	<b>WAGO Configuration Software Smart Designer</b>	23

## WAGO Smart Data Overview

The cornerstone of each switchgear unit is not just the products used themselves, but also individualized electrical planning. To make your planning as smooth as possible from start to finish, WAGO offers you complete data, software tools and interfaces. Based on standards like eCI@ss (basic/advanced) or ETIM, the technical and commercial item data – available as product data for CAE or CAD – is machine-readable and fully compatible with your system. From electrical and mechanical planning to delivery, you save time and money every step of the way.

2

## WAGO Smart Data

### Familiar Planning in the CAE Tool

2

Use your familiar CAE tool for designing circuit diagrams. WAGO offers you high-quality CAE product data and CAE macros. Interfaces to a number of CAE tools (e.g., EPLAN, WS CAD, etc.) permit automatic construction of planned terminal strips in the Smart Designer configuration software.

#### Your Benefits:

- Use your preferred CAE tool – WAGO offers interfaces to various systems.
- Instead of entering item numbers, use the bidirectional interface to plan faster with function definitions.
- Pass the circuit diagrams to the Smart Designer Configuration Software, construct terminal strips automatically and save a great deal of time.
- Plausibility checks in the Smart Designer Configuration Software help you avoid errors in your planning. Any missing components, such as an end and intermediate plate, are added automatically.
- Automatic transfer of the printing data from the CAE tool to the thermal transfer Smart Printer minimizes time and errors.
- The simple, clearly arranged selection of marking materials and automatic adjustment of the font size to the corresponding marking field help you avoid errors and reduce costs.

## WAGO Smart Data

### Configuration of Individual Products

2

The Smart Designer Configuration Software allows project planning for WAGO products in 3D. The configurator can be accessed via Web browser with no installation, making it available any time, anywhere in the world.

#### Your Benefits:

- Easy cooperation on a configuration project, even at different development sites
- Save time and avoid errors with location-independent project processing, without different processing statuses, data exchange via email etc.
- Work easily with detailed 3D models in the Smart Designer Configuration Software: Add access straightforwardly and handle projects more easily with realistic products.
- Get your bearings quickly and save time with a selection of pre-defined standard views.
- Item numbers always up-to-date
- Plausibility checks in the Smart Designer Configuration Software help you avoid planning errors.
- Insert user-specific products as placeholders.

#### CAD Configuration

Use your usual CAD tool to import your configuration from the Smart Designer configuration software. This is possible without exception thanks to the availability of various CAD formats (neutral and native 2D/3D CAD formats). Technical and commercial item information is available to you with high-quality data. You determine the product data granularity yourself.

### Parts Lists and Assembly Diagrams

2

Export parts lists and assembly diagrams directly from the Smart Designer Configuration Software to configure production documents or support ordering for the purchasing department. Benefit from the automatic import of item numbers for individual components to your ERP system and from complete, standards-compliant PDF documentation (e.g., per FSF standard for track and rail vehicles).

#### CAE

Use your preferred CAE tool for electrical planning – WAGO offers interfaces to various CAE tools (e.g., EPLAN, E<sup>3</sup>, WS CAD and Engineering Base).

#### Smart Designer

Use the Smart Designer Configuration Software to prepare control cabinet documentation quickly and easily. For every configuration, you can get parts lists and assembly diagrams automatically at the push of a button.

#### Parts Lists and Assembly Diagrams

Export parts lists and assembly diagrams directly from the Smart Designer Configuration Software to create production documents or support ordering for the purchasing process. Benefit from the automatic import of item numbers for individual components to your ERP system and from complete, standards-compliant PDF documentation (e.g., per FSF standard for track and rail vehicles).

## WAGO Marking Software Smart Script Intuitive Marking Software

Smart Script is the new software for WAGO's compact Thermal Transfer Smart Printer. The self-explanatory and intuitive software is perfectly tailored to all control cabinet marking requirements.

Combining superior usability with a modern design, Smart Script helps the user complete the task quickly and easily with just a few clicks. For example, Smart Script can be used to easily customize type labels, as well as define and print barcodes and graphic elements.

- **Modern Design:**  
Appealing and intuitive workflow
- **All Applications in One Software:**  
Fast and easy to use; printer driver and all settings integrated
- **For Any Control Cabinet Marking Application:**  
Professional marking of terminal blocks, labels, type plates and conductor markers

## WAGO Configuration Software Smart Designer Smart Designer in HTML5

Updated to HTML5, WAGO's Smart Designer Configuration Software comes with a new design and additional features.

The new software offers a modern and intuitive user interface for maximum usability. In addition, there is better support for mobile devices, expanding the scope of applications and allowing the software to be used at any time and from anywhere. With this future-ready Web application standard, WAGO offers a tool that perfectly supports the engineering process.

All familiar tried and tested functions of the previous Smart Designer version have been retained. The updated tool allows projects from different CAE planning tools to be imported via an interface and a plausibility check to be performed, for example. Based on WAGO's expertise, a check is performed of whether the configured structure is possible and, for rail-mount terminal blocks, the correct jumpers are placed according to the planning. Alternatively, a combination of rail-mount terminal blocks or a custom connector can be created directly in the software, and an offer can be requested with a click.

- Future-ready Web application standard
- Modern, intuitive user interface
- Better support for mobile devices
- All familiar functions retained

# Marker Carrier For 750/753 Series

Marker carriers (750-106 and 750-107) allow I/O functions to be identified throughout the node via continuous marking strips.

Both carrier models permit continuous marking regardless of the I/O module housing used.

- 750-106 for I/O module housing with max. 4 LEDs and for the 48 mm I/O module housing
- 750-107 for I/O module housing with 8 or 16 LEDs
- The marker carrier can be accommodated in the upper Mini-WSB marker slot. It is not necessary to use a carrier on each I/O module to mount the marking strip.
