on it.

During the test, a pulling force is applied without jerking, for one minute, to the connected conductor. The pulling force is selected according to the cross-sectional area. The larger the cross section of the conductor, the higher the pull-out force that is selected. For example, the pulling force is 40 N for a conductor having a cross section of 1.5 mm² (16 AWG) and 100 N for a conductor with a cross section of 16 mm² (6 AWG). The values specified by these standards are the same for both screw clamp and spring clamp terminal blocks. During the test, the conductor must neither slip out of the clamping unit, nor break near the clamping unit.

Conductor Pull-Out Forces

The clamping units of screwless terminal blocks must withstand the pull-out forces as follows:

IEC 60947-1/EN 60947-1/VDE 0660-100, Table 5:

Low-voltage switchgear and controlgear, general rules

IEC 60947-7-1/EN 60947-7-1/

VDE 0611-1, rail-mount terminal blocks for copper conductors

IEC 60998-2-1/EN 60998-2-1/

• Shock/Vibration Test per IEC/EN 60068-2-6; DNV GL, LR (Marine Applications); IEC/EN 61373 (Railway Applications)

The vibration test determines whether vibrations, such as those produced in the vicinity of machines or in vehicles, will permanently affect the electrical connection, or if contact breaks will occur during vibrations. Using a vibration table, the test specimen is subjected to vibration in each of the X, Y and Z axes (see pictures). The amplitude, acceleration and in particular the frequency of the vibration must vary during the test.

The "open length" of the conductor up to the point where the conductor is attached in the application must be kept as short as possible (length = 70 mm in this example).

1st Axis

2nd Axis

3rd Axis

The exact test procedure may vary considerably, depending on how the product will be used.

Application Examples per IEC/EN 60068-2-6	Associated Test Levels
Devices attached to heavy, rotating machines	1 ... 35 Hz, 50 m/s ² (5 g) or 100 m/s ² (10 g)
Devices designed for use in large-scale power plants and general industrial applications	10 ... 55 Hz, 20 m/s ² (2 g) or 50 m/s ² (5 g)
Devices designed for use in large-scale power plants and general industrial applications if it has been determined that detectable vibration components greater than 55 Hz exist	10 ... 150 Hz, 20 m/s ² (2 g) or 50 m/s ² (5 g)

Tests and Testing Procedures per IEC/EN Standards (continued)

Mechanical Tests (continued)

Beyond these standard procedures, each market segment performs additional testing. Examples include railway authorities testing rolling electrical equipment, or the testing performed multiple marine agencies (e.g., DNV GL Group, Lloyd's Register of Shipping). Though the requirements of such testing procedures are particularly demanding, test arrangements are identical for all of them. During vibrations, possible contact breaks are monitored on an oscilloscope. Voltage drop is measured before and after the test to detect permanent failures, i.e., checking if electrical resistance at the clamping unit has not increased beyond the permissible limit. The smaller this value is, the smaller the contact resistance of the clamping unit.

The test is passed if:

- the conductor has neither slipped out of the terminal block nor been damaged,
- the maximum permissible voltage drop has not been exceeded
- and neither contact breaks have occurred nor a defined break time has been exceeded.

The test specimen must not be damaged in any way that might affect future use.

Since their inception, both CAGE CLAMP® and Push-in CAGE CLAMP® connections have been routinely tested for their resistance to shock/vibration in connection with approval tests.

Notes:

These test results are based solely on tests conducted under "laboratory conditions." Connector usage in actual applications must be evaluated by the user.

• Shock Test per IEC/EN 60068-2-27; IEC/EN 61373 (Railway Applications)

The shock test is similar to the vibration test except that, instead of continuous vibrations, single shocks are applied to the specimen. Shock tests are usually performed with an acceleration of 20g, for example, over a period of 11 ms. Tests for special requirements often call for much higher values.

Like the vibration tests, shock tests are primarily used to test the voltage drop variation or contact breaks, etc.

Example: Shock requirement

per IEC/EN 60068-2-27 (half-sine shock)

30g acceleration, 6 ms duration

Shock direction: 3 axes (3 shocks each in positive and negative direction)

Tests and Testing Procedures per IEC/EN Standards (continued)

Electrical Tests

All WAGO products meet requirements for the following electrical tests:

- Temperature-Rise Test per IEC/EN 61984, IEC/EN 60947-7-4, IEC/EN 60947-7-1, IEC/EN 60998-1

The temperature-rise test examines the clamping unit – including the surrounding insulation – at rated current, over-current and short-circuit current levels.

Unless otherwise specified in the related equipment specification, e.g., by specifying the nominal currents of the equipment, terminal blocks and connectors are tested with current loads as specified in the respective construction specification.

For rail-mount terminal blocks complying with IEC 60947-7-1/EN 60947-7-1/VDE 0611-1, or terminal blocks complying with IEC 60998-1/EN 60998-1/VDE 0613-1, the temperature rise must not exceed 45 Kelvin.

Connectors and PCB terminal blocks must withstand the upper and lower values of the temperature range as specified in the detail or manufacturer’s specification.

The sum of the surrounding air temperature and the temperature rise of a connector or PCB terminal strip must not exceed the upper temperature limit.

Test arrangement: "Temperature-Rise Test"

Test arrangement: "Temperature-Rise Test" per IEC/EN 61984

Rated Cross-Section	Test Current per IEC/EN		Conductor Size	Test Current per IEC/EN

- Current-Carrying Capacity Curve (Derating Curve) per EN 60512-5-2

Both the design requirements (e.g., dimensions) and the current-carrying capacity of a connector must be checked by the user when selecting connectors.

This information depends on the following factors: conductor size, surrounding air temperature, number of simultaneously loaded poles, internal resistance of the connector, PCB layout, width and thickness of the printed circuits and connector materials.

A current-carrying capacity curve (basic curve) is determined based on the EN 60512-5-2 standard, accounting for the upper temperature limit.

The relationship between current, surrounding air temperature and temperature rise up to the connector's upper temperature limit is illustrated via current-carrying capacity curve (derating curve, reduction factor: 0.8).

The connector must only be operated up to this temperature limit (sum of the self-generated heat and the surrounding air temperature) without being damaged or destroyed during operation.

The nominal current figures given for the WAGO PCB Connectors are based on the maximum number of poles, the maximum conductor cross section and a maximum temperature rise of 45 K.

Note: Current-carrying capacity curves merely document the self-generated heat of the connectors and terminal blocks under defined test conditions (conductor length, commoning of solder pins).

Usability of the components in actual applications must be investigated by the user.

Functioning of a current-carrying capacity curve (derating curve) per EN 60512-5-2 is shown by an application using a derating curve for the **MULTI CONNECTION SYSTEM**:

This application requires each pole of a 4-pole connector be subjected to a load of 20 A. Based on the derating curve determined for this pole number with a conductor cross section of 2.5 mm², it has been determined the maximum surrounding air temperature is 39°C (102.2°F). The current must be reduced at higher surrounding air temperatures, e.g., to 11 A at an surrounding air temperature of 70°C (158°F).

Male header with straight solder pins
Female connector with CAGE CLAMP®

The non-reduced current-carrying capacity curves (basic curves, reduction factor: 1) can be used when selecting WAGO's PCB terminal blocks!

The nominal current values given are based on a 4-pole PCB terminal strip with a temperature rise of 45 K.

Example: 4-pole PCB terminal strip (2706 Series)

Tests and Testing Procedures per IEC/EN Standards (continued)

Electrical Tests (continued)

- Voltage Drop Test per IEC/EN 60947-7-1, IEC/EN 60999-1

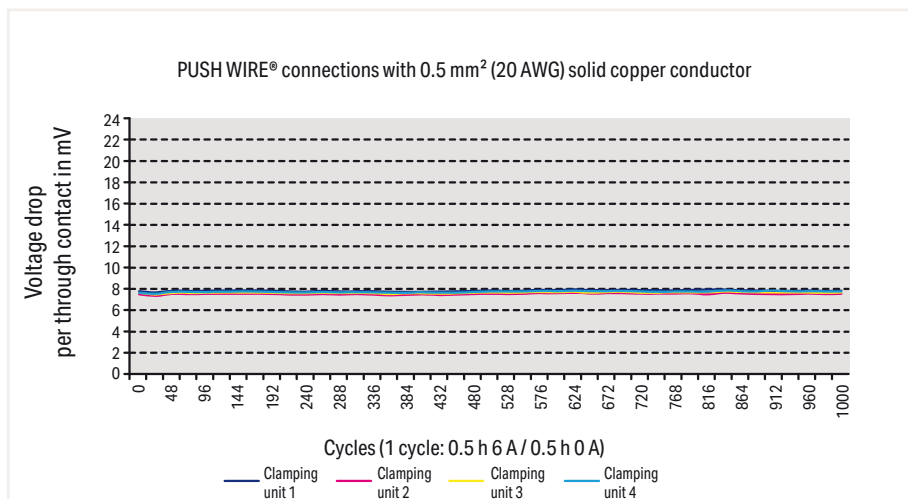

The voltage drop test evaluates clamping point quality under stress such as vibration, temperature change, industrial climate and salt spray, in order to verify that the contact point is gas-tight.

Test arrangement: "Voltage Drop Test"

Example: Current load cycling test result for Combi PCB terminal blocks with IDC and PUSH WIRE® connections

Voltage drop variation over longer periods under current load cycling conditions is shown for 251-3xx Combi PCB Terminal Blocks using solid copper conductors. The diagram shows that the voltage drop is constant, far beyond the 192 cycles required in IEC/EN 60998-2-2.

The voltage drop was determined at the rated current.

• Minimum Current / Specialty Connector Applications

The contact surfaces of WAGO's connectors are tin-plated. This surface exhibits excellent conductivity, along with outstanding protection against corrosion. Pollution layer deposits may penetrate this pure tin coating when the contacts are connected, lowering contact resistance.

The following information regarding proper selection of suitable WAGO components should be considered for applications in which connectors are used with minimal current and voltage levels and under harsh conditions, involving, for example, temperature, aggressive gases, vibration and shock.

Signal corruption may occur in applications with minimal current and voltage levels under the special conditions cited above. In such cases, we recommend using gold-plated contacts. Here, the user must always examine the suitability of the connectors for the application at hand.

The diagram below is based on practical experience.

WAGO also offers connectors with gold-plated contacts upon request.

Tests and Testing Procedures per IEC/EN Standards (continued)

Electrical Tests (continued)

• Insulation Parameters per IEC/EN 60664-1

Clearances and Creepage Distances

The following generally applies:

The equipment specification contains data for the measurement of clearances and creepage distances, or refers to the data contained in the new revised edition of the basic standard DIN EN 60664-1/VDE 0110-1. This standard contains new clearances and creepage distances in compliance with insulation coordination requirements. That is, the insulation parameters of equipment are assigned to:

- the anticipated surge voltages
- the parameters of the protection device against impulse voltage
- the anticipated environmental conditions and the protection measures against pollution.

This standard is based on IEC 60604-1.

Overvoltage Categories for Electrical Equipment:

A specific overvoltage category must be defined on the basis of the following, general description:

- Equipment in **overvoltage category I** is intended to be connected to the fixed electrical installations of buildings. Protective means are taken outside the equipment – either in the fixed installation or between the fixed installation and the equipment – to limit transient overvoltages to the specific level.
- Equipment in **overvoltage category II** is to be connected to the fixed electrical installations of buildings.

Note: Examples of such equipment are household appliances, portable tools and similar loads.

- Equipment in **overvoltage category III** is part of the fixed electrical installations and other equipment where a higher degree of availability is expected.

Note: Examples of such equipment are distribution boards, circuit breakers, wiring systems (IEV 826-16-08, including cables, bus bars, junction boxes, switches, socket outlets) in the fixed installation and equipment for industrial use and other equipment, e.g., stationary motors with permanent connection to the fixed installation.

- Equipment in **overvoltage category IV** is for use in or near the feed-in of electrical building installations upstream of the main distribution board in the direction of the network.

Note: Examples include electricity meters, primary overcurrent protection devices and ripple control units.

Clearances, Rated Surge Voltages, Overvoltage Categories, Pollution Degrees

Surge voltages (Table 1) are a decisive factor in determining clearances.

The basis forms the **overvoltage category**, i.e., the allocation of the equipment to the expected overvoltage, and the **conductor-ground voltage** derived from the nominal mains voltage in installations with a grounded Y (star) point.

In ungrounded installations, or installations where the conductor is not grounded, the voltage between conductors is applicable in the same way as conductor voltage to ground.

The rated surge voltage must be selected from Table F.1 corresponding to the overvoltage category specified and to the rated voltage of the equipment.

Table F.1 – Rated Surge Voltage for Equipment Energized Directly from the Low-Voltage Mains (DIN EN 60664-1/VDE 0110-1)

Voltage Curve: 1.2/50 μ s per IEC 60060-1/VDE 0432-1

Nominal voltage of the power supply system ¹⁾ (mains) per IEC 60038 ²⁾		Conductor-to-neutral voltage, derived from the nominal AC or DC voltage up to and including: V	Rated surge voltage ²⁾ Overvoltage category ⁴⁾			
Three-phase V	Single-phase V		I V	II V	III V	IV V
		50	330	500	800	1500
		100	500	800	1500	2500
	120 ... 240	150 ⁵⁾	800	1500	2500	4000
230 / 400 277 / 480		300	1500	2500	4000	6000
400 690		600	2500	4000	6000	8000
1000		1000	4000	6000	8000	12000

¹⁾ See Annex B for application to existing different low-voltage mains and their nominal voltages.

²⁾ Equipment with these rated impulse voltage levels can be used in installations complying with IEC 60364-4-443.

³⁾ The / mark indicates a 3-phase, 4-conductor system. The lower value is the conductor-to-neutral voltage, while the higher value is the conductor-to-conductor voltage. Where only one value is indicated, it refers to 3-phase, 3-conductor systems and specifies the conductor-to-conductor voltage.

⁴⁾ See 4.3.3.2.2 for an explanation of the overvoltage categories.

⁵⁾ The nominal voltages for single-phase systems in Japan are 100 V or 100 ... 200 V. The value for the rated impulse voltage is, however, derived from the voltage gaps conductor-to-neutral for a voltage level of 150 V (see Annex B).

The nominal supply voltage and the corresponding rated impulse voltage values apply for grounded and ungrounded circuits.

Voltage pulse: 1.2/50 μ s per EN 60060-1/VDE 0432-1

Pollution Degrees

Pollution factors are all solid, liquid or gaseous foreign matter which may reduce the dielectric strength or the specific surface resistance. Factors are divided into four classes based on expected environmental conditions:

		Examples of pollution degrees for assigned areas:
Pollution degree 1:	No pollution, or only dry, non-conductive pollution occurs. Pollution has no influence.	Open, unprotected insulated equipment in air-conditioned or clean, dry rooms
Pollution degree 2:	Only non-conductive pollution occurs. Occasional, temporary conductivity caused by condensation can also be expected.	Open, unprotected insulated equipment in occupied areas, shops, laboratories, mechanical workshops and medical rooms.
Pollution degree 3:	Conductive pollution occurs, or dry, non-conductive pollution occurs which will become conductive due to condensation.	Open, unprotected insulated equipment in industrial, business and farming areas (e.g., unheated rooms, workshops and boiler rooms)
Pollution degree 4:	The pollution generates persistent conductivity caused by conductive dust, rain or wet conditions.	Open, unprotected insulated equipment for outdoor use

Dimensioning Clearances

(DIN EN 60664-1/VDE 0110-1, Table F.2) Select the minimum clearances in accordance with the rated surge voltages and pollution degrees. To maximize the operating life of the equipment, do not go below these minimum clearances.

Table F.2 contains a list of information for Case A, the inhomogeneous field and for Case B, the homogeneous field.

This involves an electric field with essentially constant (Case B) or non-constant (Case A) voltage gradients between the electrodes.

Equipment with a clearance that is dimensioned per Case A, in other words rated for the most unfavorable case, requires no verification by the impulse voltage test.

Equipment with a clearance that is dimensioned per Case B, or between A and B, requires verification by the impulse voltage test.

The clearances shown in Table F.2 are applicable for an installation height of up to 2000 m above sea level.

Values for clearances above 2000 m must be multiplied by a high correction factor in accordance with Table A.2.

Table F.2 – Clearances to Withstand Transient Overvoltages
DIN EN 60664-1/VDE 0110-1

Required Impulse Withstand Voltage ¹⁾⁵⁾	Minimum Clearances in Air up to 2000 m Above Sea Level

20	25	25	25	8	8	8
25	33	33	33	10	10	10
30	40	40	40	12.5	12.5	12.5
40	60	60	60	17	17	17
50	75	75	75	22	22	22
60	90	90	90	27	27	27
80	130	130	130	35	35	35
100	170	170	170	45	45	45

¹⁾ This voltage is for:

- Functional insulation: the maximum impulse voltage expected to occur across the clearance (see 5.1.5)
- Basic insulation directly exposed to or significantly influenced by transient overvoltages from the low-voltage mains (see 4.3.3.3, 4.3.3.4.1 and 5.1.6): the rated impulse voltage for the equipment;
- Other basic insulation (see 4.3.3.4.2): the highest impulse voltage that can occur in the circuit
For reinforced insulation, see 5.1.6.

²⁾ Preferred values specified in 4.2.3

³⁾ For printed wiring material, the values for pollution degree 1 apply, except that the value must not be less than 0.04 mm, as specified in Table F.4.

⁴⁾ The minimum clearances given for pollution degree 2 and 3 are based on the reduced withstand characteristics of the associated creepage distance under humidity conditions (see IEC 60664-5).

⁵⁾ For parts or circuit within equipment subject to surge voltages based on 4.3.3.4.2, interpolation of values is allowed. However, standardization is achieved by using the preferred series of impulse voltage values based on 4.2.3.

⁶⁾ The dimensions for pollution degree 4 are as specified for pollution degree 3, except that the minimum clearance is 1.6 mm.

Tests and Testing Procedures per IEC/EN Standards (continued)

Electrical Tests (continued)

• Insulation Parameters per IEC/EN 60664-1 (continued)

Creepage Distances, Rated Voltages, Material Groups

Criteria for dimensioning creepage distances are the rated voltages, pollution degrees and material groups.

The pollution degrees specified for the clearances, and its quoted allocation to locations, is also applicable for creepage distances. Tables F.3 a and F.3 b of DIN EN 60664-1/ VDE 0110-1 contain the rated voltages that have to be considered for dimensioning the minimum creepage distances.

Table F.3a – Single-Phase, 3- or 2-Conductor, AC or DC Systems

Nominal Voltage of the Power Supply System (Mains)*	Voltages for Table F.4

¹⁾ Conductor-to-ground insulation level for non-grounded or impedance-grounded systems equals that for conductor-to-conductor, as the operating voltage to ground of any conductor can, in practice, approach full conductor-to-conductor voltage. This is because the actual voltage to ground is determined by the insulation resistance and capacitive reactance of each conductor to ground; thus, low (but acceptable) insulation resistance of one conductor can in effect ground it and raise the other two to full conductor-to-conductor voltage to ground.
*For the relationship to rated voltage, see 4.3.2.

¹⁾ Conductor-to-ground insulation level for non-grounded or impedance-grounded systems equals that for conductor-to-conductor, as the operating voltage to ground of any conductor can, in practice, approach full conductor-to-conductor voltage. This is because the actual voltage to ground is determined by the insulation resistance and capacitive reactance of each conductor to ground; thus, low (but acceptable) insulation resistance of one conductor can in effect ground it and raise the other two to full conductor-to-conductor voltage to ground.

²⁾ For equipment used on both three-phase, 4-conductor and three-phase, 3-conductor systems, grounded and non-grounded, use only the values for 3-conductor systems.

*For the relationship to rated voltage, see 4.3.2.

**These values correspond to the values given in Table F.1.

Material Groups

Insulation materials are classified into four groups according to their Comparative Tracking Index (CTI) as follows:

Material Group I: $600 \leq \text{CTI}$

Material Group II: $400 \leq \text{CTI} < 600$

Material Group IIIa: $175 \leq \text{CTI} < 400$

Material Group IIIb: $100 \leq \text{CTI} < 175$

The CTI values above refer to values obtained in accordance with DIN EN 60664-1/ VDE 0110-1 on samples specially made for this purpose and tested with Solution A.

¹⁾ This voltage is for:

- Functional insulation; the working voltage
- Basic and supplementary insulation of the circuit energized directly from the mains (see 4.3.2.2.1): for the voltage rationalized through Table F.3a or F.3b, based on the rated voltage of the equipment, or the rated insulation voltage
- Basic and supplementary insulation of systems, equipment and internal circuits not energized directly from the mains (see 4.3.2.2.2): the highest rms voltage which can occur in the system, equipment or internal circuit when supplied at rated voltage and under the most taxing combination of operation conditions within equipment rating

²⁾ Material group IIIb is not recommended for applications in pollution degree 3 above 630 V.

³⁾ Provisional data based on extrapolation. Technical committees who have other information based on experience may use their dimensions.

⁴⁾ The values in brackets must only be applied for reducing creepage distances if a rib is used (see 5.2.5).

The high degree of accuracy of the creepage distances given in the table does not imply that the measuring accuracy must be of the same quality.

Depending on the intended use, WAGO's terminal blocks, splicing and pluggable connectors are suitable for pollution degrees 2 or 3 and for overvoltage categories II or III. The rated voltages of WAGO's PCB terminal blocks and connectors are based on pollution degree 2 and overvoltage category III in per IEC/EN 60664-1 (insulation parameters).

Example:

WAGO 236 Series PCB Terminal Strips
(5/5.08 mm pin spacing)

320 V/4kV/2

Rated voltage	320 VDC
Rated surge voltage	4 kV
Pollution degree	2
Overvoltage category	III

The specific values for pollution degree 3 and overvoltage category II are also given in the technical data.

The clearances and creepage distances required for defined voltage values in Table 3 of IEC/EN 60998-1 deviate somewhat from the requirements specified in the insulation parameters.

Table 3 – Clearances and Creepage Distances
(IEC/EN 60998-1)

Rated Insulation Voltage V	Clearances/Creepage Distances mm
≤ 130	1.5
> 130 and ≤ 250	3
> 250 and ≤ 450	4
> 450 and ≤ 750	6
> 750	8

Tests and Testing Procedures per IEC/EN Standards (continued)

Electrical Tests (continued)

• Power-Frequency Withstand Voltage Test per IEC/EN 60947-7-4, IEC/EN 60998-1

This testing procedure verifies creepage distances. Creepage distances, i.e., the distances of creeping currents, are caused by conductive impurities on the surface of the insulation housing. Apart from the amount of impurities to which a terminal block is subjected, for example, the plastic material and housing design are also involved in generating creeping currents. The insulation material of the housing may be carbonized by a creeping current, which further increases conductivity.

The specimen is tested using a power-frequency withstand voltage for a short time. For example, a PCB terminal block designed to operate at 320 V nominal voltage is usually tested using 2200 V alternating voltage for one minute. The test is passed if no flashovers or breakdowns have occurred.

• Rated Impulse Withstand Voltage Test per IEC/EN 60947-7-4, IEC/EN 60664-1

This test verifies the clearances of a product. In simplified terms, clearance is the distance between two poles of a terminal block. If this distance is too small, voltage peaks may cause flashovers or breakdowns. The arrangement of the rated impulse withstand voltage test is identical to that of the power frequency withstand voltage test; the test voltages, however, are comparatively higher and the testing times shorter, e.g., 4.8 kV over 50 µs (see figure).

Voltage pulse: measurement curve (red) and auxiliary curve (black) for calculating the rate of rise of the pulse and the resulting (virtual) peak of the curve.

- T: Time interval for calculating the rate of rise
- T1: Front time (duration between start of impulse and reaching the peak)
- T2: Total pulse duration

The test values are the values at sea level as specified in the relevant test specification. The values indicated in the catalog correspond to an altitude of 2000 m. The test is passed if no flashovers or breakdowns have occurred.

Voltage pulse: 1.2/50 µs per EN 60060-1/VDE 0432-1

• IP Ratings for Electrical Equipment per IEC/EN 60529

Alphanumeric Nomenclature for Type of Protection				IP vs. NEMA	
Code letters IP	Protection against accidental contact and against the penetration of foreign objects or water	IP (Ingress Protection) = International degree of protection		IP Code	NEMA
First code number 0 to 6	Indicates the degree of protection against accidental contact and the penetration of foreign objects.	If indicating the degree of protection requires only one digit, the other (second) digit must be substituted for with an X.		10	1
Second code number 0 to 8	Indicates the degree of protection against water penetration.			11	2
First code number:		Second code number:		54	3
IP0X	No protection against accidental contact or the penetration of foreign objects	IPX0	No protection against water	14	3R
IP1X	Protection against foreign objects > 50 mm	IPX1	Protection against vertically falling water	54	3S
IP2X	Protection against foreign objects > 12 mm (e.g., finger)	IPX2	Protection against diagonally dripping water (15° angle)	55	4&4X
IP3X	Protection against foreign objects > 2.5 mm	IPX3	Protection against water spray	52	5
IP4X	Protection against foreign objects > 1 mm	IPX4	Protection against water spray	67	6&6P
IP5X	Protection against damaging dust deposits	IPX5	Protection against water jet, e.g., from a nozzle	52	12&12K
IP6X	Protection against dust penetration	IPX6	Protection against flooding	54	13
		IPX7	Protection against temporary immersion		
		IPX8	Protection against continuous immersion		
		IPX9	Protection against high-pressure and high-temperature water jets		

Tests and Testing Procedures per IEC/EN Standards (continued)

Material Tests

All WAGO products meet requirements for the following material tests:

- Needle Flame Test per IEC/EN 60947-7-1, IEC/EN 60695-11-5

This test simulates flames that may arise under certain conditions (e.g. fault current over a creepage distance, overloading of parts or components). Nearby parts can also be affected by such flames.

Not only the ignition of the test specimen resulting from an intrinsic defect is tested, but also its behavior when other parts ignite.

Flames must not be fuelled by the insulation materials used, thus creating a larger fire. The test specimen is exposed to a standard gas flame during a defined time period (e.g., ten seconds).

After the test flame has been removed, the specimen must self-extinguish within 30 seconds. Furthermore, a layer of tissue paper located beneath the specimen must not be ignited by glowing particles falling from the specimen.

- Glow-Wire Test per IEC/EN 60947-7-4, IEC/EN 60998-1, IEC/EN 60695-2-11

In the event of failure, a high current may cause a conductor to glow.

However, the glowing conductor shall not cause ignition of the product involved (e.g., a rail-mount terminal block). For the glow-wire test, the tip of the glow-wire is pressed against a surface of the test specimen (see picture).

The position of the test specimen, surface to be tested, test duration and glow-wire temperature (e.g., 960°C/1760°F over 30 seconds, or 850°C/1562°F over 5 seconds) are specified in the standards.

The specimen must be positioned such that the tip of the glow-wire acts on the surface section of the specimen (vertical surface of the specimen) that is most likely to be exposed to thermal loading during normal use.

As the highest temperature in the event of a fault is anticipated at the contact insert/wire connection, the tip of the glow-wire must act upon the section of the insulation housing that is the closest to this contact point.

The test is passed if there are no visible flames or permanent glowing, or if flames or glowing extinguish within 30 seconds after removal of the glow-wire. Furthermore, a layer of tissue paper located beneath the specimen must not be ignited by glowing particles falling from the specimen.

Tests and Testing Procedures per IEC/EN Standards (continued)

Environmental Tests

The following tests show how a product reacts when exposed to an aggressive environment. Climatic chambers simulate standard atmospheres that could impact the long-term consistency of clamping units.

All WAGO products meet the requirements of the following environmental tests:

- Temperature Cycling Test per IEC/EN 60947-7-1, IEC/EN 60998-2-2

This test shows the change of voltage drop over longer periods under temperature cycling conditions. The test procedure usually consists of 192 temperature cycles, for example, each cycle having a duration of 60 minutes (see diagram).

The rated current is applied to the test specimen during temperature rise and when the temperature has reached its maximum value; during the second half of the cycle, the current is zero. Voltage drop is measured every 24 cycles and must not exceed a maximum value or vary greatly. The voltage drop measured at the end of the 192nd cycle must not exceed 1.5 times the value measured after the 24th cycle. After the test, an inspection must show no changes that would impair further use of the product.

- Industrial Atmospheres per EN ISO 6988, IEC/EN 60068-2-42, IEC/EN 60068-2-60

Sulphur and its combustion products are particularly aggressive pollutants commonly found in industrial environments. A test procedure simulating such corrosive conditions consists of exposing a test specimen to water condensation in variable atmospheres containing sulphur dioxide.

A saturated atmosphere is first created in a climatic chamber by heating an aqueous sulphur dioxide solution. After less than half an hour, the test specimen is fully saturated by the condensing vapors and exposed to this atmosphere for eight hours.

After exposure to a humid atmosphere, the test specimen is subjected to dry and cooler conditions at room temperature for 16 hours. Depending on the test severity, the specimen is exposed to both these conditions several times. The gas-tightness of the clamping unit is verified by a voltage drop test.

In other test procedures, products are exposed to a dry corrosive gas atmosphere containing sulfide, nitrogen and sulfur oxides or chloride gas. These tests can be performed over a period of four to 21 days.

• Salt Spray Test per IEC/EN 60068-2-11; DNV GL, LR (Marine Applications)

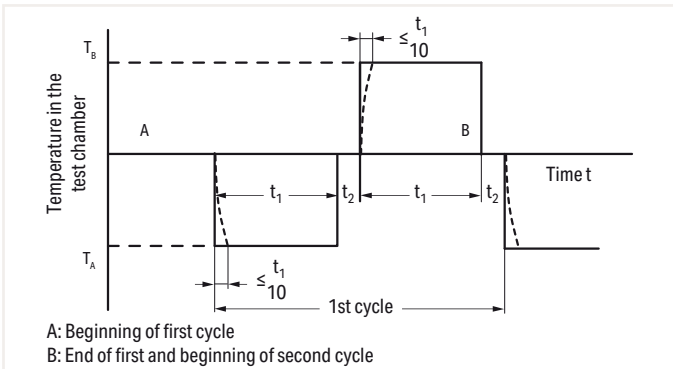

This test is similar to the test performed in water condensation alternating atmospheres, except that instead of industrial atmospheres, salt mist conditions will be simulated in a heated test chamber (see picture).

Depending on the test procedure being used, the test specimen is sprayed with salt mist for 16 hours up to 672 hours (4 weeks). Salt spray tests are widely used, especially for marine approvals. However, this test is performed differently than the test procedures described previously for general applications: During a typical test, the test specimen is sprayed with a salt solution for two hours and is then stored for seven days in an atmosphere with a relative humidity between 90 and 95%. This procedure is repeated four times. Voltage drop measurements are used as an evaluation criterion.

• Quick Change of Temperature per IEC/EN 60068-2-14

Without air-conditioning, distribution panels and terminal boxes are exposed to seasonal (and ever-changing) temperature extremes – especially on the open field side. In process technology, for example, a terminal block is exposed to even quicker changes in temperature.

To simulate such conditions, the test specimen is exposed to repeated temperature changes, for example, between TA -40°C (-104°F) and TB +70°C (+158°F). The dwell time t1 depends on the thermal capacity of the test specimen and should be between maximum of 3 h and minimum of 10 min and the transition time t2 ... 3 min, 20 ... 30 s or less than 10 s. The mechanical and electrical properties of the product are checked at the end of the test.

• Damp Heat, Cyclic (12 + 12 Hour Cycle) per IEC/EN 60068-2-30, DNV GL, LR (Marine Applications)

This test determines the suitability of electrical equipment for use and storage under conditions of high relative humidity when combined with cyclic temperature changes and, in general, producing condensation on the surface of the specimen.

In addition to the salt spray tests, the damp heat test is also used for marine approvals. For this test, the specimens are subjected to temperatures varying cyclically between +25°C (+77°F) and +55°C (+131°F) with a relative humidity of 95% (for tolerances see figure). Functional tests are performed at defined times during the storage period. The mechanical and electrical properties of the product are checked at the end of the test.

UL Specifications – Underwriters Laboratories, USA

WAGO's terminal blocks and connectors are tested by Underwriters Laboratories Inc. according to one or more of the relevant following UL standards:

- | | | |
|--|------------|---|
| <ul style="list-style-type: none"> • PCB terminal strips (e.g., 236, 745 Series) are approved as non-stand-alone components per UL 1059 in connection with UL 486E. | UL 1059 | Standard for terminal blocks |
| <ul style="list-style-type: none"> • The <i>MULTI CONNECTION SYSTEM "MCS-MIDI"</i> is approved as terminal blocks per UL 1059 standard in connection with UL 486 E. It is therefore defined for field and factory wiring with at 300 V. | UL 486 E | Equipment wiring terminals for use with aluminum and/or copper conductors |
| <ul style="list-style-type: none"> • It is also approved as connectors for use in data, signal, control and power applications per UL 1977 for factory wiring at 600 V (i.e., the clamping unit must be wired under controlled manufacturing conditions). | UL 1977 | Component connectors for use in data, signal, control and power applications |
| <ul style="list-style-type: none"> • Ex e II terminal blocks are approved to UL 60079-7. | UL 60079-7 | Electrical apparatus for explosive gas atmospheres – Part 7: Increased safety |
| <ul style="list-style-type: none"> • Insulation materials are tested for flammability and performance per UL 94. | UL 94 | Tests for flammability of plastic materials for parts in devices and appliances |

Tests and Testing Procedures per UL Standards

All WAGO products meet requirements for the following tests:

- Pull-Out Test per UL 1059, UL 486 E

In this test, the connected conductors are subjected to the appropriate pull-out forces specified in the following table without jerking for a period of one minute.

Conductor Size AWG or kcmil		Pull-Out Force, Pounds (N)			
		UL 486 E, Table 22			
		Copper		Aluminum	
	(mm ²)				
30	(0.05)	0.5	(2.2)	-	-
28	(0.08)	1	(4.5)	-	-

Test Arrangement per
UL 1059, UL 486 E:

UL Specifications – Underwriters Laboratories, USA (continued)

Tests and Testing Procedures per UL Standards (continued)

• Heat Cycling Test per UL 1059, UL 486 E

Test performed per:

UL 1059

Test performed with maximum rated cross section

Test current: 150% of maximum rated current

84 cycles of: 3 1/2 h ON / 1/2 h OFF

The temperature rise is measured after the first and the 84th cycle.

The temperature rise must not exceed 5°C (41°F) after the 84th cycle, compared to the temperature measured after the first cycle.

per UL 486 E

(Equipment wiring terminals)

Test performed with maximum rated cross section

Test current: Increased test current per UL 486 E, Table 4

500 cycles of: 1 h ON / 1 h OFF
1 1/2 h ON / 1 1/2 h OFF
(from 4/0 AWG up to 400 kcmil per UL 486 E)

The temperature rises at the terminal blocks and control conductors are measured and recorded after: 1, 25, 50, 75, 100, 125, 175, 225, 275, 350, 425 and 500 cycles.

The temperature rise must not exceed 125°C (257°F) and the stability factor "S" must not exceed ±10.

Conductor Size		Test Current for Copper Conductors in A						
		UL 486 E, Table 4						
AWG or kcmil	(mm ²)	Assigned Maximum Ampere Rating ^b	Static Heating ^{a,c,g}	Heat Cycling Temperature Rating ^a

250	(127)	255		405		445		565
300	(152)	285		445		500		625

^a See Section 7.2, 8.2 and 9.2 (UL 486 E)

^b Values are for 75°C (167°F), not more than three conductors in raceway or cable ampacities, National Electric Code, ANSI/NFPA 70.

^c Values are for 75°C (167°F) single conductors in free air ampacities, National Electric Code, ANSI/NFPA 70.

^d Values are approximately 112% of the static heating test currents.

^e Values for 8 AWG and larger conductors are approximately 140% of the static heating test currents.

^f See Section 9.2.4

^g Values in parentheses apply to connectors with assigned ampere ratings.

- **Conditioning – Temperature-Rise Rest per UL 1059**

Test performed per:

per UL 1059 (terminal blocks)

Conditioning:

The clamping units are **pre-wired/pre-inserted nine times** using a conductor with maximum rated cross section. At the 10th time, a new conductor is connected.

After this, a static heating test is performed.

Static Heating Test:

Test current: Terminal block rated current

Test duration: 30 days

Max. permissible temperature rise: 30°C (86°F)

UL Specifications – Underwriters Laboratories, USA (continued)

Tests and Testing Procedures per UL Standards (continued)

• Insulation Parameters per UL 1059

The table below shows the potential involved and the corresponding clearances and creepage distances required in different applications.

Table 8.1 – Minimum Acceptable Spacing for Terminal Blocks per UL 1059 Standard

Application:	Potential In-volved in Volts	Spacing in inches (mm) between un-insulated live parts of opposite polarity, un-insulated live parts and un-insulated grounded parts other than the enclosure			
		Through Air		Over Surfaces	
A. Dead-front switchboards, panelboards, service equipment and similar applications	51 ... 150	1/2	(12.7)	3/4	(19.1)
	151 ... 300	3/4	(19.1)	1-1/4	(31.8)
	301 ... 600	1	(25.4)	2	(50.8)
B. Commercial appliances, including business equipment, electronic data processing equipment and similar applications	51 ... 150	1/16 ^a	(1.6) ^a	1/16 ^a	(1.6) ^a
	151 ... 300	3/32 ^a	(2.4) ^a	3/32 ^a	(2.4) ^a
	301 ... 600	3/8	(9.5)	1/2	(12.7)
C. Industrial, general	51 ... 150	1/8 ^a	(3.2) ^a	1/4	(6.4)
	151 ... 300	1/4	(6.4)	3/8	(9.5)
	301 ... 600	3/8	(9.5)	1/2	(12.7)
D. Industrial, devices having limited ratings ^b	51 ... 300	1/16 ^a	(1.6) ^a	1/8 ^a	(3.2) ^a
	301 ... 600	3/16 ^a	(4.8) ^a	3/8	(9.5)
E. Terminal blocks rated 601 ... 1500 V ^c	601 ... 1000	0.55	(14.0)	0.85	(21.6)
	1001 ... 1500	0.70	(17.8)	1.20	(30.5)

Notes:

1 A slot, groove, or similar, 0.013 inch (0.33 mm) wide or less in the contour of the insulating material is to be disregarded.

2 Air space of 0.33 mm or less between a live part and an insulating surface is to be disregarded for the purpose of measuring over surface spacing.

^a The spacing between terminal blocks of opposite polarity and the spacing between a terminal block and a grounded dead metal part shall not be less than 1/4 inch (6.4 mm) if short-circuiting or grounding of such terminal blocks may result from protruding wire strands.

^b See Section 8.5 (UL 1059)

The spacing values indicated in sub-paragraph D in Table 8.1 are applicable to a terminal block for use only in or with industrial control equipment where the load on any single circuit of the terminal block does not exceed 15 A at 51 ... 150 V, 10 A at 151 ... 300 V, 5 A at 301 ... 600 V or the maximum ampere rating, whichever is less.

^c Applies only to terminal blocks investigated to Part II of this standard. See Section 22.1 (UL 1059).

• Flammability Test per UL 94

This test provides an indication of the material's ability to extinguish a flame, once ignited.

Several ratings can be applied, based on the rated of burning, time to extinguish, ability to resist dripping, and after-glow extinguishing time. Each material tested may receive several ratings, depending on the wall thickness.

UL 94 Rating Categories:

V2

- Specimen mounted vertically
- Burning stops within 30 seconds after the flame is removed
- Flaming drips allowed
- After-glow extinguishes within 60 seconds max.

V1

- Specimen mounted vertically
- Burning stops within 30 seconds after the flame is removed
- No flaming drips allowed
- After-glow extinguishes within 60 seconds max.

V0

- Specimen mounted vertically
- Burning stops within 10 seconds after the flame is removed
- No flaming drips allowed
- After-glow extinguishes within 30 seconds max.

During the test, a 3/4 inch (20 ± 1 mm) flame is applied for two 10-second intervals to the specified bar specimen held vertically.

"Alu-Plus" Contact Paste Terminating Aluminum Conductors

Terminating Aluminum Conductors

WAGO spring clamp terminal blocks are suitable for solid aluminum conductors ① up to 4 mm²/12 AWG if WAGO "Alu-Plus" Contact Paste is used for termination.

Advantages of the "Alu-Plus" Contact Paste:

- Automatically destroys the oxide film during clamping.
- Prevents fresh oxidation at the clamping point.
- Prevents electrolytic corrosion between aluminum and copper conductors (in the same terminal block).
- Provides long-term protection against corrosion.

Using terminal blocks with CAGE CLAMP® Spring Pressure Connection Technology, **aluminum conductors must first be cleaned with a blade** and then immediately be inserted into the clamping units filled with "Alu-Plus" Contact Paste.

It is also possible to apply WAGO "Alu-Plus" **additionally** on the whole surface of the aluminum conductor before termination.

Please note that the nominal currents must be adapted to the reduced conductivity of the aluminum conductors:

2.5 mm² (14 AWG) = 16 A
4 mm² (12 AWG) = 22 A

WAGO "Alu-Plus" in the syringe offers a higher degree of reliability and cleanness when terminating solid aluminum conductors.

Filling is, for example, quickly performed on WAGO PCB Terminal Trips:

WAGO Lighting Connectors

Push nozzle of the "Alu-Plus" syringe first into the circular entry and then into the square conductor entry hole of the WAGO Lighting Connector.

① Aluminum conductors per IEC 61545 standard, Class B, "Alloy 1370" with 90 ... 180 N/mm² tensile strength and 1 ... 4% elongation
Standard values: 90 ... 180 MPa tensile strength, 1 ... 4% elongation (per EN 615.4.1)

Press plunger down until the "Alu-Plus" has filled both entry holes.

Note: Not suitable for higher temperature applications!

Material Specifications

Soldering Information

Wave Soldering

WAGO's PCB terminal blocks and connectors comply with the 2011/65/EU Directive of June 8, 2011 and display the "RoHS compliant" logo on their packaging.

In accordance with IEC 61760-1, the maximum double-wave soldering temperature is 260°C (500°F) for a maximum 10 seconds or 5 seconds per wave.

Reflow Soldering

WAGO's THR and SMD PCB terminal blocks and connectors have high-temperature-resistant insulated housings and reflow solder contacts.

In accordance with IEC 61760-1 or IEC 60068-2-58, the maximum soldering temperature is 260°C/500°F (peak temperature). Due to customer-specific variables (e.g., component configuration and orientation, type of soldering machine, solder paste), trial runs are recommended to ensure product and process compatibility under actual manufacturing conditions.

Insulation Materials

WAGO primarily uses polyamide (PA 66 and PA 46) for housing current-conducting parts, as well as polyphthalamide (PPA) and polycarbonate (PC) for insulation material (see table). For more than 50 years, these materials have proven themselves in WAGO products and all are approved by certified, third-party agencies. All listed halogen-free and flame-retardant polymer materials do not contain any heavy metals, silicone, asbestos, or formaldehyde as formulation components.

Table: Standard Insulation Materials

Polyamide (PA 66)

WAGO uses modified, halogen-free, flame-retardant polyamides.

These materials do not corrode, are difficult to ignite and feature self-extinguishing properties (V0 rating per UL 94).

Adhering to UL 746C, the polyamides used at WAGO have a continuous operating temperature of 105°C (221°F) based on the relative temperature index with impact load (RTIimp). This ensures that the necessary electrical and mechanical insulating properties are maintained at a sufficiently guaranteed level over a long period of time.

The short-term upper temperature limit is 200°C (392°F).

In lower temperature ranges, it has been determined that no damage to the insulation material occurs during usage down to -35°C (-31°F). After installation and wiring, WAGO products can even be used at temperatures down to -60°C (-76°F).

Environmental humidity (up to 2.5% in a standard atmosphere) is absorbed, providing the polyamides with optimum elasticity, strength and durability.

In practical use, basic stabilization of WAGO's polyamides has been proven over many years to be sufficient to prevent damage caused by ozone or UV radiation exposure in intended applications.

Polyamides have excellent resilience against the most demanding climates and have proven themselves in tropical applications worldwide. Insulation parts made of polyamide are resistant to insects. The material does not provide oxygen or other biogenic elements to microorganisms.

The presence of anaerobic earth bacteria, mold, fungus and enzymes does not degrade the material.

Polyamides are resistant to most fuels, greases, and oils, as well as the most commonly used cleaners, such as alcohol, Freon, Frigen, and carbon tetrachloride. Acid resistance depends on the acid type and concentration, as well as the exposure time.

The use of insulation materials during in-house production at WAGO only occurs after acceptance of factory test certificates and specified material tests.

Glass Fiber-Reinforced Polyamide (PA 66 GF)

WAGO uses glass-fiber-reinforced polyamides for components with increased mechanical demands, such as levers, push-buttons or housings exposed to high stress, because they have significantly better mechanical characteristic properties than non-reinforced polyamides.

In general, materials are used that have excellent tracking resistance, flammability ratings and high temperature resistance.

More data can be found in the table.

Polyphthalamide (PPA GF)

Glass-fiber-reinforced, high-performance polyamides are ideal for high-temperature applications, due to the material's high level of thermal dimensional stability, its low dependence on ambient conditions and its excellent strength properties. The material's outstanding tracking resistance permits short creepage distances to be incorporated into miniature components. Fire protection equipment enables classification in flammability class V0 per UL 94 – even for extremely thin walls. PPA GF absorbs minute amounts of moisture from the atmosphere making it ideal for reflow soldering applications and for thin-walled, dimensionally stable components.

More data can be found in the table.

Polyamide (PA 46)

In comparison with PA 66, PA 46 has substantially higher dimensional stability under heat. The relative temperature index with impact load (RTIimp) is 115°C (239°F) for PA 4.6. The permissible short-term temperature for the type used by WAGO is 280°C (536°F).

More data can be found in the table.

Polycarbonate (PC)

Polycarbonate has excellent dimensional stability under heat. The electrical and mechanical properties remain intact at extremely high temperatures up to approximately 120°C (248°F) per UL Yellow Card. Its excellent electrical insulating properties and dimensional stability are virtually independent of environmental conditions, such as humidity and temperature. Highly precise components can be created due to the low shrinkage of the material during injection molding. Polycarbonate has excellent weather resistance and is also highly resistant to high energy radiation. If the PC is not colored, then the components are glass-clear.

Thanks to its desirable properties (e.g., dimensional stability, heat resistance, non-flammability, durability and transparency), PC is a proven and widely used material in the electrical industry.

Depending on the demands placed on the finished product, WAGO uses polycarbonates that carry flammability classifications V2 and V0 per UL 94.

Medium-viscosity PC is used that features excellent chemical resistance.

Material Specifications

Contact Materials

Hard and extra-hard electrolytic copper (ECu), as well as extra-hard copper alloys are the standard materials used for the current-carrying parts of all WAGO products.

These materials combine excellent conductivity and good chemical resistance without the risk of stress-induced cracking.

Contact Materials

The special tin layer, which is the standard layer for all current-carrying parts in WAGO products, ensures perfect long-term protection against corrosive substances. Furthermore, these layers provide a gas-tight contact that ensures a durable transition resistance.

At the clamping unit, the conductor is embedded into the soft tin layer via high contact pressure. This protects the contact area against corrosion.

The thick tin layer also ensures good solderability of both PCB terminal block and connector solder pins.

Clamping Spring Material

Every WAGO clamping spring is made of high-quality, accurately tested austenitic chrome nickel steel (CrNi) with high tensile strength, which boasts proven corrosion resistance through long-term usage.

It is resistant to sea spray, city pollutants and industrial emissions (e.g., sulfur dioxide, hydrogen sulfide).

At room temperatures of approximately 20°C (68°F), the material is resistant to salt solutions up to 30% and dilute phosphoric acids up to 30%.

Even after decades of use, no galvanic corrosion between the chrome nickel spring steel (in connection with the contact materials used by WAGO) and the connected copper conductors has been detected.

The relaxation of the material as a function of time and surrounding temperatures up to 105°C (221°F) can be ignored. Samples loaded with 500 N/mm² at a temperature of 250°C (482°F) showed a relaxation of only 1.5%.

In certain product lines, the clamping springs are thermally treated at temperatures between 350°C (662°F) and 420°C (788°F) after production.

This treatment reduces internal stress due to the material's mechanical deformation, which may result in a slight brown discoloration of the spring surface.

WAGO only accepts deliveries of chrome nickel spring steel against certificates of conformity and after select material tests have been performed.

General Technical Information on Electrical Equipment Used in Hazardous Areas

The formation of an explosive atmosphere is required for the existence of a potentially explosive hazard. Such an atmosphere can be produced at any location where flammable gases or liquids are manufactured, processed, transported and/or stored.

Such hazardous areas can be found in a wide range of industries, including chemical plants, refineries, power plants, paint production facilities, painting shops, filling stations, vehicles, sewage treatment plants, airports, grain mills or harbor facilities.

THE FOLLOWING APPLIES AS A GUIDELINE FOR THE UNDERLYING PRINCIPLE FOR EXPLOSION PROTECTION:

General Requirements

The European EN 60079-0 Standard – VDE 0170-1 Classification – contains general requirements for the design and testing of electrical equipment to be used in hazardous areas.

This ensures this equipment does not cause an explosion in the surrounding atmosphere. EN 60079-0 is supplemented or revised by the European standards indicated on the right which refer to the specifically standardized types of protection.

Electrical Equipment

Electrical equipment includes all items used in whole or in part with electricity. This includes items for generation, transport, distribution, storage, measurement, control, conversion and consumption of electrical power, as well as telecommunications.

Ex Components

Ex components are elements of electrical equipment for hazardous areas that are marked with the "U" letter. These components must not be used on their own in such areas and require an additional certificate when used in such areas when installed in the electrical equipment.

Ignition Protection Categories

Only explosion-proof (protected) equipment must be used in areas in which an explosive atmosphere may still be expected despite the implementation of prevention measures. Explosion-protected electrical equipment can have various types of protection in accordance with the EN 60079 standard requirements.

Protection used by the manufacturer essentially depends on the type and function of the apparatus. From a safety point of view, all standardized types of protection should be viewed as equal.

The ignition protection category "n" exclusively describes the use of explosion-protected electrical components in Zone 2. This zone includes areas in which hazardous, potentially explosive atmospheres are likely to occur rarely or short-term. This represents a transition between Zone 1, in which explosion protection is required, and the safe area in which, for example, welding may be performed at any time.

Regulations covering these electrical components are being prepared worldwide. Organizations such as KEMA in the Netherlands, or PTB in Germany certify that the devices meet the requirements of the EN 60079-15 standard.

Ignition protection category "n" also requires that electrical equipment be provided with additional ID markings as follows:

- nA – non-sparking
- nC – enclosed-break, hermetically sealed, non-incendive, sealed
- nR – restricted-breathing

The table on the opposite page shows an overview of the standardized ignition protection categories and describes their basic principle, as well as typical applications.

General Technical Information on Electrical Equipment Used in Hazardous Areas

Continued

Hazardous Areas

Hazardous areas are zones in which the atmosphere may become explosive. An explosive atmosphere is a mixture of flammable substances in the form of gases, vapors or mixtures with air under atmospheric conditions in critically mixed ratios such that excessive high temperature, arcs or sparks may cause an explosion.

EN 60079-10-1/EN 60079-10-2 and all other well-known standards rank hazardous areas according to the likelihood of the occurrence of an explosive atmosphere into the following zones:

Hazardous areas due to explosive gases, vapors and mists:

Zone 0

Area in which an explosive gas atmosphere is present continuously, for long periods or frequently.

Zone 1

Area in which an explosive gas atmosphere is likely to occur periodically or occasionally during normal operation.

Zone 2

Area in which an explosive gas atmosphere is unlikely to occur during normal operation; if it does occur, then it is temporarily.

Hazardous areas due to explosive dust/air mixtures:

Zone 20

Area in which an explosive dust atmosphere due to dust/air mixtures is present continuously, for long periods or frequently.

Zone 21

Area in which an explosive dust atmosphere due to dust/air mixtures is likely to occur occasionally during normal operation.

Zone 22

Area in which an explosive dust atmosphere due to flammable dust/air mixtures is unlikely to occur during normal operation; but if it occurs, then only for a short period of time.

EN 60079-0 also classifies electrical equipment for use in hazardous areas into two groups:

Group I:

Electrical equipment for mines susceptible to firedamp

Group II:

Electrical equipment for hazardous areas, except for mines susceptible to firedamp.

As this broad application range encompasses a large number of potentially flammable gases, Group II is broken down into sub-groups IIA, IIB and IIC.

This breakdown is based on different gases/materials exhibiting differing ignition power levels as parameters. Therefore, representative gases have been allocated to these three sub-groups:

- IIA – Propane
- IIB – Ethylene
- IIC – Hydrogen

WAGO's terminal blocks can be used both in Group I and Group II.

This information is given under Item 12 in the EU Prototype Test Certificates, based on which the terminal blocks have been approved for Group I and Group II.

Temperature Class	Maximum Surface Temperature (°C)
T1	450
T2	300
T3	200
T4	135
T5	100
T6	85

Depending on the maximum surface temperature, electrical equipment in Group II are classified in temperature categories T1 to T6 for all protection types. The surrounding air temperature, which must be accounted for in dimensioning, is defined as 40°C/104°F (deviations are acceptable under some conditions).

Terminal blocks for "eb" (increased safety) protection type are generally assigned to temperature category T 6. When rail-mount terminal blocks are used in equipment of temperature categories T1 to T5, ensure that the highest temperature on the insulating parts does not exceed 85°C (185°F). The highest measured surface temperature rise must not exceed 40 K.

Thermal resistance of the insulation material must be at least 20°C (68°F) greater than the highest operating temperature. Low temperature stability is considered to be sufficient when the insulation material can withstand 24-hour storage at a temperature of -60°C (-76°F) without nullifying the type of protection.

Special Requirements "Increased Safety Ex e"

The European EN 60079-7 Standard – VDE 0170-6 Classification – contains special requirements for the design and testing of electrical equipment with "eb" (increased safety) protection type for use in hazardous areas.

This standard is a supplement to EN 60079-0 and applies to equipment or parts thereof that neither generate sparks or arcing under normal operating conditions, nor exhibit hazardous temperatures.

This standard describes special measures, which have to be observed to obtain a safety degree according to the "eb" (increased safety) protection type.

Ex components such as rail-mount terminal blocks are covered by Section 4.2 "Terminal Blocks for External Conductors":

- The terminal blocks must be installed in an enclosure meeting the requirements of a recognized protection type per EN 60079-0, Section 1 or EN 60079-31.
- When installing the terminal blocks in an enclosure of protection type "eb" (increased safety) per EN 60079-7, the clearances and creepage distances of Table 2 must be observed. When using accessories, the installation instructions of the manufacturer must be observed.
- The terminal blocks can be used both in Group II and Group I, as the standard requirements are identical in this case.
- The use of this component requires a new assessment by a notified certification agency.

Minimum Ignition Power of Typical Gases:

Explosion Group	I	IIA	IIB	IIC
Gas	Methane	Propane	Ethylene	Hydrogen
Ignition Power	280	250	82	16

The following are the most important design requirements for terminal blocks for external supply conductors to electrical equipment: These must:

- be sufficiently large to permit reliable connection of external supply conductors with cross section of at least the size required by the nominal current of the equipment
- be protected against self-loosening and designed such that the supply conductors cannot slip out of their clamping units
- be designed such that adequate contact pressure is ensured without damaging the conductors
- be designed such that their contact pres-

sure does not change with temperature cycling

- be equipped with a spring connecting link for the connection of stranded conductors
- be designed so as to allow secure connection of smaller conductors for terminal blocks up to 4 mm² (12 AWG).

General Technical Information on Electrical Equipment Used in Hazardous Areas

Continued

Classification of insulation materials according to their tracking resistance is based on their Comparative Tracking Index (CTI) and is defined in Table 1 as follows:

This classification applies to insulating parts without ribs or grooves.

If the insulating parts have ribs or grooves sufficiently large to be considered, the minimum creepage distances must be set according to values for the insulation materials in the next-higher level (e.g., Group I, instead of Group II).

Accounting for the surrounding air temperature of 40°C (104°F) specified for electrical equipment, the current-carrying capacity of rubber-insulated conductors is reduced to 82%, based on DIN VDE 0298-4:2013-06, Table 12 and to 87% for PVC-insulated conductors for the current-carrying capacity defined for 30°C (86°F) in accordance with DIN VDE 0298-4:2013-06, Item 4.3.3.

Conductor Types and Conductor Preparation

In accordance with EN 60079-14/DIN VDE 0165-1, the ends of stranded and fine-stranded conductors must be protected against splaying (e.g., via cable lugs or ferrules) or by the type of terminal blocks used. Soldering alone is not sufficient.

According to EN 60069-7/DIN VDE 0170-6, connecting electrical equipment to terminal blocks having an "eb" (increased safety) protection type must not lead to a reduction of the clearances and creepage distances.

Based on experience through the application of terminal blocks in aggressive atmospheres in the chemical industry, WAGO recommends gas-tight tinned copper ferrules or tinned copper pin terminals when connecting fine-stranded conductors to terminal blocks

Table 1– Tracking Resistance for Insulation Materials

Material Group	Comparative Tracking Index
I	600 ≤ CTI
II	400 ≤ CTI < 600
III a	175 ≤ CTI < 400
III b	100 ≤ CTI < 175

in corrosive atmospheres.

^a When determining the required values for creepage distances and clearances, the working voltage may be 1.1 times higher than the value in the table.

NOTE: The factor of 1.1 takes into account that in many places in a circuit the working voltage is equal to the rated voltage and that a number of rated voltages are used, which are covered by a factor of 1.1.

^b The specified values for creepage distances and clearances already take into account a 10% tolerance for the highest supply voltage. Therefore, further considerations on the voltage fluctuations are unnecessary for determining which voltage value from the table should be used.

^c CTI values are not applicable for voltages of 10 V or less. Materials that do not meet the requirements of material group III a can be used.

^d The specified distances under consideration apply to printed circuit boards in protection level "ec" after 4.5.

It is expressly prohibited to use insulating parts for transferring contact forces. Terminal blocks with sharp edges which could damage supply lines and those types that can be rotated, turned or permanently deformed when fixed in place are not permitted for use. Terminal blocks for internal connections in electrical equipment must not be subjected to excessive mechanical stress. These items must fulfill the requirements for terminal blocks used for external supply conductors.

Clearances between conductive parts having different potentials must be at least 3 mm for external connections, as specified in Table 2. The value of the creepage distances depends on the working voltage, surface geometry of the insulating parts and tracking resistance of the insulation material.

Grooves on the surface may only be considered if they are at least 2.5 mm deep and wide; ribs on the surface only if their height is at least 2.5 mm and their width corresponds to the mechanical strength of the material, however not smaller than 1 mm.

Approvals

Terminal blocks may be used in Zones 1 and 2, provided that the terminal blocks are accommodated in an enclosure that has a minimum IP54 protection and an Ex e certification.

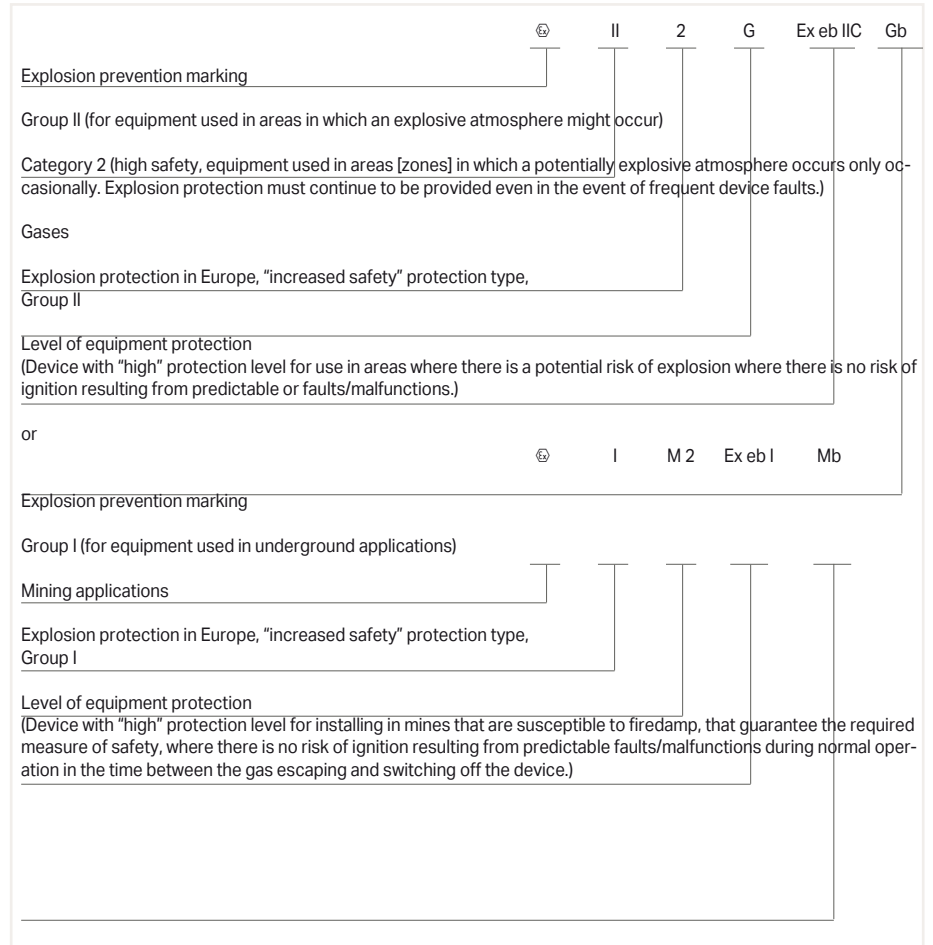

Terminal blocks are considered to be Ex components because they are a part of the equipment. Part certificates provided by Ex Certification Agencies serve as a basis for issuing the complete conformity declaration for the unit.

An EC-type examination certificate is issued in accordance with the 2014/34/EU ATEX Directive.

In addition, an IEXEx Certificate may also be obtained from an appropriate, recognized certification agency in accordance with the IECEx Certification Agreement that is accepted throughout Europe and also in countries such as Canada, China and Australia. These certificates can also be viewed at: www.iecex.com.

EC-type examination certificates have been granted to all WAGO terminal blocks listed in this catalog. WAGO terminal blocks approved for use in Ex e II areas are manufactured of flame-resistant, self-extinguishing Polyamide 66. The same applies to the terminal blocks used in non-hazardous areas. Tracking resistance with a CTI value of 600 as per IEC 60112 and a constant operating temperature of 105°C (22°F) in accordance with IEC 60216-1 and -2 are provided. Factory part quality tests are performed on all PCB terminal blocks with Ex e II approval to monitor and ensure the quality features described above.

Terminal block marking per 2014/34/EU ATEX Directive:

General Technical Information on Electrical Equipment Used in Hazardous Areas

Continued

Special Requirements

Equipment Protection by Intrinsic Safety "i"

The European EN 60079-11 Standard – Classification VDE 0170-7 – contains special requirements for the design and testing of electrical equipment with "i" (intrinsic safety) protection type for use in hazardous areas.

A circuit is "intrinsically safe" when, under normal operating conditions and in the event of specific fault conditions, no sparks or thermal effects can occur and cause the ignition of a certain explosive atmosphere.

A distinction is made here between:

- intrinsically safe electrical equipment when all circuits are intrinsically safe
- associated electrical equipment including both intrinsically and non-intrinsically safe circuits, and being designed such that the non-intrinsically safe circuits cannot affect the intrinsically safe ones.

Intrinsically safe electrical equipment and intrinsically safe parts of associated electrical equipment are classified at "ia", "ib" or "ic" protection level.

Electrical equipment classified Ex "ia" must not ignite when current is applied in the following cases:

- During fault-free operation, with those non-discreet faults present that result in the most adverse condition
- During fault-free operation and with a discreet fault, plus those non-discreet faults that result in unfavorable conditions
- During fault-free operation with two discreet faults, plus those non-discreet faults that result in the most adverse conditions.

Electrical equipment classified Ex "ib" must not ignite when current is applied in the following cases:

- During fault-free operation, with those non-discreet faults present that result in the most adverse condition;
- During fault-free operation and with a discreet fault, plus those non-discreet faults that result in unfavorable conditions.

At applied voltages, the intrinsically safe circuits in electrical equipment of protection level "ic" shall not be capable of causing ignition during undisturbed operation and under the conditions specified in this standard.

No special approval is required for terminal blocks used as simple electrical equipment for "Ex i" protection type, as they do not contain a voltage source and precise information is available concerning electrical data and temperature rise performance.

The terminal blocks must be identifiable, for example by their type designation, and the following design requirements must also be upheld:

Clearances and creepage distances between bare conductive parts of terminal blocks of separate intrinsically safe circuits and grounded or floating conductive parts shall be equal to or greater than the values given in Table 5 (see 654). If separate intrinsically safe circuits are to be considered, the air gap between bare conductive parts of the outer connection parts must meet the following requirements:

- at least 6 mm between the separate intrinsically safe circuits
- at least 3 mm from grounded parts, if a possible connection to ground has not been considered in the safety analysis. Each possible motion of metallic parts that are not rigidly secured must be considered.

Terminal block marking must be unique and clearly visible. If a color is used for this, the color must be light blue (similar to RAL 5015).

Note also when using terminal blocks:

Terminal blocks used for intrinsically safe circuits must be isolated from those used in non-intrinsically safe circuits. This is accomplished by several accepted methods. First, intrinsically safe circuits are separated by at least 50 mm of air space from non-intrinsically safe circuits.

Second, intrinsically safe circuits are housed in a separate enclosure. Third, intrinsically safe terminal blocks are separated from non-intrinsically safe terminal blocks by either an insulated partition or grounded metal partition. The partition size must allow for either 1.5 mm or less distance from the sides of the housing or provide at least 50 mm of creepage distance between the intrinsically and non-intrinsically safe circuits in all directions.

The insulation between an intrinsically safe and a non-intrinsically safe circuit has to withstand an effective AC voltage of $2 \times$ nominal value (U) 1000 V or a minimum of 1500 kV, whereby U represents the total of the effective voltages of the intrinsically safe and the non-intrinsically safe circuit.

Short circuit between different intrinsically safe circuits could cause dangerous conditions. The insulation between these circuits should withstand an effective voltage of at least 500 VAC or 2 UAC where U is the total of the effective voltages of the related circuits.

In accordance with EN 60079-14/ DIN VDE 0165-1, in intrinsically safe circuits, the ends of stranded and fine-stranded conductors must be protected against splaying (e.g., via cable lugs or ferrules) or by the type of terminal blocks used. Soldering alone is not sufficient.

WAGO recommends gas-tight tinned copper ferrules or tinned copper pin terminals when connecting fine-stranded conductors to terminal blocks in corrosive atmospheres.

Requirements pertaining to the necessary distances as appropriate for use of the terminal blocks in the area DIN EN 60079-11 (VDE 0170-7) "Explosive atmosphere – Part 11: Device protection by intrinsically safe features "i" (IEC 60079-11)" are defined under Section 6.2 "Connecting point for external circuits," Section 6.2.1 "Terminal blocks." In general, the following can be stated for terminal blocks based on figure 1: "Example of isolated intrinsically safe terminal blocks with partition" in conjunction with figure 2: "Example of isolation of conductive parts," considering Table 5 – "Clearances, Creepage and Isolation Distances."

Outside:

a) Isolated intrinsically safe circuits: at least 6 mm

All PCB terminal blocks listed on the ordering pages as suitable for Ex "i" applications fulfill these requirements.

b) Intrinsically safe circuits and normal circuits (non-intrinsically safe): ≥ 50 mm

Inside:

a) Ex "i" to Ex "i"

b) Ex "i" to normal circuits

c) Ex "i" to ground

Based on Figure 2 and Table 5 (see next page) in accordance with the selected protection level and the special requirements for isolation distances as described in Sections 6.3.1 to 6.3.13, or in accordance with the alternative procedure for dimensioning of isolation distances given in Annex F.

Terminal blocks with smaller pin spacing may also be used for internal connections, provided they meet the requirements laid out in Table 5 (see below).

The exact clearances and creepage distances as well as separation distances based on Table 5 must be derived from the application items cited above.

Legend:

- 1 Conductive cover
- T Distances based on Table 5
- d Distance at outer connecting parts of the terminal blocks according to 6.2.1

Note:

The dimensions indicated here represent the clearances and creepage distances around the insulation and not the thickness of the insulation.

Dimensions in mm

15.6k	*	70.0	33.0	*	16.5	*	*	150.0	*	*	*	*

Note 1: *At present, no values have been recommended for these voltages.

Note 2: Proof of fulfillment of the CTI requirements for the insulating materials must be provided by the manufacturer. Defining a CTI is not required for insulation materials for voltage levels up to 10 V.

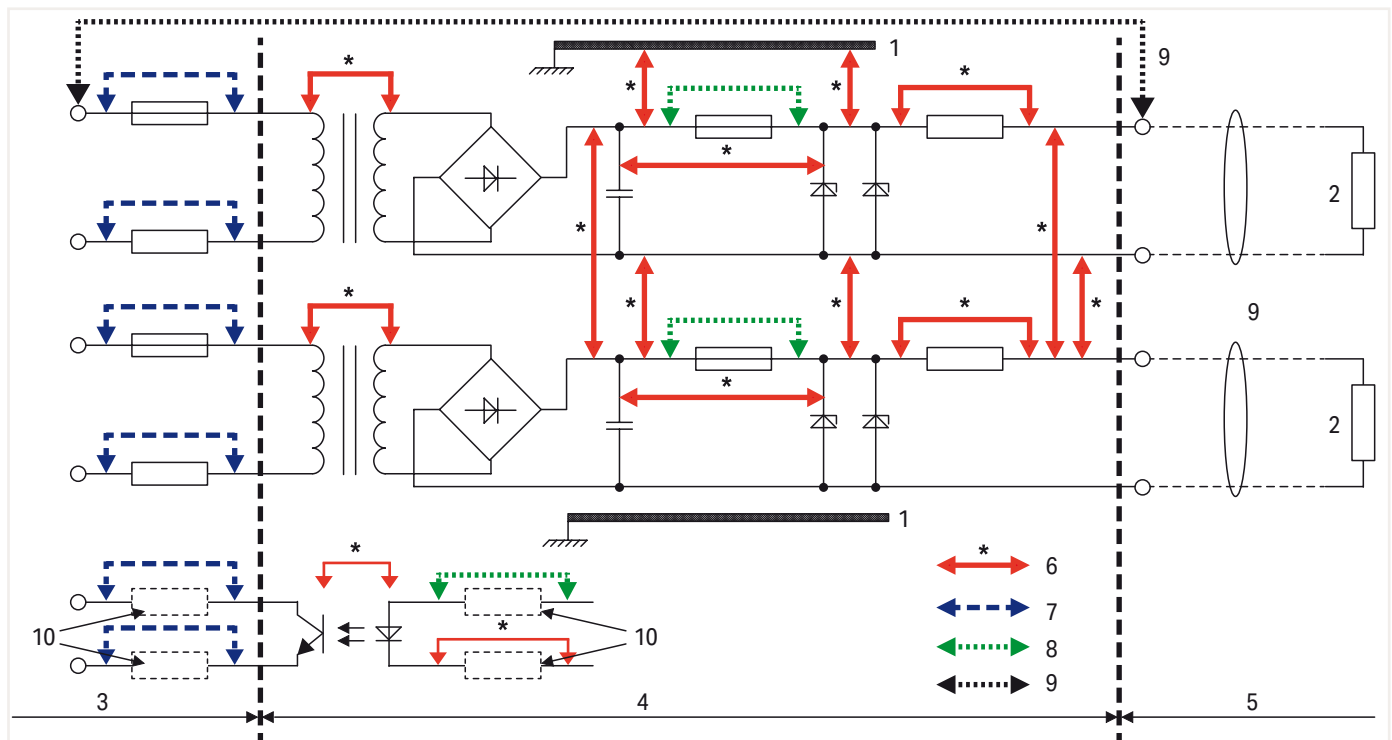

Figure 2: Isolation examples for conductive parts

Legend:

- 1 Chassis
- 2 Load
- 3 Non-intrinsically safe circuit defined by U_m
- 4 Portion of intrinsically safe circuit, item is not intrinsically safe
- 5 Intrinsically safe circuit
- 6 Dimensions for which Table 5 applies
- 7 Dimensions for which general industrial standards apply
- 8 Dimensions per 7.3
- 9 Dimensions based on 6.2.1 for output terminal blocks between isolated intrinsically safe circuits ($d_2 \geq 6 \text{ mm}$) and between intrinsically safe circuits and non-intrinsically safe circuits ($d_3 \geq 50 \text{ mm}$)
- 10 Where required

In accordance with DIN EN 60079-14 (VDE 0165-1), in intrinsically safe circuits, the ends of stranded and fine-stranded conductors must be protected against splaying (e.g., via cable lugs or ferrules) or by the type of terminal blocks used. Soldering alone is not sufficient.

The conductor entry funnels of WAGO PCB terminal blocks fulfill this requirement.

WAGO recommends gas-tight tinned copper ferrules or tinned copper pin terminals when connecting fine-stranded conductors to terminal blocks in corrosive atmospheres.

Electrical Engineering Laboratory Product Safety for Our Customers

To use terminal blocks globally, they must satisfy certain standards and obtain test certificates. These requirements apply to every manufacturer. WAGO also conducts its own tests to increase standards and offer greater reliability with its products. Products undergo a full range of mechanical, electrical and climatic testing, and we'll share a few of those processes with you.

Pull-Out Test (per EN 60947-7-1, EN 60998-2-2)

During the pull-out force test, a conductor is pulled on until it is removed from the clamping unit. The design of the terminals means that extraction only occurs after the standard pull-out force has been exceeded many times over.

WAGO Test Lab

This means that WAGO's products can be used safely and reliably both in Europe and anywhere globally for a wide variety of applications. We heavily emphasize the importance of global acceptance during development. As a result, we can present documentation that verifies our high levels of product safety and reliability while ensuring the fulfillment and accuracy of technical data, which are the highest priorities for our customers and users worldwide. On December 22, 2009, our test lab was accredited by the German Accreditation Association (Deutsche Gesellschaft für Akkreditierung GmbH) in accordance with DIN EN ISO/IEC 17025.

Vibration Test (per IEC/EN 60068-2-6)

Depending on the application, such as railway (per EN 61373) or marine (per GL, LR, DNV), there are various testing requirements to determine if the long-term effects of vibrations degrade electrical connections. The test specimen is subjected to different loads on three axes in an electrodynamic vibration system. The amplitude, the acceleration, and particularly the frequency of the vibration vary during the test. The test values are increased many times over the standard values to meet special customer requirements.

Shock Test (per IEC/EN 60068-2-27)

The shock test is very similar to the vibration test except that, instead of continuous vibrations, single shocks are applied to the test specimen. Shock tests are usually performed, for example, at an acceleration of 20g over a period of 11 ms. Tests for special requirements often call for much higher values and are also conducted in our laboratory. Single-deck TOPJOB® S Rail-Mount Terminal Blocks, for example, pass shock tests up to 500g.

Voltage Drop Test under Bending Stress (per EN 60947-7-1, EN 60999-1)

The voltage drop test under bending stress simulates mechanical stress on the clamping unit. In everyday use, this stress can occur during installation, for example, when an electrician shoves connected conductors to the side in order to access a specific component. The quality of the clamping unit when moving a connected conductor can be validated by the constantly stable measured value of the voltage drop.

Deutsche Akkreditierungsstelle GmbH

Beliehene gemäß § 8 Absatz 1 AkkStelleG i.V.m. § 1 Absatz 1 AkkStelleGBV
Unterzeichnerin der Multilateralen Abkommen
von EA, ILAC und IAF zur gegenseitigen Anerkennung

Akkreditierung

Die Deutsche Akkreditierungsstelle GmbH bestätigt hiermit, dass das Prüflaboratorium

WAGO Kontakttechnik GmbH & Co. KG
Hansastraße 27, 32423 Minden

die Kompetenz nach DIN EN ISO/IEC 17025:2005 besitzt, Prüfungen in folgenden Bereichen durchzuführen:

**Elektrische und mechanische Prüfungen an Klemmen und Steckverbinder
sowie Umweltsimulation**

Die Akkreditierungsurkunde gilt nur in Verbindung mit dem Bescheid vom 18.12.2014 mit der Akkreditierungsnummer D-PL-19704-01 und ist gültig bis 17.12.2019. Sie besteht aus diesem Deckblatt, der Rückseite des Deckblatts und der folgenden Anlage mit insgesamt 5 Seiten.

Registrierungsnummer der Urkunde: **D-PL-19704-01-00**

Abteilungsleiter

WAGO-Seminars

Learn Today – Benefit Tomorrow

Setting the Bar with Your Goals

Product-Related and Customer-Specific Seminars

Small Groups

The small class sizes of WAGO training seminars ensures that no question goes unanswered and no one is overlooked.

Teamwork

Learning as a group is very effective. Ideas can be discussed and exchanged while experiences can be shared – all for the benefit of the participants.

Practical Topics

Experience has shown that practice makes perfect. This is why the focus of every WAGO training seminar is on practical, hands-on learning.

WAGO-Seminars

Experience the Benefits of First-Hand Knowledge and Expertise – Straight from the Source

Our instructors are specialists who know all the ins and outs of WAGO's products. This ensures that the time devoted to each WAGO training seminar is an effective investment in expanding your own expertise.

Request your registration form by email:
training@wago.com

Contact your local
WAGO office.

Product-Related Seminars

We regularly offer product-related seminars on the following topics:

- Building and industrial automation
- Programming of automation components
- Fieldbus systems

Current Seminars at:
www.wago.com

Customer-Specific Training Seminars

In addition to these "open" seminars, we also offer seminars specially tailored to your organization and its particular needs.

Upon request, we can also conduct these courses at your location.

**Special
 Corporate Seminars**
